in § 1202.307, no person shall make a transfer or accept a transfer of any new farm machinery and equipment listed on Schedules I or II, except pursuant to this order or pursuant to directives which may be issued hereunder by the Director.

§ 1202.303 *Manufacturer's State and county distribution plans.* (a) (1) On or before August 10, 1944, each manufacturer shall make a written report to the Director with respect to each type of farm machinery and equipment listed on Schedules I and II, which is scheduled for production for farm use under Schedule B (9 F.R. 1417) of War Production Board Order No. L–257 (9 F.R. 6211). (Certain types of equipment on Schedule II, which are indicated by an asterisk (*), are exempted from this requirement.) Such report shall be made in the form set forth in Exhibit A attached hereto, and shall show the manufacturer's distribution of 80 percent and his proposed distribution of 20 percent (the reserve) of such equipment by States. This report is sometimes hereinafter referred to as the "State distribution plan." (Changes may be made in a State distribution plan under the provisions of paragraphs (b) (1) and (b) (2) of § 1202.304.)

(2) If any manufacturer fails to submit the report required by paragraph (a) (1) of this section by the date specified, the Director is hereby authorized, in his discretion, to formulate as soon as practicable a State distribution plan for such manufacturer. In such case, the Director will supply the manufacturer with a copy of the plan which shall be as effective as though submitted by the manufacturer.

(b) (1) On or before September 1, 1944, each manufacturer shall make a written report, in the form set forth in Exhibit B attached hereto, to the State AAA Committee for each State with respect to the units of Schedule I equipment reported by him to the Director for distribution in such State, other than from the reserve, pursuant to paragraph (a) (1) of this section. Such report shall show the manufacturer's proposed distribution of such equipment by counties. This report is sometimes hereinafter referred to as the "county distribution plan." The State AAA Committee may change a manufacturer's county distribution plan by not more than 10 percent of his total number of units of each type of equipment for all counties, but changes affecting more than 10 percent of any type of equipment may be made with the consent of the manufacturer. (This authority to change a county distribution plan shall not be construed to permit an increase in the total number of units to be transferred in any State under such plan.) On or before September 20, 1944, the State AAA Committee shall notify the manufacturer, through the office sending in the report, of any change in his county distribution plan or that it will make no such change. If any manufacturer fails to receive such notification by such date, no change in his county distribution plan will be effective without his consent. (Subsequent changes in a county distribution plan may be made under the provisions of paragraph (a) of § 1202.304.)

(2) If any manufacturer fails to make the report required by paragraph (b) (1) of this section by the date specified, the State AAA Committee is hereby authorized, in its discretion, to formulate as soon as practicable a county distribution plan for such manufacturer. In such case, the State AAA Committee will supply the manufacturer with a copy of the plan which shall be as effective as though submitted by the manufacturer.

(c) If a manufacturer is authorized at any time, under Schedule B of War Production Board Order No. L–257, to manufacture for farm use any Schedule I or Schedule II equipment, other than the types of equipment on Schedule II indicated by an asterisk (*), in addition to that shown in his reports made pursuant to paragraphs (a) (1) and (b) (1) of this section, such manufacturer shall, within 30 days of his receipt of the authorization, make a supplemental report to the Director, in the form shown in Exhibit A, showing his proposed distribution of such equipment by States. The distribution plan shown in this report shall be subject to modification and approval by the Director. Schedule I equipment covered by a supplemental report shall be distributed within a State by counties as the Director may direct.

§ 1202.304 *Additional changes in manufacturer's State and county distribution plans.* State and county distribution plans may be changed at any time in the following manner:

(a) *County distribution plans.* In the case of Schedule I equipment, a manufacturer or distributor may change the manufacturer's county distribution plan within a State with the approval of the State AAA Committee. In seeking such approval, such manufacturer or distributor shall inform the State AAA Committee of the quantity, make and type of the equipment involved and of the counties from which such equipment would be taken and the counties in which it would be placed.

(b) *State distribution plans.* (1) If the equipment has not been shipped from the factory, a manufacturer may appeal to the Director for permission to change his State distribution plan. In making this appeal, the manufacturer shall inform the Director of (1) the quantity, make and type of the equipment involved, and (2) the States from which such equipment would be taken and the States in which it would be placed. This appeal shall be accompanied by a written statement of concurrence from the State AAA Committee for the State from which such equipment would be taken.

(2) If the equipment has been shipped from the factory to a manufacturer's branch house or to a distributor, the manufacturer or distributor may change the manufacturer's State distribution plan with the permission of the State AAA Committee for the State from which the equipment would be taken. In seeking such permission, the manufacturer or distributor shall inform the State AAA Committee of (1) the quantity, make and type of the equipment involved, (2) in the case of Schedule I equipment, the counties from which such equipment would be taken, and (3) the State, and in the case of Schedule I equipment, the counties in which such equipment would be placed. If the State AAA Committee permits the proposed change in the State distribution plan to be made, such Committee shall notify the Director accordingly, informing him of (1) the quantity, make and type of the equipment involved and (2) the State and, in the case of Schedule I equipment, counties in which such equipment will be placed. The State AAA Committee shall transmit a copy of this notification to the State AAA Committee for the State in which the equipment will be placed.

§ 1202.305 *Transfers by manufacturers and their distributors.* (a) (1) Prior to October 1, 1944, a manufacturer may transfer not in excess of 70 percent of his scheduled production of any type of farm machinery and equipment listed on Schedule I which is produced for farm use under Schedule B of War Production Board Order No. L–257. Whenever a transfer of such equipment is made prior to such date to a dealer, either by a manufacturer or his distributor, the manufacturer shall give, or cause his distributor to give on his behalf, a written notice, in the form provided in Exhibit C attached hereto, to the State AAA Committee of the State for which the equipment is intended for ultimate transfer for use. Unless otherwise authorized by the appropriate State AAA Committee, the maximum quantity of any type of such equipment, which a manufacturer or his distributor may transfer for ultimate transfer for use in any county prior to October 1, 1944, shall not exceed 70 percent of the quantity which the manufacturer was authorized to transfer for such county out of equipment produced under Schedule A[2] (9 F.R. 6214) of War Production Board Order No. L–257, except that, if this maximum includes a fraction of a unit of equipment, it may be exceeded to the extent of such unit. If a manufacturer transfers more than 50 percent of his scheduled production of any type of Schedule I equipment and it appears that his transfers will reach the maximum permitted by this paragraph prior to October 1, 1944, such manufacturer may appeal to the Director for relief from the restrictions of this paragraph.

(2) Prior to the filing of the report with the Director as required by paragraph (a) (1) of § 1202.303, a manufacturer may transfer not in excess of 80 percent of his scheduled production of any type of farm machinery and equipment listed on Schedule II covered by such report, which is produced for farm use under Schedule B of War Production Board Order No. L–257.

(b) After having made the reports to the Director and to the State AAA Committees pursuant to paragraphs (a) (1), (b) (1) and (c) of § 1202.303, a manufacturer shall transfer Schedule I and Schedule II equipment (except the reserve) covered by such reports only in accordance with his State and county distribution plans (including any authorized changes), but subject, however, to the provisions of paragraph (a) (1) of this section with respect to transfers of Schedule I equipment prior to October 1, 1944. (Pending the action of a State AAA Committee changing a county distribution plan, equipment may be transferred in accordance with the distribution plan contained in the manufacturer's report.) A manufacturer will comply with this requirement by transferring farm machinery and equipment, which is for any State or, in the case of Schedule I equipment, county in accordance with his distribution plan, to a distributor or dealer whose trade territory includes part or all of such State or county, or to an individual for agricultural use in such State or county. Whenever a manufacturer transfers any equipment to a dealer, he shall notify such dealer of the State and, in the case of Schedule I equipment, of the county for which such equipment is intended for ultimate transfer for agricultural use. When a distributor receives any Schedule I or Schedule II equipment from a manufacturer pursuant to this paragraph, he likewise, shall transfer such equipment to a dealer only in accordance with such manufacturer's distribution plans, and, shall also notify such dealer of the State and, in the case of Schedule I equipment, of the county for which such equipment is intended for ultimate transfer for agricultural use. The notification to a dealer by a manufacturer or distributor required by this paragraph shall be given as early as possible, but not later than the date of shipment of the equipment.

(c) Twenty percent of each manufacturer's scheduled production of each type of Schedule I and Schedule II equipment, except the types of equipment on Schedule II indicated by an asterisk (*), which is produced under Schedule B of War Production Board Order No. L–257, shall constitute a reserve to be transferred only as directed by the Director. The Director is hereby authorized to direct the transfer of such reserve. In so doing, the Director may direct the transfer of a manufacturer's current production at any given time, or inventory of such equipment.

(d) Certain types of equipment on Schedule II are designated with an asterisk (*). As to this equipment no distribution plan is required and no reserve is established. Consequently, a manufacturer and his distributor may transfer 100 percent of the manufacturer's production of this equipment. In the case of any of this Schedule II equipment produced under Schedule A of War Production Board Order No. L–257, which has not yet been transferred by a manufacturer or his distributor and which is covered by a distribution plan heretofore submitted or is part of a reserve heretofore established, such equipment may be transferred without regard to such distribution plan or such reserve.

(e) Except as to the equipment on Schedule II indicated by an asterisk (*), a manufacturer may transfer Schedule I or Schedule II equipment manufactured for farm use under Schedule A of War Production Board Order No. L–257 only in accordance with the State and county distribution plans heretofore established and in accordance with directives heretofore issued by the Director. On and after October 1, 1944, whenever any Schedule I equipment, produced for farm use under said Schedule A, is transferred to a dealer, either by a manufacturer or his distributor, the manufacturer shall give, or cause his distributor to give on his behalf, a written notice in the form provided in Exhibit C to the State AAA Committee of the State for which the equipment is intended for ultimate transfer for use.

§ 1202.306 *Transfers for agricultural use.* (a) No person, other than a Federal Government agency, shall make a transfer or accept a transfer of Schedule I or Schedule II equipment for agricultural use, except pursuant to a purchase certificate issued by a county farm rationing committee.

(b) On and after October 1, 1944, in the case of Schedule I equipment, whenever a county farm rationing commit-

tee determines that an applicant is eligible for a purchase certificate, it shall issue to the applicant a letter of eligibility on a form to be prescribed by the Director, on which the committee will specify the type of equipment (but not make, model and size) for which the applicant is eligible to negotiate. The letter of eligibility will serve notice to dealers that the applicant is eligible to negotiate for the type of equipment named in the letter. After the applicant has located the desired equipment and arranged terms of sale with a dealer, the dealer shall enter on the letter of eligibility the make, model and size of the equipment and his name and address. The applicant shall then return the letter of eligibility to the county farm rationing committee. If the county farm rationing committee determines that the desired equipment is appropriate for the applicant's needs, it shall issue a purchase certificate, on which that particular equipment and the name and address of the dealer with whom the applicant has negotiated are specified. Otherwise the committee may refuse to issue the purchase certificate, but, in such case, the committee may, in its discretion, issue to the applicant another letter of eligibility for the same type of equipment so that the applicant may negotiate further. In no case, however, shall the county farm rationing committee issue a purchase certificate for equipment of a different make, model and size from that specified on the applicant's letter of eligibility or with the name and address of a dealer other than one with whom the applicant has negotiated.

(c) On or before October 1, 1944, each State AAA Committee shall notify each county farm rationing committee within the State of the total number of units of each type of Schedule I equipment expected to be available for such county according to the county distribution plans established under paragraph (b) (1) of § 1202.303. The State AAA Committee, however, shall control the issuance of letters of eligibility and purchase certificates for such equipment by authorizing the county farm rationing committees, at such times as the State committee deems appropriate, to issue only a specified number of letters of eligibility and purchase certificates. With respect to any Schedule I equipment not covered by such county distribution plans, the State AAA Committee shall authorize the appropriate county farm rationing committee to issue letters of eligibility and purchase certificates as the availability of such equipment warrants. No county farm rationing committee shall issue letters of eligibility or purchase certificates for any type of Schedule I equipment in excess of the number authorized by its State AAA Committee.

(d) In order that the manufacturer's county distribution plan may be carried out as fully as is practicable, a dealer shall negotiate with and transfer Schedule I equipment only to a holder of a letter of eligibility and purchase certificate from the county for which the dealer has equipment designated by the notification provided for in paragraph (b) of § 1202.305, except in those unusual cases in which need for the particular item of equipment does not exist in such county. Dealers may transfer any Schedule II equipment to any person holding a purchase certificate for such equipment issued by any county farm rationing committee.

§ 1202.307 *Transfers to Federal agencies and for non-agricultural use.* (a) Purchase certificates will not be issued to Federal agencies. If a Federal agency requires any Schedule I or Schedule II equipment for agricultural use in the United States, it must obtain a written authorization from the Director. In applying for such authorization, a Federal agency shall submit such information as the Director may request. If a Federal agency requires any such equipment for non-agricultural use, or for export, it must comply with War Production Board Order No. L–257, as amended, or L–257a, as amended (9 F.R. 6218), and any other applicable War Production Board regulations.

(b) If any person other than a Federal agency requires any Schedule I or Schedule II equipment for non-agricultural use, he must comply with War Production Board Order No. L–257, as amended, and any other applicable War Production Board regulations.

§ 1202.308 *Records and reports by dealers and others.* (a) Each dealer and each retail store of a mail order house transferring any unit of Schedule I or Schedule II equipment with a selling price of $15.00 or more shall enter in the appropriate place on the purchase certificate the total sales price and a complete description of the equipment transferred, or prepare and forward to the appropriate county farm rationing committee an invoice or sales ticket containing the same information.

(b) Mail order houses transferring through mail order channels any unit of Schedule I or Schedule II equipment with a selling price of $15.00 or more, shall transmit to the county farm rationing committee issuing the purchase certificate covering such equipment a true statement to the effect that the price for which the equipment was sold by such mail order house was not in excess of the price published for the equipment in the mail order house's latest current catalog. The statement shall accompany, or may be stamped on, the purchase certificate.

(c) Reports made pursuant to this section shall be treated as confidential and shall be open for inspection only by duly authorized representatives of the Office of Price Administration or the War Food Administration, unless otherwise directed by the Director.

§ 1202.309 *Manufacturer's records and reports.* (a) Each manufacturer shall maintain for at least two years records of all transfers of Schedule I and Schedule II equipment made by such manufacturer. Such records shall show the States and, in the case of Schedule I equipment, the counties, for which such equipment was transferred.

(b) Whenever a manufacturer determines that he will not complete his production of any item of Schedule I or Schedule II equipment scheduled under Schedule B of War Production Board Order No. L–257 and consequently will not be able to carry out in full his State distribution plan (including a plan established pursuant to paragraph (c) of § 1202.303), he shall report to the Director in writing accordingly, and shall indicate in such report what States will not be so supplied.

§ 1202.310 *Change of farm milk coolers prohibited.* No person shall change any farm milk cooler listed on Schedule II, which is produced for farm use under War Production Board Order No. L–257, into a farm freezer or other type of equipment for the purpose of sale, or transfer such cooler after so changing it, except as a cooler in accordance with the provisions of this supplementary order.

§ 1202.311 *Territorial application.* This Supplementary Order No. 1 shall apply only within the limits of the continental United States. (The transfer of farm machinery and equipment to the territories and possessions of the United States is controlled by War Food Order No. 14, Supplementary Order No. 2.)

§ 1202.312 *Incorporation into War Food Order No. 14.* This Supplementary Order No. 1 shall be added to and become a part of War Food Order No. 14 and any violation of this Supplementary Order No. 1 shall be deemed to be a violation of War Food Order No. 14.

§ 1202.313 *Communications.* All reports required to be filed hereunder, and all communications concerning this supplementary order shall, unless instructions to the contrary are issued by the Director, be addressed to the Director, Office of Materials and Facilities, War Food Administration, Washington 25, D. C., Ref: WFO 14, Supp. 1.

NOTE: All reporting and record keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 10th day of July 1944.

If, however, the released

turkeys are purchased by a turkey buyer or an authorized processor, such turkeys shall again become subject to the restrictions of this order.

(2) The Director may, notwithstanding the provisions hereof, release any turkeys or processed turkeys from the restrictions hereof if the Director determines that such release is necessary or appropriate in the public interest and to promote the national defense.

(e) *Exemption.* The provisions of this order shall not apply to turkeys used for home consumption by the owner of the turkeys.

(f) *Records and reports.* (1) Each authorized processor shall notify the designated U. S. Army Quartermaster Market Center for the State where said authorized processor has processed turkeys, at least 72 hours prior to the time when such processed turkeys will be available for inspection, that the processed turkeys will be available for inspection at the authorized processor's plant, the cold storage warehouse, or the wholesale receiver's warehouse. The Order Administrator may take any action with reference to such petition which is consistent with the authority delegated to him by the Director. If the petitioner is dissatisfied with the action taken by the Order Administrator on the petition, he shall obtain, by requesting the Order Administrator therefor, a review of such action by the Director. The Director may, after said review, take such action as he deems appropriate, and such action shall be final. The provisions of this paragraph (i) shall not be construed to deprive the Director of authority to consider originally any petition for relief from hardship submitted in accordance herewith. The Director may consider any such petition and take such action with reference thereto that he deems appropriate, and such action shall be final.

(j) *Violations.* Any person who violates any provision of this order may, in accordance with the applicable procedure, be prohibited from receiving, making any deliveries of, or using turkeys or processed turkeys. In addition, any person who wilfully violates any provision of this order is guilty of a crime and may be prosecuted under any and all applicable laws. PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 1, Direction 22, as Amended July 12, 1944]

SPECIAL ALLOTMENTS

The following amended direction is issued pursuant to CMP Reg. 1:

(a) *Purpose.* (1) This direction outlines the way in which a manufacturer of Class A products who does not receive allotments from his customers in time to permit him to make full use of them, may apply for a special allotment.

(2) Special allotments will not be granted except in extraordinary cases of urgent need where a clear showing is made that failure to make the allotment will actually cause an interruption of production to the detriment of the war effort and that the applicant has made a diligent effort to obtain allotments from his customers and has been unable to do so. The showing of these facts must be set up in the letter of transmittal covering the application.

(3) Usually manufacturers applying for a special allotment will be either those who are several steps removed from a prime consumer and where unavoidable delay is involved in passing allotments down or those engaged in long cycle operations whose customers are not able to furnish them with advance allotments.

(4) Special allotments will not be granted to prime consumers.

(b) *How to apply for special allotments.* Applications for special allotments should be made on Form CMP–4B. The following variations from the instructions for preparing the form must be observed:

(1) Mark the application "Special Allotment Procedure" in Item 3 of the heading.

(2) Insert in Item 4 of the heading the description of the A product covered by the application.

(3) The applicant must show in section II his total anticipated production schedule for the Class A product covered by the application to be produced from the allotments for the quarters for which application is made.

(4) The applicant must show in section III his total requirements during the quarters covered by the application to fill the total anticipated production schedule shown in section II.

(5) Section IV must be filled out in accordance with the instructions.

(6) The applicant must show in section V the quantity of controlled materials for which a special allotment is required which will be the difference between the quantities shown in section III and the quantities shown in section IV.

(7) All other information called for on the CMP–4B application, including shipment by preference ratings and Claimant Agencies (section I), must be given by the applicant. The application should be filed with the War Production Board Ref: Special Allotment Procedure, and must be accompanied by a letter of transmittal explaining fully why the applicant feels he is entitled to special treatment.

(8) In those cases where the applicant has been instructed by a particular Claimant Agency or Industry Division to file an application for a special allotment he should indicate the name of the Claimant Agency or Industry Division in Item 1 of the heading.

(c) *Conditions on use of special allotments.* Conditions on the use of special allotments will be imposed in the letter of transmittal accompanying Form CMPL–150 on which the special allotment will be made. Among the conditions will be the following:

(1) A consumer receiving a special allotment must not use any allotment received from his customers to purchase controlled materials or Class A products needed in manufacturing the Class A product covered by the special allotment. This restriction applies only to the quarter or quarters covered by the special allotment. However, when a consumer has returned customer's allotments, as provided by paragraph (c) (4), in the full amount of the special allotment made to him for any one quarter, the consumer may use allotments from his customers during the rest of the quarter just as

though the special allotment had never been made.

(2) Authorized controlled material orders placed, or allotments made, on the basis of allotments received from customers (including SO orders received) prior to receiving the special allotment need not be changed, but the consumer receiving the special allotment must deduct from it the quantity of such orders and allotments for the same quarter.

(3) A manufacturer receiving a special allotment must not deliver any Class A product made out of controlled materials covered by the allotment to any customer unless the customer furnishes the manufacturer with an allotment and an authorized production schedule.

(4) A consumer receiving a special allotment must, not later than the fifth day of each calendar month following receipt of the special allotment, return to the Claimant Agency or Industry Division making the special allotment all allotments received from his customers for the manufacture of the Class A product covered by the special allotment, and must report allotments received and used prior to receipt of the special allotment. The return of allotments and reports must be made on Form CMP–28.

(d) *Quarters for which special allotments will be made.* This special allotment procedure will be used only to make allotments through the second quarter of 1945.

Issued this 12th day of July 1944.

PART 3191—CIVILIAN AIRCRAFT [1]

[Limitation Order L–48, as Amended July 12, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of materials entering into the production of aircraft for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3191.4 *General Limitation Order L–48*—(a) *Purposes and definitions.* This order forbids the manufacture of any aircraft and aircraft products, unless authorized in the manner provided in this order. It also forbids the transfer of the following products which have been made under authorization of the War Production Board: (1) New training devices or those which have been in operational use for less than six months and (2) new aircraft or other aircraft products or those which have had less than 100 hours flying time. For the purpose of this order, aircraft and aircraft products are airplanes, airframes, airplane propulsion engines, airplane propellers, gliders, and aircraft training devices designed to simulate actual flying conditions.

(b) *Manufacture of military aircraft, and aircraft products.* Manufacture of aircraft and aircraft products to fill a schedule approved by the Joint Aircraft Committee and Aircraft Production Board is not restricted by this order.

(c) *Manufacture of prototype aircraft and aircraft products.* Prototype aircraft and aircraft products may be manufactured. Preference ratings and an allotment symbol are assigned by Preference Rating Order P–43. Whether or not the allotment symbol or rating is used to get materials, prototypes for civilian use must be manufactured without diverting any manpower, technical skill or facilities from activities connected with the war effort.

(d) *Manufacture of other aircraft and aircraft products.* (1) The War Production Board will authorize the manufacture of other aircraft and aircraft products only if the demand for them is directly related to military needs or to the operation of a service to fill an essential need. No person may manufacture these aircraft or aircraft products except as authorized or permitted in this order.

(2) Applications to the War Production Board for approval of manufacture must be made by letter in triplicate, must be accompanied by an application on Form CMP–4B to cover the required materials, and must show the following:

(i) The proposed production by month;

(ii) A statement explaining in detail the use to be made of the aircraft or aircraft product and its relation to the military or other essential need;

(iii) If the application is for complete airplanes, it must also show the delivery schedule of the required engines and propellers describing the product and showing the manufacturer. If a schedule for complete airplanes is approved, the War Production Board will authorize the manufacture and transfer of the engines and propellers, and the manufacturers of the engines and propellers need only file with the War Production Board their applications for materials on Form CMP–4B.

(e) *Restrictions on the transfer of aircraft or aircraft products.* (1) No person may transfer any of the following aircraft or aircraft products manufactured under paragraph (d) above without specific authorization of the War Production Board: (i) New training devices or those which have been in operational use for less than six months, and (ii) New aircraft or other aircraft products or those which have had less than 100 hours flying time and are still airworthy.

(2) Applications for authorization to transfer aircraft and aircraft products must be made by the purchaser to the War Production Board on Form WPB–1319 unless authorization is granted under subdivision (d) (2) (iii) above. Only those applications showing important military or other essential needs will be considered.

(f) *Communications.* All applications for permission and other communications concerning this order should be addressed to: War Production Board, Washington 25, D. C. Ref: L–48.

(g) *Violations.* Any person who wilfully violates any provisions of this order, or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priority assistance.

Issued this 12th day of July, 1944.

PART 3216—MATERIAL ENTERING INTO THE OPERATION OF TRANSPORTATION SYSTEMS

[Preference Rating Order P–142, Direction 3, as amended July 12, 1944]

ADVANCE AUTHORIZATION FOR SPECIAL ITEMS OF CAR MATERIALS

The following amended direction is issued pursuant to Preference Rating Order P–142:

(a) This direction permits railroad operators to place advance orders for the following items of car materials listed in paragraph (b) (2) of Order P–142:

Air Brakes—AB	Code No. CA
Hand Brakes—Power	Code No. CB
Brake Beams	Code No. CH
Couplers and Coupler Bodies	Code No. MA
Bolster Springs—Car	Code No. MC

subject to the following conditions:

(1) Advance orders for items under this direction may be placed for delivery during each of the three calendar quarters following the quarter in which the order is placed. Thus during the second quarter of 1944, advance orders may be placed for delivery in the third and fourth quarters of 1944 and the first quarter of 1945.

(2) The operator may order for delivery in each advance quarter up to 75% of the amount of each of the above items authorized for him under Order P–142 for the first quarter of 1944. With the exception of power hand brakes (Code CB), he may use the same preference ratings, to the same extent as were authorized for the particular item for the first quarter of 1944. For power hand brakes, he may use only a rating of AA–3 for advance quarters, regardless of the ratings authorized for that item in the first quarter of 1944.

For example, if an operator was authorized in the first quarter of 1944 to buy 100 AB Air Brakes with AA–1 rating and 200 with AA–3 rating, he may, under this direction, place orders for each advance quarter for not more than 75 with AA–1 rating and 150 with AA–3 rating. Also, if he was authorized in the first quarter of 1944 to buy 10 power hand brakes with AA–1 rating and 50 with AA–3 rating, he may, under this direction, place advance orders each quarter for 45, all with AA–3 rating.

(b) Each operator must continue to apply each quarter on Form WPB–2585 for firm authorizations in accordance with paragraph (k) (3) of Order P–142. To the extent that the firm authorization on that form differs from the advance authorization for any item under this direction, orders must be cut back, or new orders may be placed, accordingly.

(c) This direction applies to railroad and private car line operators under Order P–142 (serial numbers below 1500), but not to transit operators.

(d) If an operator has no first quarter 1944 authorization to use as a "base" (against which to apply the 75% quota for advance ordering of any item under this direction), the War Production Board may establish such a base by written authorization to the operator. It may also direct that an operator's base be increased or reduced if his first quarter 1944 authorization does not properly represent his advance quarterly needs for the particular item. If such a revised base is established for an operator, he may place advance orders against it subject to all provisions of this direction.

Issued this 12th day of July 1944.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L–335, Direction 8, as Amended July 12, 1944]

DISTRIBUTOR RECEIPTS ON CERTIFIED BUT UNRATED ORDERS AND RETAIL SALES ON UNCERTIFIED AND UNRATED ORDERS

The following amended direction is issued pursuant to Order L–335:

(a) *What this direction does.* This direction tells distributors how they can get lumber other than by extending their customers' certified orders, and explains what lumber may be sold by sawmills and distributors on uncertified and unrated orders. It also permits distributors to validate certain orders that distributors have placed with sawmills.

(b) *Lumber that a distributor may receive on certified but unrated orders.* Every distributor who was engaged in the business of selling lumber at retail before May 1, 1944, and who had a lumber inventory at that date is permitted to place certified but unrated orders with his lumber supplier and receive in each calendar quarter either 5,000 board feet of lumber or 10 percent of the amount of lumber he received in the same calendar quarter of 1943 provided the 10 percent is not more than 8,000 board feet of lumber. Orders that a distributor places with his lumber supplier to get this amount of lumber must bear the certification described in paragraph (q) (4) of Order L–335. A distributor is not authorized to apply a preference rating to such an order. Lumber that a distributor receives under this provision is in addition to any lumber that he is authorized on Form WPB–3813 to receive or any lumber he is authorized to receive through the extension of his customers' certified orders or under the provisions of paragraph (g) below.

(c) *Distribution yard of sawmill included.* If a person operates both a sawmill and a distribution yard and the distribution yard was engaged in selling lumber at retail prior to May 1, 1944, and had a lumber inventory at that date, the distribution yard may receive the same quantity of lumber from the sawmill as it would be entitled to receive from any other supplier. A transfer of lumber from the person's sawmill stock to his distributor stock must be treated the same way as if the transfer were from another lumber supplier and he must keep a record of the transfer in his sawmill files and endorse the certificate provided for in paragraph (q) (4) of Order L–335 of that record.

(d) *Distributor sales on uncertified and unrated orders.* The 5,000 to 8,000 board feet of lumber that a distributor receives under the provisions of paragraph (b) above is intended for sale to persons who need lumber for a purpose for which such persons have no rating or a rating of AA–5 MRO. This includes industrial plants, business enterprises and private individuals who do not have a rating, and industrial plants and business enterprises (except Class I consumers) who have an AA–5 MRO preference rating but who are not authorized to use it on a lumber order. Such persons are defined in paragraph (m) of Order L–335 as "all other consumers". Any lumber that a distributor receives under the provisions of paragraph (b) above may be sold on certified orders provided an equivalent amount of lumber so sold is made available to persons that are not authorized to place certified orders. A distributor must not sell more lumber on uncertified and unrated orders in a calendar quarter than the 5,000 to 8,000 board feet of lumber he is authorized to receive under paragraph (b) above.

(e) *Sawmills that also sell at retail but do not have a distribution yard.* Sawmills that were engaged in selling lumber at retail on May 1, 1944, but do not maintain a separate retail distribution yard are authorized to withdraw lumber from sawmill stock and sell it on uncertified and unrated orders to the same extent that a distributor is authorized to sell lumber on such orders under the above provisions, and the sawmill must compute the amount of lumber that he is authorized to sell on uncertified and unrated orders in the same way that a distributor computes the amount of lumber that he is authorized to receive on certified but unrated orders under the provisions of paragraph (b) above.

(f) *Distributors' validation of orders placed with lumber suppliers during the months of June and July, 1944.* Every lumber distributor is authorized to place orders with his lumber supplier and to receive from his supplier the amount of lumber that the distributor sold from July 16 to July 31, 1944, on rated orders (except orders rated AA–5 MRO) of his customers. Orders that a distributor places with a lumber supplier under this authority must bear the certification prescribed in paragraph (q) (3) of Order L–336. A distributor may place a new order for this amount of lumber with a supplier or he may validate any orders already placed with suppliers for this amount of lumber. In validating orders already placed with suppliers, the distributor must send to the supplier the certificate required and must indicate the order that is covered by the validation. Such orders may be placed or validated only to the extent the distributor is authorized to receive lumber under the above provision. Any lumber distributor that has received from the War Production Board a release on Form WPB–2720 under Order L–290, M–361, and M–364 which is dated subsequent to May 31, 1944 and has placed an order with a sawmill but is not able to receive delivery of that lumber before August 1, 1944, may validate such an order by providing the supplier with the certification described in paragraph (q) (4) of Order L–335. If the order is validated before July 20, 1944, the supplier may ship the lumber any time before September 1, 1944. If the order is not validated before July 20, 1944, it may not be shipped after July 31, 1944. Other lumber orders that a distributor has placed with his lumber supplier for delivery subsequent to August 1, 1944 may be validated only to the extent that he has received certified orders from his customers requesting delivery after August 1, 1944. The validation of such an order may only be made by extending his customers' certified orders as provided in paragraph (o) (1) of Order L–335. All other orders placed by distributors which cannot be delivered prior to August 1, 1944 must be cancelled by notifying the supplier.

(g) *Uncertified and unrated orders.* A distributor may place uncertified and unrated orders with and accept delivery of lumber from (1) lumber mills that produce less than 100,000 board feet of lumber per year; (2) sawmills that are permitted to accept and ship lumber on uncertified and

unrated orders under paragraph (e) of Directions 1 to 5 inclusive; and (3) sawmills that are included in Direction 7. Acceptance of delivery on such orders is authorized. However, sawmills may not deliver lumber on an uncertified and unrated order if it will interfere with the filling of a certified order. The fact that a distributor is permitted to receive lumber under this paragraph on uncertified and unrated orders does not permit him to sell on uncertified and unrated orders more than the five to eight thousand board feet of lumber that he is authorized to sell on such orders under paragraph (d) above.

PART 1360—MOTOR VEHICLES AND MOTOR VEHICLE EQUIPMENT

[MPR 540[1], incl. Amdt. 1]

MAXIMUM PRICES FOR USED PASSENGER AUTOMOBILES

This compilation of Maximum Price Regulation 540 includes Amendment 1, effective July 10, 1944. The text amended by Amendment 1 is underscored. Amended portions of the Appendices are indicated by notes.

In the judgment of the Price Administrator, prices of used passenger automobiles have risen to an extent and in a manner inconsistent with the purposes of the Emergency Price Control Act of 1942, as amended. The Price Administrator has ascertained and given due consideration to the prices of used passenger automobiles prevailing between October 1 and 15, 1941, and has made adjustments for such relevant factors as he has determined to be of general applicability. So far as practicable, the Price Administrator has consulted with and has been advised by representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the act. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Such specifications and standards as are used in this regulation were, prior to such use, in general use in the trade or industry affected.

§ 1360.652 *Maximum prices for used passenger automobiles.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328, Maximum Price Regulation 540 (Maximum Prices for Used Passenger Automobiles), which is annexed hereto and made a part hereof, is hereby issued.

ARTICLE I—SCOPE OF REGULATION AND PROHIBITION

SECTION 1. *Applicability of this regulation*—(a) *To what sales this regulation applies.* This regulation applies to all sales by dealers and other persons of used passenger automobiles.

(1) *Definition of used passenger automobile ("used car").* "Used passenger automobile", (called "used car" in this regulation), means:

(i) Any automobile which has a seating capacity of less than eleven persons, and which, irrespective of mileage, has been used for any purpose other than for the purpose of selling it;

(ii) A 1941 model year automobile used as a demonstrator; and

(iii) The chassis or body of an automobile described in paragraph (i) or (ii).

This definition includes, among others, used taxicabs and station wagons but it does not inclue 1942 model year automobiles used as demonstrators.

[Subparagraph (1) amended by Am. 1, effective 7-10-44]

(b) *Geographical applicability.* This regulation applies to the forty-eight states of the United States and the District of Columbia, but not to the territories and possessions of the United States.

SEC. 2. *Prohibition against dealing in used cars at prices above the maximum.* (a) On and after July 10, 1944, regardless of any contract or other obligation, except as provided in paragraphs (b), (c) and (d):

(1) No person shall sell or deliver any used car at a price higher than the maximum price permitted by this regulation; and

(2) No person, in the course of trade or business, shall buy or receive a used car at a price higher than the maximum price permitted by this regulation, but if he, the purchaser, has received from the seller a written statement that the price charged does not exceed the maximum price, and he has no knowledge to the contrary, he shall be deemed to have complied with this subparagraph (2); and

(3) No person shall agree, offer or attempt to do any of the acts prescribed in subparagraphs (1) and (2) of this section.

(b) A war procurement agency as defined in section 15 (d), or any contracting officer thereof, or any country whose defense the President deems vital to the defense of the United States under the terms of the Lend-Lease Act, or any government agency of such a country, shall not be subject to the provisions of paragraph (a)(2). Moreover, any war procurement agency contracting officer, with respect to purchases he makes, in his official capacity, of used cars, and any paying finance officer of the United States, with respect to payments he may make, in his official capacity, in connection with purchases of used cars, shall be relieved of any and every liability, civil or criminal, imposed by this regulation or by the Emergency Price Control Act of 1942, as amended.

(c) Nothing in this regulation shall prevent the fulfilment of any written contract for the purchase of a used car whether in the nature of a conditional sales agreement, rental contract providing for purchase or other arrangement, entered into before July 10, 1944, and under which the used car has been delivered prior to July 10, 1944.

(d) Where a promissory note covering payment to a dealer or other seller for a car is discounted by a bank, finance com-

pany, or other person and the latter takes possession of the used car after default by the maker of the note, the return of the repossessed used car to the dealer in connection with the recovery from him of the unpaid balance of the note does not constitute a sale, purchase, or transfer subject to the regulation. However, the sale of a repossessed used car by such a holder of "car paper" at public or private sale, except the return of a used car in connection with a contract to repurchase, is subject to the regulation. Notwithstanding the provisions of this paragraph, where a promissory note covering payment to a dealer or other seller for a car is discounted by a bank, finance company, or other person and the latter takes possession of the used car after default by the maker of the note, nothing in this regulation shall prevent the bank, finance company, or other person who discounted the note from selling the used car for an amount not exceeding the unpaid balance on the note, or the applicable maximum price if it is higher, in the case of a used car delivered prior to July 10, 1944, by the dealer or other seller to the person making the note.

[Paragraph (d) amended by Am. 1, effective 7–10–44].

SEC. 3. *Relation to other regulations*—(a) *In general.* The transactions, persons, and commodities subject to this regulation shall not be subject to any other regulation issued by the Office of Price Administration in so far as they are affected by this regulation, except as provided in paragraphs (b) and (c).

(b) *Exports.* The provisions of this regulation do not apply to the purchase, sale or delivery for export from the Continental United States of a used car. Such a sale, purchase or delivery is covered by the Second Revised Maximum Export Price Regulation.[2]

(c) *Imports.* The provisions of this regulation shall apply to the sale, purchase or delivery of used cars manufactured outside of and imported into the Continental United States only where such used cars are imported from the Dominion of Canada or Mexico. All other sales, purchases or deliveries of imported used cars are subject to the Maximum Import Price Regulation.[3]

SEC. 4. *Less than maximum prices.* Prices lower than maximum prices established by this regulation may be charged and paid.

ARTICLE II—MAXIMUM PRICES

SEC. 5. *Maximum prices for used cars*—(a) *For sales during the six months period beginning on July 10, 1944.* To figure the maximum price of a used car sold during the six months period beginning on July 10, 1944, and ending on January 9, 1945, the seller must

(1) Find the base price according to section 6; and

(2) Add to it the allowance in Appendix D for any piece of equipment listed there which is sold attached to the car; and

(3) If the car is sold as a warranted car (as defined in section 7) by a dealer to a non-dealer, add $100.00 or, if it is higher, add 25% of the total of the base price and any equipment allowance. If the amount to be added is in cents (that is, a certain number of dollar and cents) the amount shall be evened to the nearest dollar.

[Subparagraph (3) amended by Am. 1, effective 7–10–44]

(b) *For sales after the six months period covered by paragraph (a).* For any car sold after the six months period described in paragraph (a) has expired, the seller must figure the maximum price as in paragraph (a), except that he must subtract from it 4% of the total of the base price and the equipment allowanee, if any, for each half year after such six months period up to and including the half year containing the day of sale.

Note that this 4% half year depreciation does not apply to the additional amount allowed under paragraph (a) (3) for a warranted car.

SEC. 6. *How to find the base price.* In figuring his maximum price, the seller shall take as his base price a price found by following the directions given below which apply to the used car he is selling, always using, when he does so, the prices given in Appendix B for the particular region in which the car is located at the time of sale. The regions for which prices are listed in Appendix B and the states included in each region are stated in Appendix A.

(a) *For a complete car listed in Appendix B.* Take the base price listed in Appendix B.

(b) *For a complete car not listed in Appendix B.* (1) If its body and chassis were made by different manufacturers: Take the base price in Appendix B for the most comparable car of the same make, model year, body type, passenger capacity, and wheel base.

(2) If its model year is 1937 or later but its make is not listed in Appendix B: Take the base price in Appendix B for the most comparable car as to model year, body type, passenger capacity, and wheel base.

(3) If its model year is 1936 or before and the make is listed in Appendix B: Take the base price in Appendix B for the 1937 year model of the same make, body type, passenger capacity, and wheel base.

(4) If its model year is 1936 or before and the make is not listed in Appendix B: Take the base price in Appendix B for the 1937 model year of the comparable make and model listed in Appendix C, or if a comparable make or model is not listed in Appendix C, take the base price for the 1937 model year car listed in Appendix B which is most comparable as to body type, passenger capacity, and wheel base.

(c) *For a chassis or body.* (1) If a chassis of a car is sold separately, the base price shall be 70% of the base price established by this section for the complete car.

(2) If the body of a car is sold separately, the base price shall be 30% of the base price established by this section for the complete car.

(d) *For a complete car consisting of a used chassis and a new body.* When a seller sells a complete car consisting of a new body attached to a used chassis, the base price shall be

(1) The base price for the used chassis as established by this section, plus

(2) The price of the new body under the applicable maximum price regulation.

SEC. 7. *Warranted used cars.* (a) *Definition.* A warranted used car is one in good operating condition for which the dealer furnishes to the purchaser the following warranty in writing:

DEALER'S WARRANTY

The used car described below, including any equipment named in Appendix D of Maximum Price Regulation 540, is hereby warranted to be in good operating condition, and to remain in such condition under normal use and service for a period of 30 days after delivery, or 1,000 miles, whichever may first occur.

We agree, if said car is delivered during the above period to our place of business, to make with reasonable promptness any repairs or replacements which may be necessary to its good operating condition in accordance with normal use and service, at a cost to the purchaser named below of not more than 50% of the normal charge for such repairs and replacements. Our normal charge is not in excess of OPA ceilings.

This warranty does not extend to tires, tubes, paint, glass, upholstery, or to any repairs or replacements made necessary by misuse, negligence or accident.

[Dealer's warranty amended by Am. 1, effective 7–10–44]

(b) *Additional warranties by dealer.* A dealer may extend to the purchaser warranties in addition to those provided in the warranty stated in paragraph (a), but this shall be done in a warranty separate and in addition to the warranty provided in paragraph (a), and the maximum price established by section 5 shall not be increased thereby.

(c) *Purchaser's legal remedies for dealer's failure to perform obligations of warranty.* The nature of a purchaser's legal remedies for the breach of a dealer's warranty, which are those existing under the applicable state law, is not changed by this regulation.

ARTICLE III—MISCELLANEOUS

SEC. 8. *Federal and state taxes.* There may be added to the maximum price for the sale of any used car the amount of any Federal, State, county or municipal tax upon, or incident to, the particular sale, or delivery or processing in connection with such sale. There may also be added to this maximum price the amount of any Federal, State, county or municipal tax on the use of such car which applies to any unexpired part of the period the tax covers. The amount of such taxes must be included in the certificate of transfer required under section 11. Any taxes paid on the car or extra equipment when new are not to be added to, or included in, the maximum price under this section.

SEC. 9. *Evasion.* It shall be a violation of this regulation to charge a price above the applicable maximum price in connection with any sale of a used car, either alone or in conjunction with any other consideration even though the price increase appears only indirectly. Specifically, the seller is not permitted to require the purchaser, as a condition of the sale or transfer of the car, to make payment over a period of time; to require him to finance the purchase through any particular lending agency; to require him to purchase any equipment, accessories, repairs, parts or services so as to increase the total compensation above the maximum price; to require him to purchase any other commodity or service; or to require him to make payment in whole or in part by exchanging or transferring or trading in any other vehicle or other product or commodity, or where there is an exchange, transfer or trade-in, to require him to accept an allowance for the vehicle, product or commodity exchanged, transferred or traded in which is below its reasonable value. Furthermore, the seller is prohibited from providing for purchase of the used car by a lessee under a rental contract at an agreed valuation which together with the amount paid for the rental is higher than the applicable maximum price at the time the rental contract is entered into, and from making the terms and conditions of sale more onerous to purchasers than they have customarily been except to the extent allowed by this regulation. However, the Office of Price Administration may upon written request grant written permission to any dealer subject to this regulation to change his credit terms, where such change is necessitated by orders issued by, or at the request of, the United States.

SEC. 10. *Label or tag to be attached by dealer to a used car.* Every dealer offering a used car for sale shall attach to it in a conspicuous place a label or tag not smaller than 4" x 8" in the form set forth in Appendix E, on which shall be set forth legibly all of the information called for in Appendix E.

SEC. 11. *Certificate of transfer that must be completed for a sale of a used car.* Every person when he sells or purchases a used car shall complete a certificate of transfer, Appendix F, which may be obtained from dealers or from the local War Price and Rationing Board. When the used car has been sold, the seller shall insert the details of the sale on the certificate and both the seller and purchaser shall certify on the certificate that they have complied with this regulation and that the selling price was not above the maximum established by the regulation. The completed certificate shall be delivered to the purchaser who shall turn it in to his local War Price and Rationing Board on or before the date he applies to that Board for gasoline rationing coupons for the used car he has purchased. Any misrepresentation in connection with the certificate shall be subject to the penalties provided by the applicable statutes of the United States. This section shall not be applicable to sales when made to dealers.

[Sec. 11 amended by Am. 1, effective 7–10–44]

SEC. 12. *Records and reports.* Every person who sells a used car shall, so long as the Emergency Price Control Act of 1942, as amended, remains in effect, keep and make available for examination by the Office of Price Administration records customarily kept in connection with the sale of a used car, and a copy of the warranty, if any, furnished in accordance with section 7.

SEC. 13. *Enforcement.* Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, proceedings for suspension of licenses, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 14. *Licensing.* The provisions of Licensing Order No. 1,[4] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 15. *Definitions.* When used in this regulation, the term:

(a) "Person" includes an individual, corporation, partnership, association or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of any of the foregoing.

(b) "Dealer" means a person engaged, in whole or in part, in the business of buying, selling, repairing and reconditioning used cars and who maintains a place of business for the display, sale, repairing and reconditioning of such cars. A person who cannot qualify as a dealer because he does not maintain a place for repairing and reconditioning may be approved in writing as a dealer under this regulation by the Office of Price Administration regional office for the region in which his place of business is located, or a district office in that region authorized by such regional office, if he provides adequate evidence to that office that he has established, and is in a financial position to maintain, a working arrangement with a reputable business engaged in the repairing and reconditioning of used cars.

(c) "Sale" includes sales, dispositions, exchanges, and other transfers and contracts and offers to do any of the foregoing. It includes conditional sales and sales under rental contracts, lease agreements or other agreements. It also includes transfers by banks, finance companies, or other persons discounting promissory notes following the taking of possession by such persons upon default of the person making such promissory notes. The term "sale" does not refer to the adjustment of losses made in connection with settlements of claims under policies of insurance against fire, theft, collision, other loss of property or other coverage, even though the right of subrogation may be involved. The terms "sale", "seller", "selling", "purchase", "purchaser" and "purchasing" shall be construed accordingly.

(d) "War procurement agency" includes the War Department, the Department of the Navy, the United States Maritime Commission, the Lend-Lease Section of the Procurement Division of the Treasury Department, and the following subsidiaries of the Reconstruction Finance Corporation: Rubber Reserve Corporation, Metals Reserve Corporation, Defense Plant Corporation, and Defense Supplies Corporation, or any agency of any of the foregoing.

SEC. 16. *Petitions for amendment of general applicability.* Any person seeking a modification of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1[5] issued by the Office of Price Administration.

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register*

Maximum Price Regulation 306 is amended in the following respects:

1. Section 1341.556 is amended to read as follows:

§ 1341.556 *Excepted transactions.* The following transactions are excepted from the provisions of this regulation: Sales and deliveries of commodities covered by this regulation by any processor in any calendar year in which his total volume of sales of such commodities does not exceed 1500 quarts (or an equivalent amount in other container sizes).

2. Section 1341.558 is amended to read as follows:

§ 1341.558 *When a maximum price under this regulation is established.* On and after December 14, 1943, a price figured for any item becomes established (that is, fixed) as the seller's maximum price as soon as he has either filed the price or disclosed it to any prospective customer, whether by sale, delivery, offer, or notice of any kind, provided that the figured price is not higher than the applicable pricing method allows. A maximum price may be established for any item only once, and it may not be changed by the seller except (a) with the written permission of the District Director of the Office of Price Administration for the area in which he is located in cases where the seller has figured his maximum lower than the applicable pricing method allows, and (b) in cases where a change in the regulation changes the seller's applicable pricing method. District Directors are authorized to give this permission.

If the seller wishes to disclose a price lower than the one he figured, he may establish the higher (figured) price as his maximum price at the time of disclosure only by recording it and naming it as such, in ink, on his books, before he discloses the lower price. A seller who has not figured a price for any item may deliver the item, but he may not receive payment for it until he has established a maximum price in accordance with the rules of this section.

3. Section 1341.559 (b) is added to read as follows:

(b) In each sale to purchasers other than government procurement agencies, where a processor makes an allowance for labor or labels under this section he shall state the amount and nature of the allowance on the invoice accompanying the sale.

This amendment shall become effective July 17, 1944.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 2—ADJUDICATION: VETERANS' CLAIMS

PART 4—ADJUDICATION: VETERANS' CLAIMS, CENTRAL OFFICE SECTION

PROOF OF RELATIONSHIP AND DEPENDENCY

§ 2.1040 *Definitions as to relationship.* Definitions as to relationship used in the World War Veterans' Act, 1924, as amended, are applicable under sections 26, 27, and 28 of Public No. 144, 73d Congress. On or after July 13, 1943, the date of enactment of Public No. 144, 78th Congress, the definitions of parent, father, mother and child for the purposes of Public No. 141, 73d Congress, as amended by Public No. 144, 78th Congress, are those given in §§ 2.1041 and 2.1042. (July 17, 1944.) (57 Stat. 554–560; 38 U.S.C. Chapter 12 Note)

§ 2.1041 *Definition of mother or father under Public No. 2, 73d Congress.* These terms mean a natural mother or father of a veteran, or mother or father of a veteran through legal adoption. The phrase "natural mother" means the biological female parent, whether the veteran was legitimate or illegitimate. In establishing relationship where the dependency of a mother is for consideration the submission of evidence of birth will suffice, as evidence of the mother's marriage in establishing relationship under these circumstances would serve no useful purpose. Where the dependency of a father, as defined in § 35.10 (g) (A. D. 284) is involved, evidence establishing the parentage, through marriage or otherwise, will be required. On or after July 13, 1943, for the purposes of Public No. 2, 73d Congress, and Public No. 141, 73d Congress, as amended by Public No. 144, 78th Congress, the terms "parent," "father," and "mother" include a father, mother, father through adoption, mother through adoption, and persons who have stood in loco parentis to a member of the military or naval forces at any time prior to entry into active service for a period of not less than one year (not including step-parent, unless such step-parent stood in loco parentis): *Provided,* That not more than one father and one mother, as defined, shall be recognized in any case, and preference shall be given to such father or mother who actually exercised parental relationship at the time of or most nearly prior to the date of entry into active service by the person who served. (July 17, 1944.) (57 Stat. 554–560; 38 U. S. C. Chapter 12 Note)

§ 2.1042 *Definition of child for purposes of Public No. 2, 73d Congress.* The term "child" means a legitimate child or a child legally adopted, unmarried and under the age of eighteen years, unless prior to reaching the age of eighteen the child becomes or has become permanently incapable of self-support by reason of mental or physical defect. Apportioned compensation or pension may be continued under Public No. 2, 73d Congress, as amended by Public No. 78, 73d Congress, after the age of eighteen years but not after the age of twenty-one years on behalf of any child pursuing a course of instruction approved by the Administrator. On or after July 13, 1943, for the purposes of Public No. 2, 73d Congress, and Public No. 141, 73d Congress, as amended by Public No. 144, 78th Congress, the term "child" means a person unmarried and under the age of eighteen years, unless prior to reaching the age of eighteen years the child becomes or has become permanently incapable of self-support by reason of mental or physical defect, who is a legitimate child; a child legally adopted; a stepchild if a member of the man's household; an illegitimate child, but as to the father, only if acknowledged in writing, signed by him, or if he has been judicially ordered or decreed to contribute to the child's support or has been, prior to his death, judicially decreed to be the putative father of such child, or if he is otherwise shown by evidence satisfactory to the Administrator of Veterans' Affairs to be the putative father of such child; as to the mother proof of birth is all that is required: *Provided,* That the payment of pension shall be continued after the eighteenth birthday and until completion of education or training (but not after such child reaches the age of twenty-one years), to any child who is or may hereafter be pursuing a course of instruction at a school, college, academy, seminary, technical institute, or university, particularly designated by him and approved by the Administrator, which shall have agreed to report to the Administrator the termination of attendance of such child, and if such institution of learning fails to make such report promptly the approval shall be withdrawn. (July 17, 1944.) (57 Stat. 554–560; 38 U.S.C. Chapter 12 Note)

PART 4—ADJUDICATION: VETERANS' CLAIMS, CENTRAL OFFICE SECTION

§ 4.2033 *Section 30, Public No. 141, 73d Congress; Public No. 269, 74th Congress and § 35.015: Child.* [Canceled July 17, 1944.]

PART 10—INSURANCE

REINSTATEMENT

§ 10.3422 *Reinstatement of National Service Life Insurance.* Subject to the provisions of the National Service Life Insurance policy, or any amendment or supplement thereto, any insurance which has lapsed, or may hereafter lapse, and which has not been surrendered for a cash value or for a paid-up insurance, may be reinstated upon written application signed by the applicant, and upon payment of all premiums in arrears, with interest from their several due dates at the rate of 5 per centum per annum, compounded annually, provided such applicant at the time of application and tender of premiums is in the required state of health as shown in paragraph (a), (b) or (c) of § 10.3423, whichever is applicable, and submits evidence thereof at the time of application and tender of premiums as may be satisfactory to the Administrator of Veterans Affairs: *Provided,* That application for reinstatement of a five-year level premium term policy accompanied by evidence of insurability and tender of premiums with interest must be submitted prior to the expiration of the five-year term period: *Provided,* That the payment or reinstatement of any indebtedness against any policy must be made, and if such indebtedness with interest exceeds the reserve of the policy at the time of application for reinstatement thereof, then the amount of such excess shall be paid by the applicant as a condition of the reinstatement of the indebtedness and of the policy: *And provided further,* That a lapsed National Service Life Insurance policy which is in force under extended term insurance may be reinstated without health statement or other medical evidence, if application and tender of premiums with interest are made not less than five years prior to the date such extended insurance would expire. (July 12, 1944.) (54 Stat. 1012; 38 U.S.C. 808)

§ 10.3423 *Health requirements.* National Service Life Insurance may be reinstated if application and tender of premiums are made:

No change in (a).

(b) After expiration of the period mentioned in paragraph (a) hereof, and within three months after the due date of the premium in default, provided the applicant be in as good health on the date of application and tender of premiums as he was on the due date of the premium in default and furnishes evidence thereof satisfactory to the Administrator of Veterans Affairs.

(c) After expiration of the periods mentioned in paragraphs (a) and (b) hereof provided applicant is in good health on the date of application and

tender of premiums, and furnishes evidence thereof satisfactory to the Administrator of Veterans Affairs. (July 12, 1944.) (54 Stat. 1012; 38 U.S.C. 808)

§ 10.3424 *Evidence of insurability.* The applicant for reinstatement of a National Service Life Insurance policy must furnish evidence of insurability at the time of application satisfactory to the Administrator of Veterans Affairs and upon such forms as the said Administrator shall prescribe or otherwise as he shall require. Applicant's own statements of comparative health may be accepted as proof of insurability for the purpose of reinstatement under § 10.3423 (a) or (b), but whenever deemed necessary in any such case by the Administrator of Veterans Affairs report of physical examination may be required. Applications for reinstatement submitted after expiration of the periods mentioned in § 10.3423 (a) and (b) must be accompanied by report of physical examination. Physical examinations incident to reinstatement of insurance shall be acceptable if made by medical officers in active service with the Army, Navy, Marine Corps, or Coast Guard; physicians of the United States Public Health Service; physicians of the Veterans' Administration at a regional office or facility, or by physicians designated by the Veterans' Administration for such purpose and who are not related to the applicant by blood or marriage, associated with him in business, or pecuniarily interested in the reinstatement of the policy. CENTRAL INDIANA GAS CO.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 10th day of July, A. D. 1944.

Notice is hereby given that applications and declarations (or both) have been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 and particularly to sections 6 (a), 6 (b), and 12 (c), and Rules U-42 and U-44 promulgated thereunder by Central Indiana Gas Company ("Central Indiana"), an Indiana corporation and a utility subsidiary of Consolidated Electric and Gas Company ("Consolidated"), a registered holding company. All interested persons are referred to the said document, which is on file in the office of this Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

Central Indiana has outstanding 40,000 shares of common stock ($100 par value), all of which is owned by Consolidated, and $3,551,000 principal amount of First Mortgage Bonds 4% Sinking Fund Series, due 1962, all of which are owned by five insurance companies. Said First Mortgage Bonds in the principal amount of $3,750,000 were sold on November 30, 1942, and were issued under an Indenture of Mortgage and Deed of Trust dated as of September 1, 1942 between Central Indiana and City National Bank and Trust Company, Trustee. There have been retired to date $199,000 principal amount of said bonds.

Central Indiana proposes to purchase and retire $301,000 principal amount of its outstanding first mortgage bonds and to change the indenture securing its remaining bonds to be outstanding, effective September 1, 1944. The $301,000 principal amount of bonds are to be purchased at 102% of the principal plus accrued interest from March 1, 1944 to September 1, 1944 and will be deemed funded. Central Indiana and the Trustee will enter into a supplemental indenture effective September 1, 1944, which will embody a number of changes, principally for the reduction in the annual interest rate on such bonds from 4% to 3¾% and changes on the optional redemption prices and the sinking fund requirements for the retirement of the bonds to remain outstanding.

Central Indiana and the holders of the presently outstanding bonds will enter into an agreement relating to the execution and delivery of the proposed supplemental indenture providing, in substance, for the consent of such holders to the action contemplated by the agreement, and for the cancellation and retirement of the $301,000 principal amount of First Mortgage Bonds to be purchased by Central Indiana.

The proposed transactions, according to the filing, will be expressly authorized by the Public Service Commission of Indiana.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters and that said applications and declarations shall not be granted except pursuant to further order of this Commission;

It is ordered, That a hearing on said matters under the applicable provisions of said act and rules of the Commission thereunder be held on July 25, 1944, at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room in which the hearing will be held.

It is further ordered, That any person desiring to be heard or otherwise wishing to participate in the proceedings, shall file with the Secretary of the Commission on or before July 21, 1944, his application therefor, as provided by Rule XVII of the rules of practice of the Commission.

It is further ordered, That Charles S. Lobingier or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The office so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That the Secretary of the Commission shall serve notice of the aforesaid hearing by mailing a copy of this order to Central Indiana Gas Company, Consolidated Electric and Gas Company, City National Bank and Trust Company of Chicago, Ill., and the Public Service Commission of Indiana by registered mail; and that notice of said hearing be given to all other persons by publication of this order in the FEDERAL REGISTER.

It is further ordered, That, without limiting the scope of the issues presented by said applications and declarations, particular attention shall be directed at said hearing to the following matters and questions:

(1) Whether the proposed purchase by Central Indiana of $301,000 principal amount of its presently outstanding First Mortgage Bonds at 102% of the principal plus accrued interest from March 1, 1944 to September 1, 1944; and the proposed changes in the indenture of Mortgage and Deed of Trust dated as of September 1, 1942, between Central Indiana and City National Bank and Trust Company of Chicago, Trustee and the agreement between the company and the holders of said bonds meet the applicable requirements of the act and the rules and regulations of this Commission promulgated thereunder;

(2) Whether, if the proposed transactions are authorized, it is necessary or appropriate that terms or conditions be imposed in the public interest or for the protection of investors or consumers in connection with such authorization;

(3) Generally, whether, in any respect, the proposed transactions are detrimental to the public interest or to the interest of investors or consumers or will tend to circumvent any provisions of the Act or of any rules, regulations, or orders of this Commission promulgated thereunder.

By the Commission.

STATEMENT OF POLICIES TO BE FOLLOWED BY GOVERNMENT AGENCIES

Paragraph (b) (3) of Part V (Usable Property) of the Statement of Policies dated April 21, 1944 (9 F.R. 4559) is hereby amended to read as follows:

(3) Sales of property which cannot be sold within a reasonable period of time on the terms stated in paragraph (b) (2) above should be made:

(a) To a buyer who will consume the property in the United States for manufacturing or maintenance or repair purposes and who will agree that, if he does not so consume it, he will not resell it at a profit, at the best price obtainable;

This policy shall prevail until the Surplus War Property Administration by specific direction establishes such other sales procedures or policies (which may include a determination not to sell) with respect to specific items, such as standard consumer articles, as in its judgment are required in order to maintain orderly markets.

Chapter VI—Solid Fuels Administration for War

PART 602—GENERAL ORDERS AND DIRECTIVES

[SFWA Reg. 21, Amdt. 1 to Local Adjustment 1 [2]]

ESTABLISHMENT OF DISTRIBUTION AREA

The Area Advisory Committee on Local Distribution for Area V in the State of Ohio has recommended that Hamilton County be separated from Area V and joined with the counties of Boone, Kenton and Campbell in the State of Kentucky to form a new local distribution area. The Area Distribution Manager has concurred in this recommendation, and the recommended local distribution area has been formed as Ohio-Kentucky Area I. The Committee has recommended, and it seems to be necessary, that the filing of consumer declarations by consumers in Hamilton County be deferred until the retail dealers in the new area are able to formulate plans for distribution of their coal. Accordingly, the last sentence in Local Adjustment No. 1 issued pursuant to Solid Fuels Administration for War Regulation No. 21 is amended to read as follows: "This local adjustment shall become effective June 15, 1944, in all counties in Area V except Hamilton County. This local adjustment shall not become effective in Hamilton County until August 15, 1944."

Issued this 12th day of July 1944.

Chapter IX—War Production Board

Subchapter B—Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–578]

T. E. SCHNEIDERS' CORP.

T. E. Schneiders' Corporation of South Norwalk, Connecticut, is engaged in the business of manufacturing surgical instruments. During November and December 1943, respondent filled unrated orders totaling $17,544 for surgical instruments in preference to rated defense orders in violation of Priorities Regulation No. 1. During the third calendar quarter of 1943, the corporation received substantial allotments of certain controlled materials, and although its requirements for such materials decreased during the quarter, it failed to cancel or reduce its allotments, in violation of CMP Regulation 1. During the same quarter it ordered and received material in excess of its allowance of maintenance, repair and operating supplies in the amount of $1,445. in violation of CMP Regulation 5. In addition, on or about April 19, 1944, the respondent placed an order for 52,000 pounds of carbon steel, certifying that it was required for maintenance, repair or operating supplies, when in fact such steel was used for production, in violation of CMP Regulation 5. The corporation was familiar with the provisions of Priorities Regulation No. 1 and its violations of that regulation were wilful. The corporation's violations of CMP Regulation No. 1 and CMP Regulation No. 5 resulted from gross negligence.

These violations have hampered and impeded the war effort of the United States by diverting critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.578 *Suspension Order No. S–578.* (a) T. E. Schneiders' Corporation, its successors and assigns, shall not produce any surgical instruments except to fill orders rated AA–3 or higher, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve T. E. Schneiders' Corporation, its successors and assigns, from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on July 12, 1944, and shall expire on November 12, 1944.

Issued this 5th day of July 1944.

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[Conservation Order M–28, as Amended July 12, 1944]

DICHLORODIFLUOROMETHANE

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of dichlorodifluoromethane for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.27 *Conservation Order M–28.* (a) *Definitions.* For the purpose of this order:

(1) "F–12 gas" means dichlorodifluoromethane (sometimes called "freon-12").

(2) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency or any organized group of persons whether incorporated or not.

(3) "Producer" means any person engaged in the production of F–12 gas.

(4) "Supplier" means any person to the extent that he is engaged in the business of distributing F–12 gas to persons using the same for installation in refrigerating or air conditioning systems. The term shall include an equipment manufacturer to the extent that he engages in the sale of F–12 gas which has not been installed in such systems. "System" means any "system" as defined in General Limitation Order L–38.

(5) "Equipment manufacturer" means any person to the extent that he uses F–12 gas for charging new refrigerating or air conditioning systems or parts of systems manufactured by him. It does not include affiliates, subsidiaries, branches, divisions or sections or an enterprise, if not actually engaged in the manufacture of systems or refrigerant containing parts of systems.

(6) "Insecticide manufacturer" means any person to the extent that he uses F–12 gas in the production of insecticide.

(7) "User" means any person who installs F–12 gas in a refrigerating or air-conditioning system, other than an equipment manufacturer. It includes

suppliers, service agencies, owners or lessees, to the extent that they engage in installing F–12 gas in any system.

(8) "Contract agent" means any person to whom or for whose account F–12 gas is delivered by a producer for distribution to suppliers.

(If the same person, or two or more branches, divisions or sections of the same enterprise, acts in two or more capacities as contract agent, supplier, equipment manufacturer, or insecticide manufacturer, the particular provisions of this order which apply to the respective activities must be followed, to the extent to which the various provisions are applicable to each activity.)

(b) *Systems for which no deliveries are permitted.* (1) No person (including users, dealers, and other suppliers, and producers) shall deliver, or accept delivery of, any F–12 gas for use in, or for resale for use in any new or used system which is of a type referred to in List A. Exceptions from this restriction may be authorized in the following cases (although this does not preclude appeals under paragraph (f) (4) in other cases):

(i) When the major portion of the space to be air conditioned is used as a radio broadcasting studio, auditorium, hotel, restaurant, cafeteria, school, office or office building, or department store, and one of the following conditions exists: The building is "windowless" or one in which the windows cannot be opened for ventilation (such as glass brick, or glass set in a fixed frame which was built into the surrounding wall in an immovable way); or the rooms needing air conditioning are interior ones having no other means of adequate ventilation and are either served by a separate system or constitute a major portion of the space regularly occupied by persons and are served by one central system; or

(ii) When the system is used to air condition a room or rooms in a single family residence or a single apartment and its continued operation is essential to protect the life or restore the health of a person suffering from a serious ailment or disease and under care of a licensed physician, and a statement to that effect by such physician is also furnished with the application referred to below.

Application for WPB permission to get F–12 gas for such a use should be made by the owner or operator of the system by letter in duplicate (or in an emergency, by wire confirmed immediately by letter) to War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. M–28 giving the address and a description of the building(s) in which the system is located and stating the extent to which the system comes within either of the cases described above, the quantity of F–12 gas needed, and the name and address of the probable supplier. The authorization, if granted, will be sent to the applicant, who should show it to his supplier when requesting delivery.

(2) During the period from November 12, 1943, through August 31, 1944, no person (including users, dealers, and other suppliers, and producers), shall deliver, or accept delivery of, any F–12 gas for use in, or for resale for use in any new or used system of any type (not in List A) unless the system must be operated under one or more of the following conditions:

(i) Where an air-cooled condenser is used and the ambient temperature is 110° F or higher; or

(ii) Where the saturated refrigerant temperature corresponding to the suction pressure is less than minus 10° F; or

(iii) Where aluminum or magnesium alloys or rubber (except synthetic rubber) have been used in construction of the system and come in contact with the refrigerant, and are not easily replaceable; or

(iv) Where the system is for use aboard ship, or outside of the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration; or

(v) Where the total operating charge required to operate the system is ten (10) pounds or less of F–12 gas and the system was in operation on November 12, 1943, and is used for food preservation or for storage of penicillin, blood serum, blood for plasma, blood plasma, biologicals and bacteriologicals; or

(vi) Where the use of no Group 2 or Group 3 refrigerants, as defined in the American Standard Safety Code for Mechanical Refrigeration, ASRE Circular No. 15, ASA–B9–1939, as approved by the American Standards Association April 20, 1939, is permitted by that Code; or

(vii) Where the system is used in a sealed railroad car or sealed bus.

(The above restrictions apply not only to systems used for ordinary civilian purposes, but also to those owned, operated, or used within the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration, including post exchanges and ships service stores, other than those used aboard ships.)

(3) Attention is called to paragraph (c) (2), which prohibits a supplier from delivering F–12 gas except on certified orders.

(c) *Deliveries by suppliers.* (1) No supplier or any other person (except a producer) shall deliver any F–12 gas for export outside of the continental United States, or for use by any of the following non-retail users (or to any ship yard or other person for use in a system to be delivered to any of them), namely: The Army, Navy, Maritime Commission, War Shipping Administration, post exchanges, ships service departments and activities, equipment and insecticide manufacturers, for new or used systems, or for use in insecticide, without specific authorization from the War Production Board. Subject to the foregoing restriction, any supplier or any other person (except a producer) may deliver F–12 gas to any other person, for use in any new or used system not referred to on List A of this order, if it must be operated under one or more of the conditions stated in (b) (2) (i) to (b) (2) (vii) both inclusive.

No person shall accept from a supplier or other person any delivery of F–12 gas which is prohibited by the restriction in this order.

(2) Whenever the owner of a system or any other user wishes to obtain F–12 gas for installation in a system or systems for which deliveries by suppliers are permitted under this order, he may place his order with any supplier for the minimum quantity, which the available cylinder or cylinders permit, necessary to bring the charge in the system or systems up to a normal operating charge. He must certify his order, or the vendor's delivery receipt, by a certificate endorsed on or attached to it, showing that the F–12 gas is to be used for such purposes only, and that he is not holding any empty cylinders not owned by him, which shall be in substantially the following form:

> The undersigned purchaser certifies to the seller and the War Production Board that he does not have any F–12 gas cylinders not owned by him, which have been empty for more than 15 days; and that the F–12 gas covered by this order will not be used or resold for any purposes not permitted by Order M–28.

Such certificate, which must be signed by the purchaser or his authorized official, will constitute a representation that what is stated in it is true. A supplier must not deliver any F–12 gas except under certified orders; and he must not make delivery under any order which is certified if he knows, or has any reason to believe that the certificate furnished with such order is untrue, incomplete, or inaccurate. In such a case the supplier must reject the order, and should explain why he is doing so, so that the prospective purchaser can comply with this order. Each supplier must keep all accepted orders and certificates which he receives, for a period of two years, for inspection by the War Production Board. (Certificates in the form required by this order before its amendment on November 12, 1943, may continue to be used for 30 days after that date, in place of the above form.)

This restriction shall not prevent a person who services several systems for which deliveries are permitted by this order from purchasing a cylinder of F–12 gas from a supplier, if the amount purchased is the smallest quantity practicable considering the sizes of the standard commercial cylinders and the amount needed in his current operations.

(3) No "standby charge" or any other quantity of F–12 gas, over and above that needed to bring the total charge in a system or systems up to the normal operating charge, shall be delivered to or accepted by any person for use in a system which he owns, leases, or operates (except the Army, Navy, Maritime Commission or War Shipping Administration): except, however, that a "standby charge" may be maintained for a system which is operated primarily for one of the following purposes: air conditioning or refrigeration for the production and storage of penicillin, or blood serum; or refrigeration for the storage of blood for plasma, or the production or storage of blood plasma.

(d) *Deliveries by producers.* Each producer shall hold his entire inventory of F–12 gas, together with all additional quantities produced or otherwise obtained by him from time to time, for delivery under such orders and for such uses as may be authorized or directed from time to time by the War Production Board. No deliveries of F–12 gas shall be made by a producer except pursuant to specific authorizations or directions heretofore or hereafter issued by the War Production Board.

(e) The provisions of this order shall be followed by every producer, contract agent, supplier, user, equipment manufacturer, insecticide manufacturer, and any other person buying, selling or delivering F–12 gas, without any regard to any preference ratings which have been assigned or which may hereafter be assigned to particular contracts or orders.

(f) *Miscellaneous provisions.*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as issued and amended from time to time.

(2) *Reports.*[1] (i) Each equipment manufacturer who wishes to secure delivery of F–12 gas during any month for charging systems or parts produced by him, or for factory repair and charging of sealed or hermetic condensing units, shall file with the War Production Board, on or before the 15th day of the preceding month a report on Form WPB–3326, prepared in accordance with the instructions for such form.

(ii) Any person wishing to secure F–12 gas during any month for ultimate uses (such as testing coaxial cable for leaks) other than the charging of new or used refrigeration or air conditioning systems or parts or use in insecticide, shall file with the War Production Board, on or before the 20th day of the preceding month, a report by letter, in triplicate, showing the minimum amount required for the month, the purpose for which required, and the amount used during the preceding calendar month for that purpose.

(3) *Violations.* Any person who willfully violates any provisions of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control, and may be deprived of priorities assistance.

(4) *Appeals.* Any appeal from the provisions of this order, or any direction thereunder, shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(5) *Communications.* All reports to be filed and other communications concerning this order should be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. M–28.

[1] The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 12th day of July 1944.

Recording Secretary.

INTERPRETATION 1

[Interpretation 1 revoked November 12, 1943]

INTERPRETATION 2

(a) *Quantities which may be obtained by system owner.* Subparagraphs (c) (2) permits the owner (or lessee) of a refrigerating or air conditioning system (not on List A) who does his own installation of F–12 gas, to place his order for the minimum quantity "which the available cylinder or cylinders permit", necessary to bring the charge in his system up to a normal operating charge.

The standard commercial cylinders are generally available in sizes which contain four pounds, ten pounds, twenty-five pounds, and one hundred forty-five pounds of the gas, and a particular supplier may not have all four sizes in stock at all times. Questions will therefore arise as to the number and sizes of cylinders which the owner of a system is permitted to obtain, if the particular supplier with whom his purchase order is first placed should not happen to have the sizes of cylinder from which the minimum quantity needed by the system can be furnished the owner.

In such a case, the owner of the system should make a reasonable effort to obtain the minimum quantity which he needs, from some other supplier in his locality, rather than purchase an excessive quantity from the first supplier upon whom he calls. While the order does not prescribe rigid rules as to exactly what effort the purchaser should make in every case, it is required that he do whatever is practicable, under his particular conditions, to obtain the minimum quantity which he needs, and no more.

Where he is located in a large community in which there are a number of suppliers, he should contact several, if necessary in order to obtain the quantity needed. If he happens to be located in a small community where there is only one supplier who cannot furnish the exact quantity needed and the F–12 gas must be obtained immediately in order to avoid spoilage of a substantial quantity of food, the restriction would not prevent him from obtaining a larger amount, if that is unavoidable without letting his food spoil.

As a guide to the number and size of cylinders which should normally be obtained, for the different quantities of F–12 gas which may be needed in different cases, the following table is furnished:

Pounds of F–12 gas required	Amounts which should be ordered			
	Number of cylinders			
	4 pounds	10 pounds	25 pounds	145 pounds
0–4	1			
5–9		1		
10–14	1	1		
15–24		2 or	1	
25–29	1		1	
30–39	1	1	1	
40–49	1	2	1	
50–59		1	2	
60–69		2	2	
70–79	1		3	
80–89	1	1	3	
90–110		1	4	
111–145				1
146–170			1	1
171–195			2	1
196–220			3	1
221–245			4	1
246–290				2
291–315			1	2
316–340			2	2
341–365			3	2
366–390			4	2
391–435				3

The above interpretation applies only where the system owner buys his F–12 gas from a supplier, and installs it himself. If he has a service shop install the gas, the shop will always be able to furnish no more than the amount actually needed, from its service cylinders, and there will be no problem.

(b) *Installation of F–12 gas in systems or parts held by equipment manufacturers or dealers.* Paragraph (b) (1) prohibits deliveries of F–12 gas for systems on List A; (b) (2) prohibits deliveries for any other system, unless it must be operated under one or more of the conditions specified. These restrictions are intended to prevent deliveries of F–12 gas where there is a sale or other delivery of the gas. They prevent an equipment manufacturer or other person from delivering F–12 gas in any new or used system or refrigerant-containing parts if charged with F–12 gas furnished by him after the effective date of the applicable restriction, for any prohibited use.

These restrictions do not prevent the withdrawal and reinstallation of F–12 gas in the

course of repairing a used system or refrigerant-containing part, where no additional F–12 gas is added to what was already in the system or part.

Neither do they restrict the delivery of new or used systems or refrigerant-containing parts which had already been charged at the time the applicable restriction became effective; nor do they prevent the owner or lessee of any installed system who had F–12 gas in his possession on the effective date of the applicable restriction, from charging the system with such gas, or having someone else do this charging for him, where no transfer of possession or ownership is involved. (Issued November 30, 1943.)

PART 3270—CONTAINERS

[Conservation Order M–290, as Amended July 13, 1944]

CONTAINERBOARD

§ 3270.1 *Conservation Order M–290*—(a) *Definitions.* For the purpose of this order:

(1) "Mill operator" means any person who operates a congregation of pulp preparation, roll and sheet finishing equipment, paper machines and subsidiary facilities located and operated together as a single producing unit for the production of containerboard.

(2) "Containerboard" means the types and grades of paperboard classified under caption No. 211000 through 219000 in Form WPB–514, as currently revised. It shall also mean corrugated or solid fibre sheets of the kind used by "sheet plants" and "cleated-box manufacturers" in making containers or any other product. The term shall not include any item which is defined in Order P–146 as a "fibre shipping container"—such as a solid fibre (.045 or heavier) or corrugated fibre sheet or roll to be used for wrapping, packaging or otherwise protecting a product or material for shipment.

(3) "Container manufacturer" means any person (including any sheet plant operator, fibre-drum manufacturer, and any cleated-box manufacturer) who manufactures shipping containers or parts therefor, made wholly or in part from any type of containerboard.

(4) "Sheet-plant" means any container-manufacturing plant which does not have either corrugating or pasting equipment.

(5) "Cleated-box manufacturer" means any manufacturer of shipping containers made of corrugated or solid fibre sheets attached to wooden cleats.

(6) "Sheet supplier" means any container-manufacturer who supplies corrugated or solid fibre sheets to sheet-plants, whether owned by him or not.

Restrictions on Delivery and Receipt of Containerboard

(b) *Restrictions on acceptance of delivery.* On and after April 1, 1944, no person shall accept delivery of containerboard except as authorized by the War Production Board in writing.

(c) *Sheet plants and cleated box manufacturers.* Sheet plants and cleated box manufacturers who have been authorized to accept delivery of containerboard may place orders for corrugated or solid fibre sheets with sheet suppliers. If the orders have been properly certified as provided in the next paragraph the supplier may obtain the amount of containerboard which he will use to fill the orders in addition to that which the War Production Board has permitted him to receive by authorization issued directly to him. In certifying his orders for this additional containerboard the supplier shall give his customer's authorization number and date.

(d) *Delivery restrictions.* On and after April 1, 1944, no person shall deliver containerboard except on an order accompanied by a certificate, manually signed by the purchaser or an authorized official of the purchaser, in substantially the following form:

> Authorized under Order M–290. Date of authorization ———, authorization number ———.

This certificate shall constitute a representation to the War Production Board (subject to the penalties of section 35A of the United States Criminal Code) that the purchaser is authorized under this and other applicable War Production Board regulations and orders to place the delivery order and to receive the item(s) ordered for the purpose for which ordered. The standard certification of Priorities Regulation 7 must not be used instead of the certification described in this paragraph (d).

Authorizations

(e) *V-board.* Normally authorizations to accept delivery of containerboard for use in the manufacture of V-boxes will be on a monthly basis and will be issued separately on Form WPB–2492, Supplement No. 1, immediately prior to the month in which such containerboard is to be received. However, they may be issued at any other time and in any other manner (as by telegram or letter).

(f) *Containerboard other than V-board.* Authorizations to accept delivery of containerboard other than that described in paragraph (e) above will be either:

(i) *"Basic authorizations"* which will permit the acceptance of a specific amount of containerboard;

(ii) *"Incentive authorizations"* which will permit the acceptance of an indefinite amount of containerboard during a particular quarter. These incentive authorizations will be identified by the inclusion of the letter "X" in the authorization number. They will be issued to consumers of containerboard whose rating patterns as reported to the War Production Board on Form WPB–3077 are above average.

Both basic and incentive authorizations will generally be issued on Form WPB–2492 on a quarterly basis prior to the beginning of the pertinent quarter. They may, however, be issued at any other time and in any other manner, such as by telegram or letter.

(g) *Specifications of suppliers and delivery date; cancellation or amendment of authorizations.* (1) The authorizations described in paragraphs (e) and (f) above may specify the supplier with whom all or part of the authorized orders may be placed and the date as of which said orders are to be delivered.

(2) The War Production Board may cancel or amend any authorization for the purchase of containerboard at any time prior to its complete fulfillment.

(h) *Acceptance of authorized orders.* No person shall fill any order certified as carrying an incentive authorization in any calendar quarter during which he has not previously shipped on "V-board", "basic authorization" and "small delivery" (see paragraphs (i) and (j)) orders, a tonnage of containerboard equal to at least ninety-five percent of his "proposed machine production" of containerboard for that quarter, as reported in Column A of Form WPB–2973. "V-board" and "basic authorization" orders will be identifiable by the fact that they will not have the letter "X" in the authorization number which must be set forth in the certificate provided by paragraph (d). "Small delivery" orders will be identifiable by the special certificate provided in paragraph (i).

NOTE: Paragraphs (i) through (m), formerly (b) through (j), redesignated July 13, 1944.

Exceptions for Small Deliveries

(i) *Purchasers.* A person who accepts delivery of less than 2½ tons of containerboard from all sources in any calendar quarter shall not be required to obtain the written authorization of the War Production Board to get containerboard in that quarter. However, when he buys in lots of more than fifty pounds he must accompany his order with a certificate in the following form:

> The undersigned certifies that the amount of containerboard delivered to him and ordered for delivery to him during the calendar quarter in which delivery of this order is to be made (including the amount specified in this delivery order), does not exceed 2½ tons.

Any person may accept delivery of containerboard in lots of less than fifty pounds without the authorization of the War Production Board and without filing the foregoing certificate.

(j) *Suppliers.* Any supplier of containerboard may deliver it to a person purchasing in accordance with the preceding paragraph (i) regardless of the provisions of paragraph (d) of this order.

Directions

(k) *Directions.* The War Production Board may, from time to time, issue directions of the following kinds:

(1) *Mill production.* Directions requiring that all or any part of any mill operator's containerboard production during any period shall be in specified types and grades. Such directions will not be inconsistent with Order M–93 or actions taken under that order.

(2) *Mill shipment.* Directions requiring that all or any part of any mill operator's containerboard production shall be shipped (in such quantities, types, and grades as may be specified) to specified persons and at specified times, whether or not the containerboard is produced for other persons.

(3) *Sheet-supplier shipments.* Directions requiring that all or any part of any sheet-supplier's supply of containerboard sheets shall be shipped in such quantities, types, and grades as may be specified, to specified sheet-plants or cleated-box manufacturers.

(4) *Observance of directions.* Directions issued pursuant to this paragraph (k) shall, to the extent stated therein, take precedence over other deliveries of containerboard. The War Production Board may (with or without conditions) rescind or modify any directions issued pursuant to this paragraph (k) in any case in which it decides that there are special circumstances which would cause fulfillment of the direction to be impractical: In order to receive consideration, such special circumstances must be presented by telegram or letter to the War Production Board within seventy-two hours after they have arisen. If the War Production Board shall, after receipt of such facts, not give its written approval to an application for rescission or modification of a direction, the direction shall be fulfilled in accordance with its original terms.

Unless the War Production Board specifically permits him to do so, in writing, no mill operator or other supplier shall require customers to deliver waste in return for containerboard shipped on any authorized order.

Restrictions on Use of Authorized Containerboard

(l) *Use of authorized or directed containerboard.* Authorizations or directions issued under paragraphs (e), (f), or (k) may specify the use to which all or any part of the authorized or directed containerboard may be put. In such cases, no person shall use any such containerboard except for the purpose specified. This prohibition does not, however, prevent the substitute use of any equivalent amount of containerboard of suitable grades.

(m) *Production directions.* The War Production Board may, from time to time, direct any person to fill any designated order or class of orders involving the use of containerboard and to use in filling that order, any allocated or unallocated containerboard available to him.

(n) *Limitations on production of fabricated containerboard products.* No consumer of containerboard shall put into process, during any calendar month, more than the following amount of containerboard:

(1) 36⅔ per cent of his basic authorization (see paragraph (f) (i)) of containerboard for the quarter in which the month in question falls, plus

(2) The amount of containerboard which was in his inventory on the first day of that month.

Within these limitations, consumers of containerboard must accept and fill orders for fabricated products in accordance with Priorities Regulation No. 1.

Ratings

NOTE: Paragraph (o), formerly (k), redesignated July 13, 1944.

(o) *Prohibition against use of ratings.* No person shall use any rating to get containerboard and no person selling containerboard shall require a rating as a condition of sale. Any rating purporting to be applied or extended to containerboard shall be void and no person shall give any effect to it in filling an order.

Inventory Restrictions

(p) *Inventories.* No person shall knowingly deliver to any person, and no person shall accept delivery of any quantity of containerboard if the total inventory in the hands of the person accepting delivery is, or by virtue of acceptance will become, either (1) in excess of two carloads, or (2) in excess of his reasonably anticipated requirements for the next thirty days, whichever is greater.

(q) *Amounts of containerboard which may be ordered.* No person may place orders for more containerboard than he has been authorized to receive under this order, regardless of whether or not he intends to cancel or reduce some of his orders before they are delivered.

In addition, authorized purchase orders must specify delivery at a time when a person reasonably anticipates that he will be entitled to receive the amount of containerboard he has ordered within the inventory limitations of Priorities Regulation No. 1 or of paragraph (p) of this order, whichever is the more restrictive.

Applications and Reports

NOTE: Paragraph (r), formerly (l), redesignated July 13, 1944.

(r) *Applications for permission to receive containerboard.* Each person requiring authorization to accept delivery of containerboard during any calendar quarter shall file application on Form WPB–2492 in the manner and at the time stated in the instructions on that Form.

(s) *Reports required from all container manufacturers.* Each container manufacturer who requires authorization for the acceptance of containerboard (i. e. all those who are not exempt from this requirement under paragraph (i)) shall report to the War Production Board on Form WPB–3077 in accordance with the instructions appearing on that form.

(t) *Reports by manufacturers of V-boxes.* In addition to the reports required by paragraphs (r) and (s), above each manufacturer of V-boxes shall, on or before the 10th day of each month, report to the War Production Board on Form WPB–2492–Supplement No. 1, in accordance with the instructions on that form.

NOTE: Paragraphs (u) through (z), formerly (n) through (s), redesignated July 13, 1944.

(u) *Budget approval.* The reporting requirements set forth in paragraphs (r), (s) and (t) of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(v) *Other reports.* All persons affected by this order shall execute and file with the War Production Board, such other reports and questionnaires as said Board shall from time to time request subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Miscellaneous

(w) *Multiple function organizations.* Where any person (including any parent subsidiary organization) engages in two or more of the types of operations subject to this order (for instance, if he is both a producer or supplier and a converter of containerboard), the provisions of this order applicable to each type of function shall apply separately to his operations of that type. For example, a container-manufacturer may not receive containerboard from his own mill without an authorization; or part or all of that mill's production may be made the subject of a direction under paragraph (k).

(x) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(y) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable War Production Board regulations, as amended from time to time.

(z) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Paperboard Division, Washington 25, D. C., Ref.: M–290.

Issued this 13th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

INTERPRETATION 1

Paragraph (b) of Order M–290 provides that no person shall accept delivery of con-

tainerboard except as authorized by the War Production Board in writing. This prohibition is not only applicable to container manufacturers, sheet plants, cleated box manufacturers, etc., but covers any person who requires the materials defined as containerboard by paragraph (a) (2) for any purpose. For instance, manufacturers of insulation, cedar closets, filing cabinets, and all other users of containerboard are barred from accepting delivery of this material without authorization. Pursuant to paragraph (d) a person who delivers containerboard to any person (not alone container manufacturers) except on an order certified as provided in that paragraph is in violation of Order M-290.

The material defined as containerboard in paragraph (a) (2) is any grade of paperboard classified under caption No. 211,000 through 219,000 in Form WPB-514 and any corrugated or solid fibre sheets of the kind used by sheet plants and cleated box manufacturers in making containers or any other product. If the sheets are of a kind used by sheet plants or cleated box manufacturers, they are covered by the order and cannot be acquired without authorization, regardless of whether they are to be used for the fabrication of containers or not.

Cases falling within the "small deliveries" exceptions provided by paragraphs (i) and (j) of the order are an exception to this rule. In addition, attention is called to the fact that items which fall within the definition of "fibre shipping containers" in Order P-146 are excluded from the definition of "containerboard" in Order M-290. (Issued Apr. 12, 1944.)

PART 3296—SAFETY AND TECHNICAL EQUIPMENT

[General Limitation Order L-39, as Amended July 13, 1944]

FIRE PROTECTIVE, SIGNAL AND ALARM EQUIPMENT

The fulfillment of requirements for the defense of the United States has created shortages in the supplies of materials entering into the production of fire protective, signal and alarm equipment, for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3296.1 *General Limitation Order L-39*—(a) *Definitions.* For the purpose of this order:

(1) "Fire protective equipment" means: sprinkler systems, couplings, playpipes and allied fittings, fire hose, fire hydrants, fire pumps, hose dryers, hose racks, indicator posts, lightning protection systems, piped extinguishing systems, portable fire extinguishers including back pack types, foam generators, stirrup pumps, water spray nozzles, and all other fire protective equipment for preventing or extinguishing fires, excepting self-propelled motorized fire apparatus and auxiliary units including trailer, skid, front mounted and portable apparatus.

(2) "Signal and alarm equipment" means the following types of equipment:

(i) All types of signal or alarm systems or equipment designed for protective purposes, such as: fire, police and burglar alarm systems, watchmen's time recording systems, intrusion systems, and boundary protection systems, whether such systems are central station, proprietary, auxiliary or local; recording locks; and portable watch clocks.

(ii) All types of paging and call systems (other than intercommunicating systems), such as doctor and nurse call systems and factory paging systems.

The term does not include air raid warning devices.

(3) "Dry-pendant sprinkler head" means a sprinkler head for use in a pendant position on a dry pipe system and permanently attached to an extension nipple so as to exclude water from the nipple.

(4) "Incendiary bomb control equipment" means any pump, device, instrument, or material designed for the removal, control or extinguishment of incendiary bombs.

(5) "Stirrup pump" means a manually operated pump used to draw water or other liquid from a separate container to extinguish or control fires.

(6) "Air raid warning device" means any siren, whistle, horn, diaphone, signal or device used or intended for use to warn or signal civilians in connection with air raids or other war hazards.

(7) "Copper base alloy" means any alloy in the composition of which the weight of copper equals or exceeds 40 percent of the weight of all metal in the alloy.

(b) *General restrictions*—(1) *Restrictions on use of scarce materials.* Except as provided in paragraph (c) of this order, no person shall incorporate in any fire protective, signal or alarm equipment, air raid warning device, or parts thereof, any aluminum, bismuth, cadmium, chromium, copper, monel metal, nickel, tin, or alloy of any such metals, asbestos, rubber or synthetic rubber, except to the extent permitted in Appendix A hereof.

(2) [Deleted July 13, 1944]

(3) *Restrictions on foam extinguishers.* No person shall purchase or accept delivery of any foam extinguisher except for use in the protection of inflammable liquids, and no person shall sell or deliver any foam extinguisher which he knows or has reason to believe will be used in violation of this paragraph (b) (3).

(4) *Restrictions on manufacture of alkali metal (loaded stream) extinguishers.* No person shall in any quarter complete the manufacture of any type of alkali metal salt solution (loaded stream) extinguishers in excess of 25 percent of the total of such type (irrespective of size) manufactured by such person during the twelve month period ending November 30, 1941, except to fill purchase orders or contracts from any agency or government listed in subdivisions (i), (ii), and (iii) of this paragraph (b) (4). In determining the number of extinguishers manufactured during said twelve month base period ending November 30, 1941, extinguishers manufactured to fill contracts or purchase orders from, or for delivery to any of the following shall be excluded:

(i) The Army or Navy of the United States, United States Maritime Commission, War Shipping Administration, Panama Canal, Coast and Geodetic Survey, Coast Guard, Civil Aeronautics Authority, National Advisory Committee for Aeronautics, the Office of Scientific Research and Development;

(ii) The Government of any of the following countries: the United Kingdom, Canada, and other dominions, Crown Colonies and protectorates of the British Empire, Belgium, China, Greece, the Kingdom of the Netherlands, Norway, Poland, Russia, and Yugoslavia;

(iii) Any agency of the United States Government for delivery to or for the account of any country listed above or any other country pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(5) *Restrictions on manufacture of stirrup pumps.* No person shall manufacture any stirrup pump, or part thereof, except to fill purchase orders from the Army or Navy of the United States, the United States Maritime Commission, War Shipping Administration, Defense Supplies Corporation, or from any agency of the United States Government for delivery to or for the account of the government of any country pursuant to the Act of March 11, 1941, entitled, "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(6) *Restriction on manufacture of soda-acid fire extinguishers.* No person shall manufacture any soda-acid fire extinguisher.

(7) *Restrictions on sale and delivery of signal and alarm equipment and air raid warning devices.* (i) No person shall sell, deliver or install any signal and alarm equipment costing $200 or more or any air raid warning device costing $25 or more except to fill the following kinds of orders:

(a) Orders from or for the account of the Army or Navy of the United States, the United States Maritime Commission or the War Shipping Administration;

(b) Orders for equipment (signal and alarm equipment and air raid warning devices) the delivery of which has been specifically authorized by the War Production Board on Form WPB-1319. (Any person receiving specific authorization on Form WPB-1319 must notify his supplier by placing on his purchase order the following certification, in addition to the certification in Priorities Regulation 7: "Delivery approved on Form WPB-1319, case no. —, under Order L-39". The supplier may get delivery of the equipment from his supplier to fill the order, if necessary, by placing the same certification on his order.)

(c) Orders for equipment the delivery of which has been specifically authorized on Form GA-1456.[1] (A person receiving an authorization for this equipment on Form GA-1456 must notify his supplier by placing on his purchase order the following certification, in addition to the certification in Priorities Regulation 7: "Delivery approved on Form GA-1456 under Direction 1 to CMP Regulation 6". The supplier may get delivery of the equipment from his supplier to fill the order, if necessary, by placing the same certification on his order.)

Cost is determined under this paragraph by taking the installed cost to the purchaser. If the equipment is leased rather than sold, cost is determined by taking the price which would be charged to the building owner if the equipment were installed and sold outright.

(ii) [Revoked Feb. 16, 1944]

(iii) In conjunction with the granting of specific authorization to receive signal or alarm equipment or air raid warning devices on Form WPB-1319, the War Production Board may also assign preference ratings to the authorized deliveries on such form. Any preference rating so assigned shall be applied and extended only in accordance with the terms of Priorities Regulation 3.

(8) *Restriction on the manufacture of signal or alarm equipment.* Except upon specific authorization by the War Production Board, no person shall manufacture, install, deliver or accept delivery of any smoke, fire, or intrusion detector employing photo-electric principles, except to fill purchase orders from a purchaser listed in paragraph (b) (4) of this order and unless such item is for use on board ship.

(9) *Restrictions on the manufacture of air raid warning devices.* No person shall manufacture, sell, purchase, deliver, install or accept delivery of any air raid warning device which requires for its operation a motor in excess of three (3) horse power.

(10) *Restrictions on sale and delivery of cotton rubber-lined fire hose.* No person shall sell or deliver any new cotton rubber-lined fire hose except to fill the following kinds of orders:

(i) Orders bearing a preference rating of AA-5 or higher;

(ii) Orders which had been placed prior to August 23, 1943, and which bear a preference rating of A-9 or higher; or

(iii) Orders from distributors. (Distributors may sell or deliver only to persons to whom sale or delivery is authorized to be made by this paragraph (b) (10).)

No person shall purchase or accept delivery of any cotton rubber-lined fire hose if he knows or has reason to believe that the sale or delivery of such hose is prohibited by this paragraph.

(11) *Restrictions on manufacture of incendiary bomb control equipment.* Effective thirty days after January 20, 1943, no person shall manufacture any incendiary bomb control equipment, except when and to the extent authorized by the War Production Board pursuant to application on Form PD-740, or to the extent permitted by paragraph (b) (5) of this order.

(c) *Exceptions to paragraph (b) (1).* The restrictions of paragraph (b) (1) shall not apply to:

(1) Brass fire hose couplings, provided that such couplings are delivered to or for the account of:

(i) The Army or Navy of the United States, the United States Maritime Commission or the War Shipping Administration, and are for use on board ship; or

(ii) Any person whose purchase order bears a rating which was assigned for the specific couplings on Form WPB-646 (formerly Form PD-300); or

(iii) The Panama Canal; or

(iv) Any person for use on board ships warranted by the United States Maritime Commission.

(2) Carbon dioxide extinguishers manufactured in accordance with specifications of the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration.

Said representation may be relied upon by the person with whom the purchase order or contract is placed and by his subcontractors and suppliers.

(e) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(f) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(g) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(h) *Correspondence.* Reports to be filed and other communications concerning this order shall be addressed to the War Production Board, Safety and Technical Equipment Division, Washington 25, D. C., Ref.: L-39.

PART 1381—SOFTWOOD LUMBER

[MPR 19A,[2] Amdt. 2]

LOG-RUN SOUTHERN PINE LUMBER

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 19A is amended in the following respect:

A new section 10 is added to read as follows:

SEC. 10. *Permission to sell "special cuttings"*—(a) *Who may apply.* Mills may apply to the Regional Office of the Office of Price Administration, for permission to use the price for "special cuttings", in sales to registered buyers, if the mill is cutting specially for the following items: Railroad material, including bridge and car material for use by railroads or car shops; crossarms or paving block stock.

(b) *Prices.* "Special cutting" prices will be simple, uniform sets of prices, issued by letter, for broad classes of special items, usually with not more than two or three prices in all. They will not be based on the prices or differentials in Second Revised Maximum Price Regulation 19, but rather on a fair relation to the level of regular log-run prices. Unless it can be shown that the effect of separating the special cuttings is that the remainder is a fair log-run quality, an appropriate reduction in the regular log-run price for the remainder will be made.

(c) *Registration of buyers and sellers.* Only registered mills may sell, and only registered buyers may buy, on the special-cuttings price. Registration numbers will be issued by the Regional offices, and the numbers of *both* buyer and seller must appear on the billing. Note that this system does not tie any buyer to any seller, since any seller authorized to use a special cuttings price for a certain item can sell at that price to any buyer authorized to pay that particular price.

(d) *Contents of mill's application.* A mill's application for registration will be considered only if it contains all of the following information:

(1) An exact description, and the estimated percentage of your out-turn, of each of the special cuttings for which you want a separate price. (An inspection of the mill and its timber and special cuttings may be made by an OPA representative.)

(2) How long have you been selling this item at a separate price?

(3) Are you able and willing, as seller of the lumber, to take personal responsibility for the accuracy of your separation of your lumber into these separate items? Who will do the actual separating, and what is his experience in dealing with the special cutting?

(e) *Buyers' registration.* Regional offices may issue buyers' registration numbers on request to buyers who apply to the Regional offices for permission to buy at special cuttings prices. The application should show how long the buyer has been buying the special cuttings and why it is necessary for him to buy on this basis (describing the use to which the special item is to be put).

Wholesalers, concentrators and distribution yards must also be registered as buyers before they may buy at these prices. They must show in their applications that they have regular contracts with registered buyers to fill (giving the names and locations of these buyers), the amount of these cuttings which they furnished to buyers in 1943, and the average amount of these cuttings which they carried in stock in 1943.

(f) *Buyers records.* Every buyer who in any mouth buys any lumber on a special cuttings basis must keep a record for two years of how much lumber he bought during the preceding month from each mill authorized to sell special cuttings, giving the exact footage, by individual mills, of each specially priced item, and of any other lumber bought from the same mills.

(g) *Billing.* A seller using prices for special cuttings must himself prepare and give to the buyer a signed tally giving the footage of each item for which he is authorized to charge a separate price. If this is not done, and if the buyer's and seller's registration number does not appear on the billing, the maximum price goes back to the regular log-run price. The buyer must keep the original of all these billings on file and also the corresponding settlement sheet.

(h) *Cancellation.* Authority to sell or buy at special cuttings prices may be cancelled by letter at any time, if, in the judgment of the Administrator, the lumber is shipped or accepted off-grade enough to indicate either incompetence to grade or intentional up-grading, or if the authority is being used in any other way to evade the ceiling. Authority will also be cancelled for failure to conform to the reporting and billing provisions in paragraphs (f) and (g). Periodic official inspection at the mills and buying plants will be made.

This amendment shall become effective July 18, 1944.

NOTE: All reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 13th day of July 1944.

Administrator.

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.*

Maximum Price Regulation 136, as amended, is amended in the following respects:

1. Section 1390.26a is amended to read as follows:

§ 1390.26a *Reports of additions to stock and offering and selling prices of certain second-hand machines and parts*—(a) *For what machines and parts the reports must be filed.* Inventory and sales reports must be filed for all used machines and parts which are listed in Appendix F of this regulation. However, in the case of some of those machines and parts, these reports need be filed only where the "as is" maximum price for the machine or part exceeds that specified in Appendix F. In addition, these reports must be filed for used parts and subassemblies of the machines and parts listed in Appendix F, where such a used part or subassembly has an "as is" maximum price in excess of $100.00 each.

(b) *Who must file inventory reports.* Inventory reports must be filed by every person engaged in the business of buying and selling any machine or part which is listed in paragraph (a) above. In addition, these reports must be filed by any person who sells any used machine or part listed in paragraph (a) as an exclusive agent for the owner. However, these inventory reports need not be filed either by an auctioneer, or by a person who sells the used machine or part for the owner as other than an exclusive agent. For the purposes of this section, a person is an exclusive agent for the owner when he is the only one whom the owner has authorized to sell the machine or part.

(c) *Who must file sales reports.* Sales reports must be filed by every person engaged in the business of buying and selling used machines or parts. In addition, sales reports must be filed by every person who sells machines or parts as an agent, broker or auctioneer for the owner.

(d) *Method of filing where both an inventory and a sales report is required.* Inventory and sales reports must be filed on Form OPA-2:10:P1 Revised (Form WPB-2574). Copies of this form may be obtained from any War Production Board District Office. Five copies are to be made of the inventory report. Three copies of the inventory report must be filed with the District Office of the War Production Board which is located in the District in which the place of business of the person filing the report is located. These three copies must be filed within five days after the acquisition of the machine or part. Inventory is reported by filling in items 1 to 16, inclusive, of the form. The original of the inventory report must be completed by filling in items 17 and 18 of the form, when the machine or part is sold or otherwise disposed of. The fifth copy must also be completed and retained in the files of the person filing the reports for so long as the Emergency Price Control Act of 1942, as amended, remains in effect. Within five days of the sale or other disposition of the machine or part, the completed original form must be filed with the District Office of the War Production Board which is located in the District in which the seller's place of business is located. This filing constitutes the sales report.

(e) *Method of filing where only a sales report is required.* Where only a sales report is required, two copies must be made of the report. This report must have items 1 to 18, inclusive, of Form OPA-2:10:P1 Revised (Form WPB-2574) filled in. The copy of this report must be retained in the files of the person filing the report for so long as the Emergency Price Control Act of 1942, as amended, shall remain in effect.

(f) *Reports by government agencies.* Inventory and sales reports need not be filed by any federal, state, county or municipal government, or any agency thereof.

(b) Any consumer eligible to get evidences under paragraph (a) may apply to his Board, in person, or by mail, on OPA Form R-315. One application may be made covering more than one consumer, but the name of each shall be listed on the application and must state:

The applicant must also submit with his application the War Ration Book currently used to get sugar for each person for whom application is made.

(c) The Board may issue one or more certificates under the conditions and in the amounts authorized by instructions issued by the "Washington Office". However, no Board shall issue a certificate unless it finds that each consumer included in the application meets the tests set out in paragraph (a) and that he works at an occupation designated in Appendix A of this order.

(d) Any Board which issues evidences under this section shall enter a notation on the front cover of the book submitted with the application showing:

(1) Its address;

(2) The date it issued evidences under this section;

DEPARTMENT OF LABOR.

Wage and Hour Division.

SUGAR BEET PROCESSING INDUSTRY

DETERMINATION AS TO APPLICATION FOR EXEMPTION FROM MINIMUM HOURS PROVISION

In the matter of the application for exemption of the processing of sugar beets into sugar from the maximum hours provisions of the Fair Labor Standards Act of 1938 pursuant to section 7 (b) (3) of the act and Part 526, as amended, of the regulations issued thereunder.

Whereas an application has been filed for a determination that the processing of sugar beets into sugar constitutes an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act of 1938 and Part 526, as amended, of the regulations issued thereunder; and

Whereas it appears from the said application that (1) sugar beets mature and are harvested during a regularly recurring season each year beginning in most beet growing areas about the middle of September and ending before freezing weather sets in; (2) the sugar beets are perishable and can be stored only for a short time after harvesting and must be processed as quickly as possible to prevent deterioration and loss of sugar; (3) sugar beets are processed into sugar during a regularly recurring season each year from about October through January, a period of about 4 months, except in California where the season may be as long as 6 months each year; and (4) sugar beet processing establishments cease production during the remainder of the year except for such work as maintenance, repair, clerical and sales work, because sugar beets are no longer available for processing as a result of natural conditions; and

Whereas, the determination made by the Administrator on August 24, 1940 (5 F.R. 3167) granting an exemption under section 7 (b) (3) of the act for the first processing of perishable or seasonal fresh fruits and vegetables does not apply to all operations performed in processing sugar beets into sugar but is limited to the first processing of sugar beets.

Now, therefore, upon consideration of the facts stated in the application the Administrator hereby determines, pursuant to § 526.5 (b) (ii) of the regulations, that a prima facie case has been shown for the granting of an exemption as an industry of a seasonal nature pursuant to section 7 (b) (3) of the Fair Labor Standards Act of 1938 and Part 526, as amended, of the resulations issued thereunder, to the processing of sugar beets into sugar.

The term "processing of sugar beets into sugar" includes receiving the sugar beets at the factory site or at receiving stations operated by the sugar mill; the loading and transporting of the beets from such receiving stations to the factory; the production of sugar from the beets and the further extraction of sugar from sugar beet molasses by mixing and concurrently processing the molasses with the beet juice directly obtained from the sugar beets; and the following operations when performed on the premises of the sugar beet processing plant during the sugar beet processing season: the powdering, packaging, bagging and storing of the sugar; the storing of wet beet pulp in silos; the compressing and artificial drying of the wet beet pulp; the weighing, sacking and storing of the dried beet pulp; and any operations or services necessary or incident to the foregoing. The term "processing of sugar beets into sugar" does not include the quarrying of lime, the manufacture of bags or other sugar containers, and the manufacture of yeast or citric acid, or any other by-products not specifically included in the definition.

This determination, if and when made final and effective, will supersede the determination made by the Administrator on August 24, 1940 (5 F.R. 3167) granting an exemption under section 7 (b) (3) of the act for the first processing of perishable or seasonal fresh fruits and vegetables insofar as that determination is applicable to the first processing of sugar beets.

If no objection and request for hearing is received within 15 days following the publication of this determination, the Administrator, pursuant to § 526.5 (b) (ii) of the regulations, will make a finding upon the prima facie case. Objections and requests for hearing from any interested person should be submitted in writing to the National Office of the Wage and Hour Division, 165 West 46th Street, New York 19, New York. The application for exemption may be examined in Room 1419-A at this address.

Signed at New York, New York this 10th day of July 1944.

L. METCALFE WALLING,
Administrator.

CIVIL SERVICE COMMISSION.

WAR REEMPLOYMENT LIST

ESTABLISHMENT OF PROCEDURES AND POLICIES

The following procedures and policies supplement and clarify the material contained in § 18.14 of Chapter I, Title 5 (9 F.R. 7242).

The procedures and policies governing the operations of the War Reemployment List will be as follows:

(a) *Establishment of Lists.* War Reemployment Lists will be maintained in the Central Office, in Regional and Branch Regional offices, and in those offices of Representatives and of establishment Boards where open competitive lists are maintained. The establishment of War Reemployment Lists at establishment Boards (Rating Boards and Labor Boards) will not preclude the reappointment of former employees in accordance with § 18.8 of Chapter I, Title 5, or the recall to duty of furloughed employees under applicable regulations of the Commission.

(b) *Entry on list*—(1) *Citizenship.* No person will be entered on the War Reemployment List unless he is a citizen of or owes allegiance to the United States.

(2) *Application form.* Application for entry on the War Reemployment List will be made on Form 2888, Revised, accompanied by completed Form 57 or 60. Form 60 is to be used by persons applying for positions as mechanics, laborers, or manual workers, or as trainees for such positions. Form 57 is to be used by persons applying for all other types of positions.

(3) *Agency endorsement.* Endorsement of the agency on Form 2888, Revised, will be construed as its consent for reappointment of the applicant in the Federal service.

(4) *Entry on more than one list.* Persons may have their names entered on the War Reemployment List of the Central Office and of one or more of the following offices of the Commission: The Regional, the Branch Regional, and the Representative's Office serving the territory in which they are residents (legal or actual) or in which they last served in a Federal agency, and the Local Board Office for the agency and in the locality in which they last served. A separate application, together with the necessary forms, must be filed for each list on which entry is desired.

(c) *Period of eligibility.* The period of eligibility on the War Reemployment List will be one year from the date of entry of name on the list: *Provided, however,* That eligibility on the list may be terminated at any time that the list is abolished after the cessation of the war. A furloughed employee who is placed on the War Reemployment List and while on furlough is separated from the service by reduction of force, will not thereby acquire an extension of eligibility. Suspension from the list because of declination, failure to respond, or other reasons will not extent the period of eligibility.

(d) *Removal from and restoration to the list.* Acceptance of any Federal employment, other than temporary employment, or declination of offer of appointment or failure to respond, will cause removal of a person's name from the War Reemployment List. Restoration to the list of names removed for declination or failure to respond will be governed by the same rules as govern the reentry of names on competitive lists.

(e) *Positions for which persons on list will be considered.* The names of persons on the War Reemployment List will be considered for positions for which they are found to be currently qualified under standards prescribed by the Commission and in effect at the time of application for entry of their names on such list.

(f) *Apportionment.* The provisions of § 18.4 (c) of Chapter I, Title 5, relating to the apportionment of positions among the several states, will not be applicable to certification or appointment from the War Reemployment List, and such appointments will not be charged to the quota of any state under such apportionment.

(g) *Appointment*—(1) *Type of appointment.* All appointments from the War Reemployment List will be made under § 18.14 of Chapter I, Title 5, and unless otherwise specifically limited may be for the duration of the war and not to exceed six months thereafter.

(2) *Assignment to duty.* Certification from the War Reemployment List will be sufficient authority to make assignment to duty as soon as applicable War Manpower Commission regulations have been complied with, except where it is found that the applicant has been reemployed in the Federal service since entry of his name on the War Reemployment List and is on active duty with another Federal agency, in which case war transfer procedure will be applicable.

(3) *Reports.* An appointing officer who selects from the War Reemployment List a person who is still on the rolls of, but on furlough or leave (with or without pay) from, another department, will so notify that department, giving the date of his entrance on duty in the new position. Accessions of personnel through the employment of persons certified from the War Reemployment List should be reported as "Reemployment List Appointments."

(4) *Trial period.* Persons appointed from the War Reemployment List will be required to serve a new trial period of one year.

(h) *General information.* Each department or agency should requisition the application, Civil Service Commission Form 2888, March, 1944, "Application for Entry on War Reemployment List," from the Government Printing Office. Requisitions should be submitted only by or through the office authorized to procure printing from the Government Printing Office for the central office of the department or agency.

Inquiries concerning § 18.14 of Chapter I, Title 5, from departmental offices in the metropolitan area of Washington, D. C., should be addressed to the Examining and Personnel Utilization Division, attention Chief, Examination Services Section, Extension 236, and from the field service or departmental services outside the metropolitan area of Washington, D. C., to the appropriate Regional Offices.

Provided, however, That the maximum price per net ton for deliveries to domestic consumers in the cities and towns of Arlington, Belmont, Braintree, Canton, Dedham, Dover, Hingham, Holbrook, Hull, Lexington, Malden, Medford, Melrose, Milton, Needham, Newton, Norwood, Quincy, Randolph, Reading, Revere, Stoneham, Wakefield, Waltham, Watertown, Wellesley, Weston, Westwood, Weymouth, Winchester, Winthrop and Woburn shall be the foregoing Class I price for the particular kind of coal plus one dollar ($1.00) per ton.

(2) *Maximum authorized service charges.* The foregoing prices apply to "direct deliveries" and are inclusive of any trimming that may be necessary. If a carry or wheel is necessary in order to effect delivery into the consumer's bin or storage facilities, and the buyer requests such service of him, the dealer may charge an additional 50¢ per ton if such charge is separately stated on the invoice or similar document rendered to the purchaser.

(3) *Classes of purchasers.* Quantities refer to the consumer's annual purchases in net tons, but apply only when the minimum delivery is one ton. Prices for deliveries of less than one ton are governed by paragraph (c) (4). The consumer's annual purchases determine his classification whether or not he purchases all of his requirements from a single dealer, except that a dealer may charge the Class I price to any consumer, regardless of his general classification, who purchases less than 4 tons from said dealer during the course of a year.

Class I. Less than 4 tons.

Class II. Four tons or more, but less than 1,000 tons, regardless of the number of points within the area at which delivery is received by the purchaser.

Class III. One thousand tons or more, regardless of the number of points within the area at which delivery is received by the purchaser.

Class IV. Three thousand tons or more, but less than 7,000 tons, delivered to a single point.

Class V. Seven thousand tons or more, delivered to a single point.

If the purchaser's proper classification cannot be determined at the time of the delivery (as for example, in the case of a purchaser who converts from oil to coal), an estimate shall be made of his probable consumption, he shall be tentatively classified upon the basis of that estimate, and the dealer or dealers supplying him shall make an appropriate refund and may require that the purchaser agree to pay an appropriate additional amount if, when his actual classification has been determined, it appears that he was entitled to a lower price or could properly have been charged a higher one.

(4) *Maximum prices for half and quarter-tons.* (i) The maximum price for delivery of one-half ton shall be the result arrived at by dividing the Class I price by 2, adjusting the quotient to the nearest multiple of 5¢ and adding 50¢.

(ii) The maximum price for delivery of one-quarter ton shall be the result arrived at by dividing the maximum price for delivery of one-half ton (determined pursuant to the preceding subparagraph) by 2, adjusting the quotient to the nearest multiple of five cents and adding 25¢. If, in either case, the quotient is an exact multiple of 2½¢, the next higher multiple of 5¢ shall be considered the nearest multiple thereof.

(d) *Chemical or oil treatment.* (1) If bituminous coal from Districts 1, 2, 3, 7 or 8 has been subjected to oil or calcium chloride treatment by the producer to allay dust or to prevent freezing, and the producer has properly made a charge for such treatment in accordance with the provisions of Maximum Price Regulation No. 120, the dealer selling such coal may add to the applicable maximum price established by this appendix a treatment charge at the rate of ten cents (10¢) per ton.

(2) If any bituminous coal which has not been so treated by the producer is subjected to oil or calcium chloride treatment by a dealer subject to this appendix, the dealer selling such coal may add to the applicable maximum price established by this appendix, a treatment charge at the rate of ten cents (10¢) per ton; provided, that no dealer shall require a purchaser to buy coal which has been so treated by the dealer.

(3) In all cases in which such a treatment charge is made, the dealer shall state it separately from all other items on his invoice.

(e) *Sales to brokers*—(1) *F. o. b. sales.* The maximum price for a sale to a broker who purchases f. o. b. transportation facilities at seller's yard, dock or other terminal facilities and resells without physically handling the coal, shall be 10¢ per ton less than the price applicable to a direct sale to a purchaser of the class of which the broker's customer is a member. The broker shall, when he places the order with the dealer, supply the name of his customer and a statement of his classification.

(2) *Delivered sales.* The maximum price for a sale by a dealer to a broker who orders coal to be delivered by the dealer directly to the broker's customer shall be 10¢ per ton less than the price applicable to a a direct sale to a purchaser of the class of which the broker's customer is a member. The broker shall, when he places the order with the dealer, supply a statement of his customer's classification.

(f) *Terms of sale.* Terms of sale may be c. o. d. However, if credit is extended no additional charge shall be made if payment is received by the tenth day of the month following the month in which the coal is loaded on transportation facilities, in the case of f. o. b. sales, or delivered, in the case of sales on a delivered basis. For the extension of credit beyond said tenth day of the following month, interest may be charged at a rate not to exceed one-half of one per cent per month on the unpaid balance.

[Region III Order G–1 Under General Order 50]

MALT BEVERAGES IN CLEVELAND REGION

Order No. G–1 under General Order No. 50. Maximum prices for malt beverages in Region III.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of Region III of the Office of Price Administration by General Order No. 50 issued by the Administrator of the Office of Price Administration, it is hereby ordered:

SECTION 1. *Purpose of this order.* It is the purpose of this order to establish specific maximum prices for malt beverages, as defined in this order, either in containers or on draught when sold or offered for sale at retail by any eating or drinking establishment, for "consumption on the premises".

SEC. 2. *Geographical applicability.* The provisions of this order extend to all eating and drinking establishments located in Region III of the Office of Price Administration, except those specifically exempted by Section 5. Region III of the Office of Price Administration includes all of the territory located within the outermost geographical boundaries of the States of Ohio, Michigan, West Virginia, Kentucky and Indiana (except the County of Lake).

SEC. 3. *Ceiling prices.* (a) On and after August 21, 1944, if you operate an eating or drinking establishment covered by this order, you shall not sell or offer for sale any beverage subject to this order at prices higher than the applicable ceiling prices listed in Appendix A for the zone in which your establishment is located. You may, of course, charge lower prices at any time.

(b) (1) If you sell any beverage subject to this order which is not specifically listed in one of the Tables for your zone in Appendix A hereof, and if you believe the maximum price specified in Table III—"Maximum Prices Per Bottle for the Respective Container Sizes for all Brands of Malt Beverages not listed in Table I and II"—is not appropriate for such beverage, you may apply to the Regional Office, Office of Price Administration, Region III, Cleveland, Ohio, requesting that such beverage be specifically listed in one of the Tables for your zone in Appendix A hereof, With or without such application, Appendix A may be amended by the Regional Administrator at any time.

(2) The following sales of malt beverages shall be exempt from this order, but shall remain subject to any applicable Maximum Price Regulation:

(i) Malt beverages in container sizes not listed in Appendix A.

(ii) Malt beverages sold for consumption off the premises.

(c) You may not add any taxes to the ceiling prices set forth in Appendix A hereof except those specifically provided therein as all other taxes were taken into consideration in establishing the ceiling prices for each group and zone as set forth in Appendix A.

(d) You may not add any sum as a bottle deposit to the maximum prices established in Appendix A for the group and zone in which you belong.

SEC. 4. *Zones and sellers' groups.*—(a) This order divides the territory to which it applies into zones. It also divides eating and drinking establishments into three groups. Different ceiling prices are established for each zone and each group located therein as set forth in Appendix A.

(b) *In what zone an establishment belongs.* The applicable zone for your establishment is that zone in which such establishment is geographically located.

(c) *In what group an establishment belongs.* (1) An establishment, except a new seller (see paragraph (f) of this section) belongs in Group 1B if:

(i) During the base period of April 4–10, 1943, the establishment sold in 12 oz. containers one or more brands of malt beverages covered by Table III as set forth for the applicable zone in Appendix A of this order; and

(ii) Such establishment's legal ceiling prices, exclusive of Federal Excise Taxes effective November 1, 1942 and thereafter, for the greatest number of such Table III brands sold in 12 oz. containers were the same as, or greater than, the applicable zone prices set forth for Table III brands sold in 12 oz. containers for Group 1B sellers.

(2) An establishment, except a new seller, (see paragraph (f) of this section) belong in Group 2B if:

(i) During the base period of April 4–10, 1943, the establishment sold in 12 oz. containers, one or more brands of malt beverages covered by Table III as set forth for the applicable zone in Appendix A of this order; and

(ii) Such establishment's legal ceiling prices, exclusive of Federal Excise Taxes effective November 1, 1942 and thereafter, for the greatest number of such Table III brands sold in 12 oz. containers were the same as or greater than, the applicable zone prices as set forth for Table III brands sold in 12 oz. containers for Group 2B sellers, but less than those prices set forth for Group 1B sellers.

(3) If during the base period of April 4–10, 1943, an establishment, except a new seller (see paragraph (f) of this section) did not sell any brands of beer in 12 oz. containers covered by Table III in the applicable zone but did sell one or more of the brands of beer in 12 oz. con-

tainers listed for the applicable zone in Table II of Appendix A, then the establishment shall determine its group by following the same method set out in Paragraph (1) and (2) above, but substituting the words "Table II" for "Table III" wherever said reference appears.

(4) An establishment belongs in Group 3B unless and until it is classified as a Group 1B or 2B establishment in the manner hereinafter provided.

(d) *Procedure to obtain classification as a Group 1B or Group 2B seller.* (1) Each separate establishment, even those under the same ownership, or management, must be separately and individually classified into its proper group. (For example, a coffee shop, dining room, special room, and a snack bar all in a hotel owned and operated by the same person, are considered separate establishments and must separately determine their proper group.)

(2) To obtain a classification in Group 1B or Group 2B, an establishment shall file in duplicate, Form No. GO–50 III–G1–1 containing all the information required therein. If such establishment has, prior to the issuance of this order, filed prices for malt beverages with its local War Price and Rationing Board as required by General Order No. 50, such forms shall then be filed with the said Local War Price and Rationing Board. Otherwise, said Form GO–50 III–G1–1 shall be filed with the appropriate District Office of the Office of Price Administration.

(3) Form GO–50 III–G1–1 may be considered filed only:

(i) When such report properly executed and in duplicate is received by the appropriate War Price and Rationing Board or appropriate District Office as the case may be; or

(ii) When such report properly executed and in duplicate is mailed by registered mail, addressed to the appropriate War Price and Rationing Board or the appropriate District Office as the case may be.

(4) Twenty days after the filing of Form GO–50 III–G1–1 if you have not received specific denial of the requested classification as a Group 1B or Group 2B seller, you may, until notified to the contrary, use the prices applicable to the group classification which you have requested.

(e) *Determination by War Price and Rationing Board and District Offices of the proper group for an establishment.* (1) If an establishment has, prior to the issuance of this order, filed prices for malt beverages with its War Price and Rationing Board, in accordance with General Order No. 50, and those prices show that the establishment is entitled to use Group 1B or Group 2B prices under this order, the War Price and Rationing Board upon receipt of Form GO–50 III–G1–1 filed pursuant to subsection (d) of this section 4, shall, subject to the limitation in section 4 (e) (2) herein, notify the establishment that it may use either Group 1B or Group 2B prices, as the case may be, and forward to such establishment a placard showing the Group to which the establishment belongs. This authorization shall be subject to further action on the part of the District Director, as hereinafter provided.

(2) If an establishment has filed prices with the War Price and Rationing Board, as required by General Order No. 50, showing the ceiling prices for malt beverages and those prices are lower than the prices which would entitle the establishment to use the prices requested in Form GO 50–III–G1–1, the War Price and Rationing Board shall forward such form filed by such establishment to the District Director.

(3) Upon the filing with the District Director of Form GO 50–III–G1–1, by any establishment subject to this order, under the provisions of subsection (d) (2), or upon the forwarding of such form by any War Price and Rationing Board to said District Director under paragraph (e) (2) hereof, said District Director shall determine the proper classification of such establishment and shall notify said establishment accordingly. Such classification shall be made by the District Director on the basis of the legal ceiling prices of such establishment for the malt beverages covered by this order in accordance with the provisions of section 4 (a) (b) (c) and (d). Such legal ceiling prices shall be determined upon the basis of prices filed, if any, under General Order No. 50, the information contained on Form GO 50–III–G1–1, and/or any other evidence pertinent thereto.

(4) Any establishment may be reclassified at any time by the District Director in accordance with the standards for classification herein set forth.

(f) *New sellers.* (1) A "new seller" for the purpose of this order means any eating or drinking establishment which sells any of the malt beverages covered by this order and which did not have legal ceiling prices for such malt beverages established for the period April 4–10, 1943.

(2) All new sellers are automatically in Group 3B. Any new seller may, either before or after commencing the sale of malt beverages, file an application with the appropriate District Office requesting that his establishment be classified into the same group in which the nearest similar eating or drinking establishment is classified. Until so classified such new seller must retain the classification of a Group 3B seller, and must observe the ceiling prices as provided for that Group and Zone in Appendix A hereof, and abide by all of the requirements of this order applicable to such Group 3B sellers. All such applications for classification must contain the following information:

(i) Name and address of the establishment and of its owner or owners.

(ii) A description of the establishment showing its type (such as night club, hotel, restaurant, tavern) and the date of its first sale of malt beverages covered by this order.

(iii) The legal ceiling prices by brand name and container size of all beverages sold since it opened for business.

(iv) The names of the three nearest eating and drinking establishments of the same type, and their group number as determined under this order.

(v) A copy of any report filed with the appropriate War Price and Rationing Board for malt beverages, as required under General Order No. 50.

(vi) Any other information pertinent to such application, or which may be requested by the appropriate District Director.

(3) Upon a determination of classification by the District Director under this section such District Director shall immediately notify the applicant of such classification or denial thereof and shall furnish applicant with a placard indicating its proper group classification which shall be posted in the manner hereinafter required.

SEC. 5. *Exempt sales.* The following sales of malt beverages are exempt from the operation of this order. However, unless they are otherwise exempt from price control, they shall remain subject to the appropriate maximum price regulations.

(a) Sales by persons on board common carriers, including railroad dining cars, club cars, bar cars, and buffet cars, or sales otherwise governed by Restaurant Maximum Price Regulation 1 (Dining Car Regulation).

(b) Sales to patients by public and private hospitals.

(c) Sales by eating cooperatives formed by members of the Armed Forces (as, for example, officers' mess) operating as a non-profit cooperative (where no part of the net earnings inures to the benefit of any individual), and substantially all sales of which are made to members of the Armed Forces who are members of the cooperatives.

(d) Sales by the War Department or the Department of the Navy of the United States through such Departments' sales stores, including commissaries, ships' stores ashore, and by stores operated as army canteens, post exchanges or ships' activities.

(e) Sales by "hotel room service," *Provided*, That the hotel prior to the effective date of this order customarily made "hotel room service" sales at legal ceiling prices different than those charged by other eating or drinking establishments operated in the hotel, and *Provided further*, That the hotel shall within sixty (60) days after the effective date of this order notify its War Price and Rationing Board that it claims this exemption and the basis upon which such claim is made.

"Hotel room service" means the sale of malt beverages by a hotel to a person where the delivery of the malt beverages is made to the guest room of a person registered as a bona fide guest at the hotel.

(f) Sales at a function of any fraternal, religious, or charitable organization; provided such sales meet all of the following requirements:

(1) The function does not occur more than twice a year, and

(2) The function does not continue more than three days at a time, and

(3) None of the proceeds accrue to the benefit of any private individual or any corporation organized for profit, and all of the proceeds are used for fraternal, religious or charitable purposes, and

(4) The sales of malt beverages are not made by a concessionaire.

(g) Sales by bona fide private clubs insofar as such clubs sell only to members or bona fide guests of members. Whenever such clubs sell to persons other than members or bona fide guests of members, such clubs shall be considered for all sales as eating or drinking establishments and subject to this order. No club shall be considered to be exempt as a private club, within the meaning of this subparagraph, unless its members pay dues (more than merely nominal in amount), are elected to membership by a governing board, membership committee or other body, and unless it is otherwise operated as a private club.

No club organized after the effective date of this order shall be exempt unless and until it has filed a request for exemption with the appropriate District Office, furnishing such information as may be required, and has received a communication from such office authorizing exemption as a private club. The District Director is hereby authorized to approve or disapprove such applications, subject to the provisions of the preceding paragraph.

SEC. 6. *Evasion.* If you are an operator of an eating or drinking establishment you must not evade the ceiling prices established by this order by any type of scheme or device; among other things (this is not an attempt to list all evasive practices) you must not:

(a) Institute or increase any cover, minimum, bread and butter, service, corkage, entertainment, checkroom, parking or other special charges which you did not legally have in effect on the effective date of this order.

(b) Require as a condition of sales of a beverage the purchase of other items or meals, except, that during the hours 11:30 a. m. to 1:30 p. m. and the hours 6:00 p. m. to 8:00 p. m., any eating or drinking establishment which derives not less than 70% of its gross revenue for the sale of prepared food items (not including beverage items) sold for consumption on the premises may refuse to sell malt beverages for consumption on the premises during those hours to persons who do not also purchase food items.

SEC. 7. *Records and menus.* If you are an operator of an eating or drinking establishment subject to this order you must observe the requirements of General Order No. 50, as well as any applicable Restaurant Maximum Price Regulations, with reference to the filing and keeping of menus and the preservation and keeping of customary and future records. Among other provisions of General Order No. 50 are the following:

(a) Preserve all existing records relating to prices, cost and sales of food items, meals and beverages;

(b) Continue to prepare and maintain such records as have been ordinarily kept;

(c) Keep for examination by the Office of Price Administration two copies of each menu used by the establishment each day, or a daily record in duplicate of the prices charged for food items, beverages and meals, except that prices need not be recorded which are the same as or less than prices previously recorded for the same items, beverages, or meals. If the establishment has customarily used menus, it must continue to do so.

SEC. 8. *Posting of prices.* If you are an operator of an eating or drinking establishment you must post and keep posted, the ceiling prices of the beverages subject to this order sold by your establishment, either by:

(a) Supplying the customers menus or bills of fare showing the beverages subject to this Order which are sold by the establishment; and showing the brand name, quantity and ceiling price of each kind and type of bottled malt beverage, and the quantity and ceiling price of all malt beverages sold on draught, or

(b) Posting a sign giving the same information as required on menus or bills of fare by paragraph (a) above. Such a sign must be posted in the establishment at a place where it can be easily read by the customers.

(c) No establishment which fails to comply with the posting provisions of this section 8 may sell any malt beverages covered by this Order at higher than the prices prescribed for Group 3B during the time such establishment is not in compliance with section 8.

SEC. 9. *Posting of group number.* If you operate an eating or drinking establishment selling at retail beverages subject to this order you must post, and keep posted, in the premises a card clearly visible to purchasers showing the group number of your establishment as classified under this order. You must post either the card which, upon request, your War Price and Rationing Board will furnish you for this purpose, or a reasonably accurate facsimile thereof. If at any time you fail to have the card posted in your establishment as required by this section 9, you may not during that time sell any malt beverage covered by this order at prices higher than those provided for Group 3B sellers. Group 3B sellers must obtain from their War Price and Rationing Boards, Group 3B placards and must post such placards as required by this section. On and after August 21, 1944, failure to post a proper placard shall constitute a violation of this order.

SEC. 10. *Receipts and sales slips.* Regardless of whether receipts have customarily been used, upon request by any customer at the time of payment, a receipt containing a full description of the malt beverage sold and the price of same must be given to the customer.

If you have customarily used receipts or sales slips you may not now discontinue the practice.

SEC. 11. *Operation of several establishments.* If you own or operate more than one establishment selling malt beverages subject to this order you must do everything required by this order for each establishment separately.

SEC. 12. *Transfers of business or stock in trade.* If the business assets, or stock in trade of any establishment are hereafter sold or otherwise transferred, or have been sold or transferred subsequent to April 10, 1943 and the transferee carries on the business or continues to sell malt beverages covered by this order in the same location, the maximum prices of the transferee shall be the same as those to which its transferor would have been subject if no such transfer had taken place, and its obligations to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available or turn over to the transferee all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the record-keeping provisions of this order. If there is a lapse of business operations in connection with such transfer for a period of thirty days, selling prices therefor shall be determined as provided in section 4 for a new seller.

SEC. 13. *Changes in location.* If any establishment subsequent to April 10, 1943, and either before or after the issuance of this order, is moved to a new location, the establishment shall be considered a new seller under this order and shall determine its prices under the provisions of section 4, paragraph (f).

SEC. 14. *Enforcement.* If you violate any provision of this order you are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspensions of licenses, provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 15. *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this order. If you are a seller subject to this order your license may be suspended for violation of the license or of the order. If your license is suspended you may not, during the period of suspension, make any sale for which your license is suspended.

SEC. 16. *Relation to other regulations.* On and after August 21, 1944, this order supersedes the provisions of Maximum Price Regulation No. 259 and any other regulation or order issued by the Office of Price Administration, but only insofar as such regulations or orders are applicable to sales at retail by eating or drinking establishments of beverages subject to this order for consumption on the premises.

SEC. 17. *Authority of District Directors.* Each District Director is hereby delegated the authority to classify eating and drinking establishments into the proper group classifications as provided in this order and to do and perform all other functions, duties and obligations required of such District Director by the terms of the order.

INSTRUCTIONS

1. Do not file this report unless you are eligible to use Group 1B or Group 2B prices.
2. File TWO copies with:
(A) Your War Price and Rationing Board if you answer Question No. 1 (B) "Yes."
(B) Your District Office of the Office of Price Administration if you answer Question No. 1 (B) "No."
3. File a separate report for each establishment. Example 1: Three restaurants under the same ownership located in different buildings. File separate report on this form for each restaurant. Example 2: Main dining room, coffee shop, and bar under same ownership located in one building. File separate report on this form for each.
4. Answer all questions in the report. You may submit any additional information which you think will assist the Office of Price Administration in passing on your report.
5. "Name of establishment" means the name by which the eating or drinking establishment or particular room is known. Example: Doe's Cafe, The Blue Room, Roe's Stand No. 1, etc.
6. "Name of owner" means the official name of the corporation, partnership or sole proprietor which owns the establishment. Examples: "Doe, Incorporated", "Smith and Jones", "Richard Roe."
7. In answering Question No. 5 refer to the Appendix and examine the list of brands appearing in Tables I and II for the zone in which your establishment is located. List the Table II brands which you sold during the base period under Question No. 5 "Table II Brands" on the report. If, during the base period, you sold one or more brands of beer which are not listed in Tables I and II, such brands are covered by Table III. List all such Table III brands under Question No. 5, "Table III Brands" on the report. Opposite each brand which you have listed on the report place your base period (April 4–10, 1943) legal ceiling price for 12 oz. bottles, as calculated under Maximum Price Regulation 259 and exclusive of Federal Excise Taxes effective on and after November 1, 1942.
From such prices select the price for the greatest number of Table III Brands which you sold. Your Group number will be determined from this base period legal ceiling price. If this price is the same as, or more than, the zone price established for Table III brands in 12 oz. bottles for Group 1B sellers, your establishment belongs in Group 1B; if such price is the same as, or more than, that established for Group 2B sellers in your zone, but less than that established for Group 1B sellers, your establishment belongs in Group 2B; in like manner, if such price is less than the zone price established for Table III brands in 12 oz. bottles for Group 2B sellers your establishment belongs in Group 3B.
If you did not sell any brands of beer covered by Table III, but did sell some listed in Table II for your zone, your qualifications will be determined for Group 1B or Group 2B by following the same procedure set forth in the foregoing pargaraph, substituting Table II for Table III wherever reference is made thereto.
8. Space is provided in the report for you to describe the kind of establishment you operate and the kind of service offered. In answering this question, indicate what designation best describes the particular establishment for which you are reporting. For example: Cafe, bar, grill, night club, etc. Also describe briefly its location and facilities. If it is one of several establishments which you operate in the same building as, for example, a hotel, indicate how many different eating or drinking establishments you operate in that one building, what kind of establishments they are, and file a separate report for each of the establishments, indicating for which one this report is filed. If you furnish any entertainment describe briefly its nature. If you operate several establishments at different locations, indicate this fact and file separate reports for each of the establishments.
9. If this report is signed by any person other than an officer of the corporation owning the establishment, or one of the partners if owned by a partnership, or the owner if a sole proprietorship, then the report must be accompanied by duly authenticated power of attorney authorizing the person signing the report to execute it on behalf of the owner.

SECURITIES AND EXCHANGE COMMISSION.

[File Nos. 54–97, 59–73, 59–38]

UNITED PUBLIC UTILITIES CORP., ET AL.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 11th day of July A. D. 1944.

In the matters of United Public Utilities Corporation, applicant, File No. 54–97; United Public Utilities Corporation and its subsidiary companies, respondents, File No. 59–73; United Public Utilities Corporation and its subsidiary companies, respondents, File No. 59–38.

Notice of filing and order for hearing on a plan filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935; notice of and order for hearing pursuant to sections 11 (b) (2), 15 (f) and 20 (a) of the act, notice of and order reconvening hearings under section 11 (b) (1) of the act, and order consolidating proceedings.

I. Notice is hereby given that United Public Utilities Corporation (UPU), a registered holding company, has filed an application pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 for approval of a plan for the purpose of enabling the company and its subsidiaries to comply with the provisions of section 11 (b) (2) of the act. All interested persons are referred to said plan, which is on file at the office of this Commission for a statement of transactions therein proposed, which are summarized as follows:

1. UPU proposes to simplify the corporate structure of its holding company system and to redistribute the voting rights of its stockholders by reclassifying its outstanding preferred and common stocks into a single class of common stock with a par value of $5 per share (hereinafter referred to as New Stock). The plan states that there will be no modification of the outstanding bonds inasmuch as it is contemplated that all of the bonds will ultimately be retired out of the proceeds of the collateral securing the bonds, or partly by such means, and partly by refinancing.

2. It is proposed to change the authorized capital stock of UPU to 500,000 shares of New Stock and to issue 350,918 shares of New Stock in exchange for the presently outstanding preferred and common stocks on the following basis:

	Percent
2.4 Shares for one share of $3 preferred, or a total of 190,658.4 shares	97.89
2.2 Shares for one share of $2.75 preferred, or a total of 152,853.8 shares	
1 Share for 50 shares of common, or a total of 7,406 shares	2.11
Total	100.00

3. The balance of New Stock amounting to 149,082 shares will be reserved for issue (a) in conversion of bonds to the extent shares are required for such purpose under the Supplemental Trust Indenture, dated January 1, 1935, governing such conversion or (b) by the Board of Directors as to shares not required for such conversion.

The capital of UPU will be stated at $1,754,590, which is the aggregate par value of the aforesaid 350,918 shares of New Stock. The difference, namely $6,061,710, between the present aggregate capital ($7,816,300) applicable to preferred and common stocks outstanding and the capital ($1,754,590) applicable to New Stock, will be transferred to paid-in surplus. The book values of investments in subsidiaries of UPU will be restated at a reduced amount which will be equal to the underlying book values of the investments as shown by the books of the subsidiaries and a reserve of $1,000,000 against such investments will be provided for contingencies. Reductions in net book values of investments will aggregate $2,392,369 and will be charged first, against earned surplus available at the effective date of the plan (after provision for certain reserves totalling $564,755) and, secondly, against the paid-in surplus created by the restatement of capital. The balance of such paid-in surplus will be available for charges for any liquidating dividends paid in cash or in kind to effectuate the provisions of section 11 (b) (1) of the act. Liquidating dividends may include the distribution of securities or cash proceeds from the sale of Fort Smith Gas Company, Southern Gas Producing Company, Dakota Public Service Company and Knife River Coal Mining Company, or any successor corporations.

5. Distribution of the New Stock under the Plan will be made over a period of two years from the effective date of the plan, upon surrender of UPU's outstanding preferred and common stock certificates. As soon thereafter as is feasible all shares of New Stock then represented by unexchanged preferred and common stock certificates are to be sold in the open market and the proceeds, together with any dividends theretofore paid thereon (less expenses), will be held for the benefit of the holders of unexchanged certificates for an additional three years. After the fifth year from the effective date of the plan any balance of such proceeds then held against unexchanged certificates is to revert, and belong to UPU.

6. No fractional shares will be issued but, in lieu thereof, a stockholder may elect, in the alternative, within two years from the effective date of the plan, to receive scrip, or direct that fractional shares, to which he is entitled, shall be sold in the open market, whereupon such fractional shares will be sold whenever a sufficient number of requests has been received to permit an economical sale of a number of whole shares at one time and the net proceeds from the sale of such lots, together with any dividends theretofore paid on such shares, shall be distributed pro rata to the stockholders whose fractional shares were so sold. Scrip certificates will be in bearer form, non-dividend bearing, non-voting and, in equivalent amounts, will be exchangeable for full shares at any time within two years from the effective date of the plan. Thereafter such right of exchange is to terminate and all rights of holders of scrip are to become null and void and all shares of New Stock and any dividends paid thereon then being held against outstanding scrip will forthwith revert, and belong, to UPU.

7. UPU requests, if the Commission approves the proposed Plan, that the Commission apply to a Federal Court pursuant to the provisions of sections 11 (e) and 18 (f) of the act to enforce and carry out the terms and provisions of the plan.

II. The Commission having examined the corporate structure of UPU and its subsidiary companies, the relationships among the companies in said holding company system, the character of the interests thereof and the properties owned or controlled thereby, and having examined the files and records of the Commission relating thereto, and said examination having disclosed data establishing or tending to establish the following:

2. UPU is the only holding company in the system and presently owns all the outstanding capital stocks (except 140 shares of the outstanding capital stock of Peoples Service Company) and all debt securities of fifteen subsidiaries. The names of all companies included in UPU's holding company system, together with the states in which such companies operate and are incorporated and the businesses in which such companies are engaged are as follows:

[2] Preferred in liquidation to $50 per share plus dividends in arrears.

4. The normal voting rights are vested in the Class A common stock (one vote per share) except that the Class B common stock has the right to elect one director until such time as UPU has retired 50% of the aggregate amount of its collateral trust bonds and preferred stock originally issued under the Plan of Reorganization of 1935, in which event the Class B stock is also entitled to one vote per share. The preferred stock is entitled to one vote per share in the event dividends thereon are in default for eight quarterly periods. As a result of dividend arrears, the preferred stock now has 50% of the voting rights and the right to participate in the election of all directors except one who is elected by the Class B common stock.

III. The Commission being required by the provisions of section 11 (e) of the act, before approving any plan thereunder, to find, after notice and opportunity for hearing, that such plan, as submitted or as modified, is necessary to effectuate the provisions of subsection (b) of section 11 of the act, and is fair and equitable to the persons affected by such plan; and

It being the duty of the Commission, pursuant to section 11 (b) (2) of the act, to require by order, after notice and opportunity for hearing, that each registered holding company, and each subsidiary company thereof, shall take such steps as the Commission shall find necessary to ensure that the corporate structure or continued existence of any company in the holding company system does not unduly or unnecessarily complicate the corporate structure, or unfairly or inequitably distribute voting power among security holders of such holding company system; and

It tentatively appearing to the Commission that the corporate structure of UPU's holding company system is unduly and unnecessarily complicated and that voting power is unfairly and inequitably distributed among the security holders thereof; and

It further tentatively appearing to the Commission that the investment account of UPU and the property accounts of its subsidiaries may include intangibles, write-ups or other inflationary items and that other accounts may require readjustment; and

It further appearing that proceedings have heretofore been instituted pursu-

ant to section 11 (b) (1) of the act directed to UPU and its subsidiary companies (File No. 59–38) by Commission order, dated October 31, 1941 and that public hearings have been held in respect thereto and have been adjourned subject to call of the trial examiner; and

It further appearing to the Commission that it is appropriate that the hearings heretofore held pursuant to 11 (b) (1) of the act and adjourned as aforesaid be reconvened; and

It therefore appearing appropriate to the Commission that notice be given and a hearing held for the purpose of determining what action, if any, should be ordered under sections 11 (b) (1), 11 (b) (2), (15) (f) and 20 (e) of the act, and with respect to the proposed Plan filed under section 11 (c) of the act; and it further appearing that these matters involve common questions of law and fact and should be heard together;

It is hereby ordered, That proceedings under sections 11 (b) (2), 15 (f) and 20 (a) of the act be instituted and consolidated with the proceedings relating to the plan filed under section 11 (c) of the act and with the proceedings heretofore instituted under section 11 (b) (1) of the act and that a hearing on such matters under the applicable provisions of the act and the rules of the Commission thereunder be held on the 7th day of August 1944, at 10:00 a. m., e.w.t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room in which such hearing will be held.

It is further ordered, That Henry C. Lank, or any other officer or officers of the Commission designated by it for that purpose, shall preside at the hearing above ordered. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's rules of practice.

It is further ordered, Without limiting the scope of the issues presented by the pending application or by the proceedings hereby and heretofore instituted, that evidence having particular bearing on the following matters shall be adduced:

1. Whether the transactions involved in the proposed Plan filed pursuant to section 11 (c) of the act comply with all of the requirements of the applicable provisions of the act and the rules promulgated thereunder.

2. Whether such proposed Plan is necessary to effectuate the provisions of section 11 (b) of the act, whether such plan is fair and equitable to the persons affected thereby, and whether such plan should be approved.

3. Specifically whether the provisions of the proposed plan with respect to the disposition of New Stock or the avails thereof, representing unexchanged certificates are fair and equitable to the persons affected thereby.

4. Whether the allegations contained in Section II hereof are true and correct.

5. Whether the corporate structure of UPU unduly or unnecessarily complicates the structure of such holding company system or distributes voting power unfairly or inequitably among security holders thereof and, if so, whether the corporate structure of UPU should be revised.

6. Whether, and to what extent, the investment account of UPU or the property accounts of its subsidiaries, as stated on their respective books, include intangibles, write-ups or other inflationary items; whether the property accounts of any of UPU's subsidiaries include amounts for property which is not used or useful; whether the depreciation reserves of such subsidiaries and their annual provisions for maintenance and depreciation are adequate; and whether, and, if so, the extent to which, it is necessary or appropriate in the public interest or for the protection of investors or consumers to require, pursuant to sections 15 (f) and 20 (a) of the act and the rules and regulations thereunder, that UPU or any of its subsidiaries restate any of the aforesaid accounts.

7. What further orders, if any, should be entered pursuant to sections 11 (b) (1), 11 (b) (2), 15 (f) and 20 (a) of the act, to require UPU and its subsidiaries to take such steps as the Commission shall find necessary to comply with the provisions of said sections.

It is further ordered, That UPU and its subsidiaries file with the Secretary of the Commission, on or before the 27th day of July, 1944, answers to the allegations contained in paragraphs numbered 1 through 4, both inclusive, of section II herein, in the form prescribed by Rule U–25 of the rules and regulations under the act.

It is further ordered, That any person desiring to be heard or otherwise wishing to participate in the proceedings should notify the Commission in the manner provided by its rules of practice, Rule XVII, on or before July 27, 1944.

It is further ordered, That notice of said hearing be given to UPU and its various subsidiaries, to the Public Utility Commissons of the States of Ohio, Indiana and South Dakota, to the Department of Public Utilities of the State of Arkansas, to the Railroad and Warehouse Commission of the State of Minnesota, to the Board of Railroad Commissioners in the State of North Dakota by mailing a copy of this notice and order forthwith by registered mail; and that UPU shall mail to each of its stockholders of record, who may be affected by the plan, at his last known address, a copy of this notice and order on or before July 21, 1944; and that notice be given to all other persons by a general release of this Commission distributed to the press and mailed to the mailing list for releases under the act and by publication of this notice and order in the FEDERAL REGISTER.

It is further ordered, That jurisdiction be and hereby is reserved to separate, either for hearing, in whole or in part, or for disposition, in whole or in part, the proceedings instituted by this order under sections 11 (b) (1), 11 (b) (2), 15 (f) and 20 (a) of the act and the application for approval of said plan filed under section 11 (e) of the act.

Notice is hereby given that a declaration or application (or both) has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by Savannah Gas Company, a gas utility company and a subsidiary company of American Gas and Power Company and Community Gas and Power Company, registered holding companies.

All interested persons are referred to said document which is on file in the office of the Commission for a statement of the transactions therein proposed, which are summarized as follows:

Savannah Gas Company proposes to reduce its outstanding capital stock from $1,400,000 to $672,000 by reducing the par value of each of the 56,000 shares outstanding (all owned by American Gas and Power Company and pledged as collateral under the debenture agreement of American Gas and Power Company as supplemented and amended) from $25 per share to $12 per share, and thereby to create capital surplus in the amount of $728,000. Savannah Gas Company then proposes to remove from its accounts the amount of $767,861.19, now included in Utility Plant in Service under the caption Utility Plant Adjustment, by charging $728,000 of such amount to the capital surplus created as above stated, and by charging the balance of $39,861.19 to the earned surplus of the company. 1. Whether the proposed transactions are in the public interest or in the interest of investors and consumers and whether in all respects the proposed transactions comply with all the applicable provisions and requirements of the Public Utility Holding Company Act of 1935 and the rules, regulations and orders promulgated thereunder.

2. Whether and to what extent it is necessary or appropriate in the public interest to impose terms or conditions in regard to the accounts or capital stock of Savannah Gas Company, or otherwise in regard to the proposed transactions.

Chapter IX—War Production Board

Subchapter B—Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-579]

PRATT FOOD COMPANY

Pratt Food Company, 52 State Street, Hammond, Indiana, is a branch of Pratt Food Company, a corporation organized under the laws of the State of Pennsylvania. It is engaged in the manufacture and sale of animal and poultry feeds, in which molasses is customarily used as an ingredient. During the calendar year 1943 and the first calendar quarter of 1944 the respondent accepted delivery of approximately 920,016 pounds of molasses in excess of its permitted quota, and used approximately 743,282 pounds of molasses in excess of its permitted consumption, in violation of the provisions of General Conservation Order M-54. The Pratt Food Company was familiar with the provisions of General Conservation Order M-54, and its actions constituted a wilful violation of that Order.

These violations have hampered and impeded the war effort of the United States by diverting a scarce material to uses unauthorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.579 *Suspension Order No. S-579.* (a) During the four successive calendar quarters beginning July 1, 1944, and ending July 1, 1945, the Pratt Food Company, its successors or assigns, shall not accept delivery of or use any molasses in an amount exceeding 80% of its quota as specified by General Conservation Order M-54, unless otherwise authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Pratt Food Company, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on July 13, 1944, and it shall expire on July 1, 1945.

Issued this 13th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-582]

JOSEPHINE B. MARTIN (MRS. WILLIAM T. MARTIN)

Josephine B. Martin (Mrs. William T. Martin) of Marblehead, Massachusetts, in June, 1943, began and thereafter continued construction, consisting of remodeling a residence, at 160 Atlantic Avenue, Marblehead, without authorization from the War Production Board, at an estimated cost of $3,500, which amount exceeded the limit of $200 permitted by Conservation Order L-41. Josephine B. Martin was aware of War Production Board restrictions on construction, and doing this construction without authorization constituted a wilful violation of Conservation Order L-41. Josephine B. Martin also wilfully furnished false and misleading information to the War Production Board in an application for approval of this residential construction, dated October 25, 1943.

This violation of Conservation Order L-41 has diverted critical materials to uses not authorized by the War Produc-

tion Board and has hampered and impeded the war effort of the United States of America. In view of the foregoing, it is hereby ordered, that:

§ 1010.582 *Suspension Order S–582.* (a) Neither Josephine B. Martin (Mrs. William T. Martin), her successors or assigns, nor any other person, shall do any construction on the premises at 160 Atlantic Avenue, Marblehead, Massachusetts, including putting up or altering the structure, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Josephine B. Martin (Mrs. William T. Martin) her successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on the 13th day of July 1944.

Issued this 13th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 3, Direction 9]

TEXTILE MACHINERY ACCESSORIES—FIBER BLOCKS, BOBBINS, CONES, COPS, CORES, PIRNS, QUILLS, SPOOLS AND TUBES

The following direction is issued pursuant to Priorities Regulation 3:

(a) *Purpose.* This direction provides an exception to the provisions of List B of Priorities Regulation No. 3 which prohibits the use of blanket MRO ratings to obtain paper and paperboard and products manufactured therefrom. By the terms of this direction, blanket MRO ratings may be used to obtain certain fiber products used as textile machinery accessories.

(b) *Use of MRO ratings.* Any person may use the blanket MRO ratings assigned to him by any regulation or order of the War Production Board to get the following textile machinery accessories (with or without metal ends or inserts) to be used as operating supplies: Fiber Blocks, Bobbins, Cones, Cops, Cores, Pirns, Quills, Spools and Tubes.

(c) *No extension of ratings.* Ratings applied to get the textile machinery accessories listed above may not be extended to obtain materials for use in their manufacture.

Issued this 14th day of July 1944.

PART 1029—FARM MACHINERY

[Limitation Order L–257, as Amended July 14, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of critical materials entering into the manufacture of farm machinery and equipment and repair parts therefor, for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1029.15 *Limitation Order L–257.*—(a) *What this order does.* This order describes the rules governing the manufacture of farm machinery and equipment and repair parts for sale in the continental United States and possessions. (Manufacture for export is covered by Order L–257–a.) To aid manufacturers in planning a continuous production cycle, it is the intention that this will be the basic order from year to year. However, it is expected that a new schedule of quota percentages will be issued as a part of the order each year for the "current quota period" starting July 1 of that year, and this will become the "applicable schedule" for that period. For example, the applicable schedule for the period July 1, 1943 to June 30, 1944, is Schedule A; for the following twelve-month period starting July 1, 1944, the new applicable schedule might be called Schedule B, etc. In order that producers may plan their production and order materials in advance, they may assume that the schedule in effect at any particular time will continue into the next "current quota period", until such time as a new schedule is issued. There is no quota limitation on repair parts or attachments:

In addition to quota and other limitations on manufacture, this order also has rules on the filing and approval of production schedules, covering machinery and equipment (both farm and non-farm) and repair parts. Producers affected must stick to their schedules, with certain exceptions, so that the various programs, both farm and non-farm, can be met on time.

(b) *Definitions.* For the purpose of this order (and any orders supplementary hereto, unless otherwise indicated):

(1) "Producer" means any person, other than a supplier, engaged in the manufacture (in the United States) of farm machinery and equipment or of attachments or repair parts for farm machinery and equipment.

(2) "Small producer" means any producer whose total net sales (including exports and sales by affiliates) of all products did not exceed $100,000 during the calendar year 1941; and includes any other producer who has been classified by the Smaller War Plants Corporation as a "smaller, distressed producer" and is specifically designated as such for the purpose of this order by the War Production Board, on such terms and conditions as may be proper.

(3) "Manufacture" means to put into process, machine, fabricate, or otherwise alter materials by physical or chemical means.

(4) "Supplier" means any person engaged in the manufacture (for sale to a producer in the United States) of materials, parts, assemblies or subassemblies to be physically incorporated into farm machinery and equipment or repair parts manufactured by such producer, or to be resold by such producer as repair parts.

(5) "Machinery and equipment" means agricultural machinery, mechanical equipment and implements (including all attachments used in conjunction therewith) of the types ordinarily manufactured for farm use, and listed on the applicable schedule attached hereto.

(6) "Farm use" means use for the production or care of crops, livestock, livestock products, or other produce on a farm (or elsewhere in the case of poultry). The term also includes use for the production or care of crops in "victory gardens" with respect to atomizing hand sprayers, hand dusters, wheel-type hand cultivators and wheel-type hand plows, and use for any civilian purpose with respect to horseshoes, muleshoes, oxenshoes and harness hardware.

(7) "Farm machinery and equipment" means machinery and equipment which is manufactured specifically for farm use, including irrigation and drainage equipment (excluding tile), horseshoes, muleshoes, oxenshoes, harness hardware, and water well casing (fabricated by other than pipe mills); but excluding repair parts, and also excluding all of the following: tracklaying type tractors, fencing, poultry netting and wire, wire fencing, bale ties or straps, oil well casing and water pipe, grain bins and corn cribs, water storage tanks, nails (all kinds), and sundry hardware (including hand tools, chains, barn door track, pulleys, scales, and similar items not specified on the applicable schedule).

(8) "Non-farm machinery and equipment" means machinery and equipment, as defined in paragraph (b) (5) above, which is manufactured pursuant to rated orders for any purpose other than farm use.

(9) "Attachment" for machinery and equipment means a supplementary appliance which may be added to an otherwise complete machine to extend the utility of such machine. No item (other than Item No. 313) listed on the applicable Schedule shall be deemed an attachment.

(10) "Repair parts" means all types of replacement parts considered separately or as assemblies which are manufactured for use and used in the repair and maintenance of "farm machinery and equipment" and shall include plow shares and shapes, and water pump cylinders. No item listed on the applicable schedule shall be deemed a repair part.

(11) "Base production" means the weight of a producer's total manufacture in the United States of any item of farm machinery and equipment for sale in the United States during either the calendar year 1940 or 1941, in whichever year such weight was the greater.

(12) "United States" means the forty-eight states, the District of Columbia, Alaska, Hawaii, Puerto Rico, the Virgin Islands, and all other territories and possessions of the United States.

(13) "Current quota period" means the twelve-month period which starts July 1 of any year and ends June 30 of the following year, as identified on the applicable schedule.

(14) "Applicable schedule" means the particular schedule relating to a current quota period, and fixing manufacturing quotas (for sale in the United States) for each item listed for that period.

(c) *Restrictions on production for domestic farm use.*—(1) *Manufacturing quotas.* During any current quota period, no producer shall manufacture, for sale in the United States, more of any item of farm machinery and equipment (by weight) than his quota for that item. This quota is figured by taking the percentage shown for the item on the applicable schedule, and multiplying it by his base production of the item. Exceptions to this general rule are stated in paragraph (d). Special restrictions are set forth in subparagraph (2) below and in paragraph (f).

(2) *Special restrictions.*

(i) The quota for items of farm machinery and equipment for any person who had no "base production" in 1940 or 1941 is limited to an aggregate value of not more than $2,500 during any current quota period. This limit does not apply to repair parts or attachments under paragraphs (d) (1) and (d) (3), nor to any item which may be specifically removed from quota limitations.

(ii) No item which is not provided for in the applicable schedule shall be manufactured as "farm machinery and equipment" for sale in the United States.

(iii) No person shall manufacture for sale in the United States any item of farm machinery and equipment requiring rubber tires except the following items:

Wheel type tractors including garden type.
Combines.
Pick-up hay balers and field hay harvesters.
Corn pickers.
Power sprayers over ten gallons per minute.
Any item requiring tires to be mounted on wheel rims of the following sizes (diameter): 15", 16", 18", 20" and 21".

(iv) No producer who is not a "small producer" shall manufacture, for sale in the United States, any item of farm machinery and equipment or repair parts (or non-farm machinery and equipment) except to the extent listed on an approved production schedule under paragraph (e).

(3) *Adjustments in quotas.* The War Production Board may, by specific written directions or authorizations issued to any producer or other person affected by this order, increase or decrease any quota or authorized use of materials; and may transfer any portions of quotas between producers, taking into account the amount and weight of materials to be used, the need for particular items at the time required in particular areas, the labor and transportation situation in the manufacturing areas involved, and such other factors as may be proper.

(d) *Exceptions.*—(1) *No quota for repair parts.* Producers may manufacture repair parts for sale in the United States without any restrictions as to quota. However, they must comply with paragraph (e) with respect to production schedules.

(2) *Bracketed items.* Wherever, in an applicable Schedule, two or more items are bracketed together, the producer must apply the individual percentages to his base production of each item in the bracket and add up the various weights. This total permissible weight may then be distributed among all or any one or more of the items in that bracket as he chooses (regardless of the individual quota percentages).

(3) *No quota restrictions on attachments.* "Attachments" may be manufactured for sale in the United States without any restrictions as to quota. However, it is necessary to comply with paragraph (e) with respect to production schedules.

(4) *Small producers.* Any "small producer" may use the quota percentage "100%" instead of the quota percentage listed on any applicable schedule for any item or items which he makes, but only to the extent that the weight of his total manufacture of all items of farm machinery and equipment during the current quota period does not exceed, in the aggregate 100% of his base production of these items. In addition, small producers do not have to comply with certain provisions of this order with respect to production schedules or monthly reports, as stated in subparagraph (c) (2) (iv) and paragraphs (e) and (k). However, this does not relieve them from complying with all CMP Regulations and procedures.

(5) *Production before or after current quota periods.*—(i) *Advance planning of production.* Before the beginning of any current quota period, producers may plan their production, order materials and start initial fabrication in accordance with the applicable schedule for the coming period. For this purpose, until such time as a new applicable schedule is issued, it may be assumed that the schedule currently in effect will apply for this next period. In other words, the schedule in effect is always the "applicable schedule" unless and until displaced by a new schedule.

(ii) *Carry-over of uncompleted portions of quotas.* Any portions of quotas for sale in the United States under an applicable schedule (including all amendments appeals and specific authorizations) which are not completely manufactured by the end of the current quota period, may be carried over and added to the corresponding quotas of the next current quota period but only to the extent that they can be completed by July 31 of this next period. However, uncompleted quotas (domestic, and those under Schedule B–6) under Order L–170 may be carried over as explained above for completion any time before June 30, 1944. In addition, uncompleted quotas for the following items of harvesting machinery and equipment under Schedule A (including special authorizations, etc.) may be carried over for completion any time before September 30, 1944:

Combines (Items 126 and 126a only).
Corn binders (Items 132 and 132a only).
Corn pickers (Items 133–136).
Field ensilage harvesters (Item 137).
Peanut pickers (Item 161).
Corn shellers (Items 166 and 167 only).
Hay balers (Items 172, 172a and 172b only).
Feed grinders and crushers (Items 174, 175, and 175a only).
Portable elevators (Item 188).

(6) *Substitute materials.* Any person may manufacture for sale in the United States the following items, without regard to the restrictions of this order, if they are made from the substitute materials listed:

Bee hives.
Farm gates.
Feed trucks.
Grit boxes.
Hog troughs.
Laying nests.
Livestock feeders.
Milk stools.
Poultry feeders.
Poultry waterers.

These items are unrestricted only if they are made entirely (except for nails and essential strappings and fastenings, and except for doors in the case of livestock feeders) from any one or more of the following materials:

NOTE: List amended July 14, 1944.

Glass or other ceramic products.
Plain concrete.

Some of the items listed above are also given quotas on the applicable schedule. These quotas apply only to the extent that the items are to be made from iron or steel.

NOTE: See Direction 3 to this order which removes quota restrictions under certain conditions.

(7) *Substitution for critical materials encouraged.* If the weight of any item of farm machinery and equipment manufactured by a producer has been or will be increased by his substituting for more critical materials any of the materials listed above in subparagraph (d) (6), he may still manufacture in any current quota period the number of units which would have been within his domestic quota before making the substitution. Also a producer may apply for additional quota for any item in which he can substitute these materials entirely for more critical materials.

(8) *Assignments of quota.* All assignments of quota specifically authorized by appeal under Limitation Order L–170 for the period starting November 1, 1942, or under this Order L–257, are re-authorized for each current quota period. The assignee, in figuring his additional quota, must take the percentage on the applicable schedule for each item transferred and multiply it by the assignor's base production of that item. The assignor's quota is, to that extent, revoked.

(e) *Production schedules.*—(1) *AA–2 for purpose of scheduling production.* Producers and other persons authorized to manufacture under this order may schedule their production of items of farm machinery and equipment and repair parts as if the orders for these items bore a rating of AA–2.

(2) *Production schedules must be filed: exemption for "small producers".* With respect to each item of machinery and equipment (both farm and non-farm) and repair parts, each producer must file a production schedule on Form WPB–3181, listing the quantities he plans to have available for shipment (within his quota and other authorizations under this order) to various classes of customers, in accordance with the instructions on the form. This production

schedule is deemed approved as filed, unless the producer is notified in writing to the contrary by the War Production Board. "Small producers" do not have to file this form.

(3) *Items on approved schedule to be available for shipment; changes in schedule.* Each producer must have available for shipment each month to each class of customer the quantities of each item and of repair parts as indicated on his approved schedule. However, he may complete (within his approved total) more than his schedule in any month, except that, in the case of wheel-type tractors, a producer may not complete in any calendar quarter more tractors than the total shown on his approved schedule for that quarter, plus any approved amounts scheduled but not completed in previous quarters. He may also, if necessary, delay completion of any quantities scheduled for any class of customer for any month up to the last day of the next month. Any other change in an approved schedule must be reported on Form WPB–3181 and the change will be deemed approved as filed, unless the producer is notified in writing to the contrary by the War Production Board.

(4) *Deliveries for farm use protected.* A producer must deliver all quantities of items listed on an approved schedule (WPB–3181) for farm use and for export without regard to preference ratings, unless otherwise specifically directed in writing by the War Production Board. Small producers may deliver items for farm use and for export without regard to any orders bearing preference ratings of AA–2x or lower.

(f) *Further restrictions*—(1) [Deleted Mar. 23, 1944]

(2) *Restrictions on sale for domestic use.* Subject to such directions as may be issued from time to time as to rationing control by the War Food Administrator, no person shall sell any item of new farm machinery and equipment (except poultry equipment, horseshoes, muleshoes, oxenshoes, and harness hardware) which was manufactured for sale in the United States, and which he knows or has reason to believe will not be used in the hands of the ultimate consumer for farm use, except to fill a contract or purchase order bearing a preference rating of AA–4 or higher. If the rated order is for an item which farmers can get only by furnishing purchase certificates under Food Production Order 14 or any other applicable regulation of the War Food Administration, the seller must not fill the order from stock. However, in the following special cases, the seller may sell any of these items from stock for non-farm use on an order rated AA–4 or higher:

(i) If the item is in his stock as a replacement for one previously sold on a rated order, or

(ii) After he has extended the rated order to his supplier and has actually received the particular item, or

(iii) If the rated order is placed with him directly by the Army or Navy (and not indirectly by a contractor or otherwise), or

(iv) If he is a producer (but producers must comply with all applicable orders and regulations, particularly paragraph (e) (4) of this order).

(g) *Excess inventory.* Any producer may sell to any other producer any material in his inventory which is in excess of his requirements for the items of farm machinery and equipment and repair parts authorized to be manufactured under the provisions of this order. Such sales shall be expressly permitted within the terms of paragraph (c) (3) of Priorities Regulation No. 13.

(h) *Conservation of materials.* (1) If any other order of the War Production Board limits the use of critical materials in the manufacture of farm machinery and equipment, non-farm machinery and equipment, or repair parts to a greater extent than this order does, the other order shall govern unless it states otherwise.

(2) The War Production Board may also from time to time issue special orders requiring standardization, simplification, substitution, or other measures to save critical materials in the manufacture of farm machinery and equipment, non-farm machinery and equipment, or repair parts.

(i) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(j) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(k) *Reports.* Each producer who is not a "small producer" must file by the 10th day of each month a report on Form WPB–1768 of his production during the previous month in accordance with the accompanying instructions. The first report must be filed on or before September 10, 1943. In addition, if any serious production trouble or delay develops between dates of filing the above Form WPB–1768, the producer should immediately advise the War Production Board, including the following information where applicable:

(1) The name of any material or component part, the non-delivery of which is, or will be, materially retarding his production.

(2) The name of the manufacturer or supplier with whom the order was placed.

(3) Producer's purchase order number.

(4) Date of the order.

(5) Supplier's order number.

(6) Promised date of delivery.

"Small producers" and all other persons authorized to manufacture under this order who do not report monthly on Form WPB–1768, must file by August 10, 1944, a report on Form WPB–3808 of their production during the entire current quota period starting July 1, 1943. This report should be filled out in accordance with the instructions on the form.

(l) *Applicability of regulations.* This order and all transactions affected by it are subject to all present and future regulations of the War Production Board, unless this order states otherwise.

SCHEDULE A TO L–257

APPLICABLE SCHEDULE FOR CURRENT QUOTA PERIOD JULY 1, 1943 TO JUNE 30, 1944, INCLUSIVE

Manufacturing Quotas for Items of Farm Machinery and Equipment for Domestic Farm Use

Producers are not restricted by any quota percentage in the manufacture of repair parts.

Quotas for new machinery and equipment for farm use are expressed as a percentage of the net shipping weight of each item produced during 1940 or 1941, whichever was higher. In accordance with paragraph (d) (2), production of "bracketed items" may be distributed among all or any one or more items included in the particular bracket, so long as the total weight does not exceed that determined by applying the various quota percentages to the items in the particular bracket.

"Small producers" may use the quota percentage of 100% for any item or items they manufacture, so long as their aggregate production of all items does not exceed 100% of their total 1940 or 1941 production, whichever was higher, as provided in paragraph (d) (4).

Quotas for each item of attachments, unless election is made to lump together all attachments pursuant to paragraph (d) (3), are expressed as the same percentage as that listed for the machine with which the particular attachment is used (except engines).

Any item of farm machinery and equipment not provided for in this Schedule A is not to be manufactured for sale in the United States, unless specifically exempted under the order. Moreover, any manufacture of an item in excess of the percentages established in this Schedule A, even though it may be scheduled for production under paragraph (e), is permitted only if specifically authorized pursuant to paragraph (c) (3) or on appeal.

PART 1029—FARM MACHINERY

[Limitation Order L-257, Schedule B, as Amended July 14, 1944]

APPLICABLE SCHEDULE OF QUOTAS FOR FARM MACHINERY AND EQUIPMENT FOR DOMESTIC FARM USE FOR THE CURRENT QUOTA PERIOD JULY 1, 1944 TO JUNE 30, 1945

§ 1029.17, *Schedule B to Limitation Order L-257.* In accordance with the provisions of Order L-257, this Schedule B is the "Applicable Schedule" for the current quota period July 1, 1944 to June 30, 1945. With a few minor changes, such as consolidations of certain items, it contains the same items and corresponding item numbers as shown on Schedule A. However, there have been important changes in the quota percentages for the new "current quota period", and also more liberal "bracketing" of many items is permitted.

The production quotas set forth in this Schedule B should be used by producers as the basis for planning their production, establishing production schedules and ordering material under CMP. The War Production Board may establish a final distribution pattern which is not in accord with these quotas. Any additional controls or exemptions which may be desirable with regard to production quotas, and any modifications with respect to final distribution of completed machines, will be issued as the need arises. In figuring his anticipated production, each producer must comply with the provisions of the basic Limitation Order L-257 and the explanatory notes to Schedule A, unless this Schedule B states otherwise.

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[Limitation Order L-123, as Amended July 14, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of certain critical materials (including components) and facilities used in the manufacture of general industrial equipment for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.1 *General Limitation Order L-123*—(a) *Equipment which may not be delivered without an AA-5 or better rating.* No person (including a manufacturer, distributor, or dealer) shall accept any order for or deliver, and no person shall accept delivery of, any new item of the following equipment (more fully described in the attached List A) except for an order bearing a preference rating of AA-5 or higher:

1. Air filters.
2. Air washers.
3. Arc welding machines.
4. Baling presses.
5. Compressors.
6. Ceramic machinery and equipment.
7. Concrete products machinery.
8. Dust collectors, industrial.
9. Dynamometers (electric type) and rotary converters.
10. Electric motors and generators (fractional horsepower).
11. Fans, blowers and exhausters.
12. Flexible metallic hose, tubing and fittings.
13. Heat exchangers.
14. High pressure blowers.
15. Lifting magnets.
16. Oil filtering and re-refining machines.
17. Ovens, industrial; drying, curing and finish-baking types.
18. Paper shredders.
19. Pressure vessels (including air receivers).
20. Pumps.
21. Stationary steam engines.
22. Wire working machinery.
23. Insulation blowing machines.
24. Electroplating and anodizing equipment.

Deliveries within a company. The above restriction applies to deliveries from one department (a branch, division, or section) of a single organization to another department of the same organization when the item is for incorporation into other machinery produced by that organization, or when it is for installation and operation for the organization's own use.

The restriction does not apply to deliveries from one department to another of the same organization, of items which it is to resell as such.

(b) *Certain transactions for which no rating is required by this order.* The above restriction does not apply to the following transactions:

(1) *Repair parts.* Delivery of repair parts for any item (but no complete item may be considered as a repair part and delivered under this exemption, even though it could be used as a component part of another item or of machinery not covered by this order).

(2) *Farm supplies.* When items which are farm supplies under Priorities Regulation 19 are delivered to a farmer or dealer upon a certificate in accordance with that regulation.

(3) *Petroleum industry item.* When items used in the petroleum industry and covered by Order P-98-c are delivered in accordance with that order.

(4) *Items no longer needed.* When an item is returned to the person from whom it was obtained, or when it can no longer be used for the purpose for which priorities assistance was given to help obtain it and the holder disposes of it in accordance with applicable provisions of Priorities Regulations 1 or 13.

(5) *Items ordered and put in transit before the restriction became applicable.* The completion of delivery of items which had been placed in the hands of a common or contract carrier for shipment to the customer prior to the date upon which the restriction in (a) became applicable.

(6) *Certain orders rated below AA-5 but unfilled when restriction became applicable.* Delivery to fill any rated order which was rated below AA-5 and could have been filled just before the

date upon which the restriction in (a) became applicable without violating any WPB order, rule or regulation.

(7) *Deliveries of machinery not covered by this order.* The delivery of new machinery, not covered by this order, into which an item has been incorporated as a necessary component part (or which is delivered in unassembled condition with an item which is a necessary component part, for assembly at the site of installation).

(8) *Used items.* The delivery of any item which has been sold to a person acquiring it for use, and put into regular use by him.

(9) *Specific authorizations.* Deliveries specifically authorized or directed by the War Production Board.

(10) *The replacement of a fractional horsepower electric motor or generator which is traded-in when repair is needed.* When a fractional horsepower electric motor or generator is delivered to a householder or other user solely for replacement of a used one which needs repair and the seller, in accordance with his regular business practice, takes the broken down or defective motor or generator in trade and repairs it or delivers it to another person who will repair it (whenever repair is practicable) so that it will be resold under similar conditions (or scraps it promptly when repair is impracticable).

(It must be noted that no repairman or other person may deliver such an item unless he either complies with the foregoing conditions, or receives a AA-5 or higher rating for the delivery from his customer, even though he has obtained the items under a regulation or order which assigns a rating for repair or maintenance purposes, such as the following: CMP Regulations 5, 5A, or 9A; or Orders L-79, P-126, or P-148.)

This exemption permits a dealer not having repair facilities to deliver such a traded-in motor or generator, if it is repairable, to the manufacturer or some other supplier who will repair it or have it repaired within a reasonable time, and get one in exchange without a AA-5 or higher rating. The manufacturer or other supplier who is asked to deliver a new item to a dealer in exchange for a used one is responsible for determining if the traded-in item is repairable.

(11) *Portable air compressors owned and used in a rental business.* When portable air compressors owned by a person engaged in the business of renting them, are leased by the owner. This exemption does not apply to the sale of a new item by such owner, or to the original purchase of the items by him.

(12) *Delivery to a consumer of an item for plumbing or heating repair.* When an item is delivered to a consumer for plumbing or heating repair upon a certificate from the latter in accordance with Order L-79.

(13) *Deliveries of replacement parts for motor vehicles.* When replacement parts for motor vehicles are delivered to any person in accordance with Order L-158.

(c) *Miscellaneous provisions*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as issued and amended from time to time.

(2) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter, in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal. The letter should be filed with the field office of the War Production Board in the district in which is located the plant or branch of the appellant to which the appeal relates.

(4) *Communications.* All reports required to be filed hereunder, and all communications (except appeals) concerning this order, shall, unless otherwise directed, be addressed to the War Production Board, General Industrial Equipment Division, Washington 25, D. C. Ref. L-123.

Issued this 14th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

LIST A

Under paragraph (a) of the order, a rating of AA-5 or better is required for delivery of a new item of equipment in any class described below. Exceptions to this rule are listed in paragraph (b). "Item" means any new piece of equipment. Where a class description covers an item sometimes sold with a motor or other driving unit and sometimes without, in either case the item is subject to the restrictions of the order.

Component parts for the repair or manufacture of an item are not subject to the order as items in that class. However, if a particular part is itself within some other class as described below, then it is subject to the order.

1. *Air filters.* Any equipment or device designed to filter or strain air or other gaseous matter for the purpose of removing dust or other particles of material or odors. Excluded are types using a non-metallic filtering medium, commonly known as the "throw-away" or "replaceable" types.

2. *Air washers.* Any equipment or device designed to wash air, including spray washers and scrubbers.

3. *Arc welding machines.* Any machine or device designed to use, transform, or generate electricity (either direct or alternating current) for the deposit of metal by the electric arc process. Excluded are: Welding cable, electrode holders and arc welding electrodes.

4. *Baling presses.* Any machine or device designed to compress bulky materials into compact bundles or bales. PART 1364—FRESH, CURED AND CANNED MEAT AND FISH PRODUCTS

[RMPR 156]

CANNED MEAT

Maximum Price Regulation No. 156 is redesignated Revised Maximum Price Regulation No. 156 and is revised and amended as set forth herein.

A statement of the considerations involved in the issuance of this Revised Maximum Price Regulation No. 156 has been issued simultaneously herewith and filed with the Division of the Federal Register.*

So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation. In the judgment of the Price Administrator, the maximum prices established by this revised maximum price regulation are and will be generally fair and equitable, and comply with the requirements of Section 3 and the other requirements of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, and will effectuate the purposes of said Act and Executive Orders.

Insofar as this regulation uses specifications and standards which were not, prior to such use, in general use in the trade or industry affected, or insofar as their use was not lawfully required by another Government agency, the Administrator has determined, with respect to such standardization, that no practicable alternative exists for securing effective price control with respect to the commodities subject to this regulation.

§ 1364.356 *Maximum prices for canned meat.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, Executive Orders Nos. 9250 and 9238, Revised Maximum Price Regulation No. 156 (Canned meat), which is annexed hereto and made a part hereof, is hereby issued.

[1] 8 F.R. 2335, 5633, 14216.

"Person" as used in this regulation means any individual, corporation, partnership, association or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of any of the foregoing: *Provided,* That no punishment provided by this regulation shall apply to the United States or to any such government, political subdivision or agency.

(b) *Prohibition against indirect evasion of the price limitations or other provisions of this regulation.* No person shall evade directly or indirectly the price limitations or other provisions of this regulation.

No person shall require a purchaser to buy any other product as a condition of selling the purchased canned meat.

No payments, commissions or allowances shall be made by the buyer or received by the seller for any service or charge not provided for in this regulation.

Without being considered an evasion of the price limitations of this regulation, a change may be made in the formula of a canned meat product not priced under section 11 (a) or (b) which varies the amounts of particular meat ingredients without changing the total quantity of meat ingredients or adding a new meat ingredient: *Provided,* That a change in formula is made necessary by the unavailability of a sufficient quantity of a particular meat ingredient and that the order of predominance by weight of the meat ingredients is not changed and the amount of any meat ingredient is not changed by more than 10 percent in a sterile canned meat product or more than 5 percent in a semi-sterile canned meat product.

The change in the formula of a canned meat product permitted by the preceding paragraph does not refer to a change in a new formula permitted to be established by the preceding paragraph.

(c) *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation or schedule. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

(d) *Penalties for violating provisions of this regulation.* On and after the effective date of this regulation, any person violating any provision of this regulation is subject to the criminal penalties, civil enforcement actions, suits for treble damages and proceedings for suspension of licenses provided by the Emergency Price Control Act of 1942, as amended.

SEC. 4. *Petitions for amendment.* Any person seeking an amendment of any provision of this Revised Maximum Price Regulation No. 156 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1, issued by the Office of Price Administration.

SEC. 5. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the ceiling price in effect at the time of delivery; but no person may, unless authorized by the Price Administrator, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Price Administrator after delivery. Such authorization may be given when a request for a change in the applicable ceiling price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended.

SEC. 6. *Records, reports and notification—*(a) *Current records.* On and after the effective date of this regulation every person making a sale of canned meat subject to this regulation, and every person making a purchase in the course of trade or business of canned meat subject to this regulation, shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, a record of each such sale or purchase, showing the date thereof, the name and address of the seller and buyer, the description, including size of glass or tin container, and the quantity of canned meat sold or purchased and the price charged and received or paid therefor.

(b) *Future records and reports.* Such person shall, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942, submit such reports to the Office of Price Administration and keep such other records in addition to, or in place of, the records required in paragraph (a) of this section, as the Office of Price Administration may from time to time require.

(Insert date)

NOTICE TO WHOLESALERS AND RETAILERS

Our OPA ceiling price for (describe item by brand, type and container size) has been changed by the Office of Price Administration. We are required to inform you that if you are a wholesaler or retailer pricing this item under Maximum Price Regulation No. 421, 422 or 423, you must refigure your ceiling price for this item pursuant to section 6 of Maximum Price Regulation No. 421, 422 or 423, whichever is applicable to you. You must refigure your ceiling price on the first delivery of this item to you containing this notification.

For a period of 60 days after first determining his ceiling price under this regulation, and with the first shipment after the 60-day period to each person who has not made a purchase within that time, the seller shall supply the written notice set forth above by attaching it to, or stating it on, the invoice covering the shipment.

ARTICLE II—SPECIAL PROVISIONS FOR STERILE CANNED MEAT

SEC. 7. *Ceiling prices of sterile canned meat—*(a) *Ceiling prices of sterile canned meat to be determined in accordance with provisions of this section.* Ceiling prices of sterile canned meat shall be computed as provided in this section.

"Sterile canned meat" means canned meat which has been commercially sterilized and packed in a hermetically sealed container and needs no refrigeration while remaining in the sealed container.

(b) *Computation of ceiling prices of sterile canned meat.* The ceiling prices for each brand, type and container size of sterile canned meat shall be computed as follows:

(1) A person making sales or deliveries of sterile canned meat subject to this regulation shall first figure a weighted average of all his ceiling prices for each brand, type and container size of sterile canned meat in effect immediately preceding the effective date of this regulation. The "weighted average price" for each item shall be figured for each price zone customarily used by such person or for each price zone as defined in section 13 (a), at such person's option.

The "weighted average price" for each item in each price zone shall be figured as follows:

(i) In each zone such person shall figure the total volume of sales or deliveries of such item at each sales outlet during January, 1942, or February, 1942 if no sales or deliveries of the particular item at a particular outlet were made in January, 1942, and then add together the volumes of sales of each such item during the period specified to find the total volume of sales of each item during such period in each zone.

Example: In Zone 1, if a person sold during January, 1942, 24 dozen of 4 oz. S. C. Vienna sausage at Sioux City, Iowa, 48 dozen at Indianapolis, Indiana, and 36 dozen at Columbus, Ohio, his volume of sales of this item would be 72 pounds at Sioux City, Iowa, 144 pounds at Indianapolis, Indiana, and 108 pounds at Columbus, Ohio. These sums added together give 324 pounds or 108 dozen cans as the total volume of sales of Vienna sausage in Zone 1.

(ii) In each zone, by using the ceiling prices in effect immediately preceding the effective date of this regulation, such person shall figure the ceiling price value of the total volume of sales or deliveries of each item at each sales outlet as found by following subdivision (i) above, and then add together the ceiling price values for the volumes of sales of each such item to find the total ceiling price value of the total volume of sales or deliveries of each item in each zone as found by following paragraph (i) above.

Example: In Zone 1, if a person's ceiling price in effect immediately preceding the effective date of this regulation for 4 oz. S. C. Vienna sausage at Sioux City, Iowa, is $1.40 per dozen cans; at Indianapolis, Indiana, $1.35 per dozen cans; and at Columbus, Ohio, $1.30 per dozen cans, his ceiling price value for 24 dozen cans or 72 pounds at Sioux City, Iowa, would be $33.60, his ceiling price value for 48 dozen cans or 144 pounds at Indianapolis, Indiana, would be $64.80, and his ceiling price value for 36 dozen cans or 108 pounds at Columbus, Ohio, would be $46.80.

These sums added together give $145.20 as the ceiling price value for 324 pounds or 108 dozen cans of 4 oz. S. C. Vienna sausage in Zone 1.

(iii) Such person shall divide the total ceiling price value for the total volume of sales or deliveries of each item for each zone as found by following subdivision (ii) above by the total volume of sales or deliveries of such item for such zone as found by following subdivision (i) above. The result will give a "weighted average price" for each item in each zone. The "weighted average price shall be rounded to the nearest ½ cent per dozen basis or to the nearest 25 cents per hundredweight basis.

Example: Using the results found in the examples under subdivisions (i) and (ii) above, $145.20, the total ceiling price value, divided by 108 (dozen cans) or 324 (pounds), the volume of sales, gives $1.3450 ($1.3444) as the "weighted average price" per dozen cans of 4 oz. S. C. Vienna sausage or $0.4475 ($0.4481) as the "weighted average price" per pound in Zone 1.

(2) (i) The "weighted average price" in each zone for each brand, type and container size of sterile canned meat heretofore priced under Revised Maximum Price Regulation No. 169 shall be the ceiling price under this regulation for such brand, type and container size of sterile canned meat at the delivery point in such zone: *Provided*, That a person making sales or deliveries of such sterile canned meat subject to this regulation shall continue to allow all the deductions or discounts which were customary during the 90-day period prior to March 9, 1942.

The canned meat products referred to in this paragraph (b) (2) (i) of section 7 consist of all-beef canned meat products and sausage containing any proportion of beef and veal, the original ceiling prices of which under Revised Maximum Price Regulation No. 169 were reduced pursuant to § 1364.476 (1) which was added by Amendment No. 15 to that regulation.

(ii) The "weighted average price" in each zone for each brand, type and container size of corned beef hash and chili con carne (with or without beans) shall be the ceiling price under this regulation for such brand, type and container size of such sterile canned meat at the delivery point in such zone: *Provided*, That a person making sales or deliveries of such sterile canned meat subject to this regulation shall continue to allow all the deductions or discounts which were customary during the 90-day period prior to March 9, 1942.

(3) For each brand, type and container size of sterile canned meat other than that priced under paragraph (b) (2) of this section 7, a person making sales or deliveries of such sterile canned meat subject to this regulation

(i) Shall take the "weighted average price" for each zone as determined under paragraph (b) (1) (iii) of this section and determine the weighted average price for 100 pounds of such product.

Example: Using the result in the example under paragraph (b) (1) (iii) of this section, the "weighted average price" of $1.3450 per dozen cans of 4 oz. S. C. Vienna sausage or $0.4475 per pound will give a "weighted average price" of $44.75 for 100 pounds of this product.

(ii) Shall determine the amount of each meat ingredient not including variety meats and edible by-products described in Maximum Price Regulation No. 398, contained in 100 pounds of such finished product.

Example: Taking the formula for the S. C. Vienna sausage used in the examples above, assume that 60 pounds of cutter and canner boneless processing beef and 40 pounds of regular pork trimmings are contained in 100 pounds of such Vienna sausage.

(iii) Shall determine the cost of each meat ingredient, not including variety meats and edible by-products described in Maximum Price Regulation No. 398, contained in 100 pounds of such finished product. The cost of pork shall be considered to be the applicable price or prices listed in Schedule I of § 1364.35 of Revised Maximum Price Regulation No. 148 as established by Amendment No. 5 to that regulation. The cost of beef and veal shall be considered to be the applicable Zone 4 price or prices listed in §1364.452, Schedule I, and § 1364.467, Schedule IV, respectively of Revised Maximum Price Regulation No. 169 as established by Amendment No. 15 to that regulation. The cost of lamb and mutton shall be considered to be the applicable price or prices listed in § 1364.177, Appendix B of Revised Maximum Price Regulation No. 239 as established by Amendment No. 4 to that regulation.

Example: Using the result obtained in the example under subdivision (ii) above, the cost of 60 pounds of cutter and canner boneless processing beef would be $9.90. This sum is obtained by taking the Zone 4 price of cutter and canner boneless processing beef in § 1364.452, Schedule I, of Revised Maximum Price Regulation No. 169 as established by Amendment No. 15, which is $16.50 per hundredweight. This price per hundredweight makes $0.1650 as the price per pound. This figure multiplied by 60 gives $9.90 as the cost of 60 pounds. The cost of 40 pounds of regular pork trimmings would be $7.20. This sum is obtained by taking the price of regular pork trimmings in Schedule I of § 1364.35 of Revised Maximum Price Regulation No. 148 as established by Amendment No. 5, which is $18.00 per hundredweight. This price per hundredweight makes $0.1800 as the price per pound. This figure multiplied by 40 gives $7.20 as the cost of 40 pounds.

(iv) Shall compute an amount which is 10 percent of the total cost of the meat ingredients determined under subdivision (iii) above.

Example: The total cost of the meat ingredients of S. C. Vienna sausage determined under subdivision (iii) above is $9.90 plus $7.20 which gives $17.10. 10 percent of $17.10 is $1.71.

(v) Shall subtract from the figure obtained in subdivision (i) above the figure obtained in subdivision (iv) above, and use the result to determine the "adjusted weighted average price" for the unit of weight of the sterile canned meat product started with in making the computation in subdivision (i) above. The "adjusted weighted average price" shall be rounded to the nearest ½ cent per dozen basis or to the nearest 25 cents per hundredweight basis.

Example: The figure obtained in the example under subdivision (i) above is $44.75. The figure obtained in the example under subdivision (iv) above is $1.71. The latter figure is subtracted from the former which gives $43.04. Rounding this figure to the nearest 25 cents gives $43.00, the "adjusted weighted average price" for 100 pounds of S. C. Vienna sausage in Zone 1. The "adjusted weighted average price" per pound would be $0.4300. The "adjusted weighted average price" for three pounds or 1 dozen 4 oz. cans would be 3 times $0.4300 which gives $1.2900. The "adjusted weighted average price" per dozen cans of 4 oz. S. C. Vienna sausage in Zone 1 is $1.2900.

(4) The "adjusted weighted average price" in each zone for each brand, type and container size of sterile canned meat other than that priced under paragraph (b) (2) of this section shall be the ceiling price under this regulation for such brand, type and container size of sterile canned meat at the delivery point in such zone: *Provided*, That a person making sales or deliveries of such sterile canned meat subject to this regulation shall continue to allow all the deductions or discounts which were customary during the 90-day period prior to March 9, 1942.

SEC. 8. *Filing of ceiling prices of sterile canned meat; prohibition against selling or delivering sterile canned meat without filing of ceiling prices; ceiling prices for sterile canned meat carrying a new brand name*—(a) *Filing of ceiling prices of sterile canned meat.* Not later than seven days after the effective date of this regulation each person making sales or deliveries of sterile canned meat subject to this regulation shall file with the Office of Price Administration of Washington, D. Material shall not be considered filed until it has been received by the Office of Price Administration at Washington, D. C.

(c) *Ceiling prices for sterile canned meat carrying a new brand name.* If a person sells a brand, type and container size of sterile canned meat subject to this regulation for which such person has no ceiling price under section 7 and such sterile canned meat differs from a brand, type and container size of sterile canned meat for which such person has a ceiling price under section 7 only in the brand name used, the ceiling price for such brand, type and container size of sterile canned meat for which such person has no ceiling price under section 7 shall be the same as the ceiling price for such brand, type and container size of sterile canned meat for which such person has a ceiling price under section 7 at the delivery point in the same zone: *Provided*, That no person shall sell or deliver any sterile canned meat for which a ceiling price is established by this paragraph until such person has filed with the Office of Price Administration, Washington, D. SEC. 10. *Adjustment of ceiling prices*—(a) *Adjustment of ceiling prices on the initiative of the Price Administrator.* The ceiling prices determined under section 7, 8 or 9 shall be subject to adjustment at any time by the Price Administrator.

(b) *Applications for price adjustments*—(1) *Who may apply.* Any person subject to this regulation may apply for an increase in his ceiling price of a brand, type and container size of sterile canned meat if his ceiling price (minus transportation costs) under this regulation for such brand type and container size of sterile canned meat is below his total factory costs for such sterile canned meat product.

(2) *Terms of an adjustment.* A price increase under this paragraph (b) will be granted sufficient to cover the total factory costs for such sterile canned meat product: *Provided*, That the ceiling price or prices of some other sterile canned meat product or products of the applicant, produced in substantially the same quantity, shall be reduced in an amount which will equal the amount of the adjustment under this paragraph.

(1) Adding to the base price specified for such product in section 12 (a) the zone addition specified in section 12 (b) for a carload delivery, or less-than-carload delivery, whichever is made, for the zone in which actual physical possession of the product is taken by the buyer, and then

(b) *Ceiling prices on deliveries to retailers of semi-sterile canned meat products given dollar-and-cents prices.* The ceiling price for a delivery to a retailer of a semi-sterile canned meat product meeting the specifications for such product established by section 13 (b) shall be determined by:

(1) Adding to the base price specified for such product in section 12 (a) the zone addition specified in section 12 (b) for a carload delivery, or less-than-carload delivery, whichever is made, for the zone in which actual physical possession of the product is taken by the buyer, and then

(2) Subtracting from the figure obtained by following paragraph (b) (1) above 25 cents per hundredweight if delivery of the product is not made to the buyer at the buyer's place of business, and then

(3) Adding to the figure obtained by following paragraphs (b) (1) and (b) (2) above, 6 percent of such figure.

(c) *Permitted sales.* All sales under section 11 (a) or (b) shall be delivered sales to the buyer's place of business, except that a sale may be made involving delivery of the product to the buyer at the seller's place of business for transportation in a truck, owned or controlled by the buyer, to the buyer's place of business located in the same zone as the seller's place of business. In the latter type of sale the 25 cents per hundredweight deduction shall be applicable.

(d) *Ceiling prices of semi-sterile canned meat products not given dollar-and-cents prices.* (1) If a person makes a delivery of a semi-sterile canned meat product, other than canned whole ham, which does not meet the minimum specifications of one of the semi-sterile canned meat products set out in section 13 (b), his ceiling price for such delivery shall be determined in accordance with the provisions of section 7, substituting for the purpose of this paragraph (d) (1) the term "semi-sterile canned meat" whenever the term "sterile canned meat" is used in section 7, exclusive of the definition of "sterile canned meat" contained therein.

Semi-sterile canned meat products priced under this section 11 (d) refer to canned meat products which are different from, as well as those which are similar to, the canned meat products described in section 13 (b).

(2) The provisions of sections 8, 9 and 10 shall also be applicable to a product priced under this section 11 (d), substituting for the purposes of this paragraph (d) (2) the term "semi-sterile canned meat" whenever the term "sterile canned meat" is used in sections 8, 9 and 10.

PUBLIC SERVICE ELECTRIC AND GAS CO.

ORDER FOR HEARING

JULY 12, 1944.

Upon consideration of the reclassification and original cost studies of Public Service Electric and Gas Company filed on March 18, 1940 and April 30, 1942; the "Report on the Reclassification and Original Cost Studies of Electric Plant as at January 1, 1938" made by the staff of this Commission and served upon Public Service Electric and Gas Company with the order of this Commission dated November 2, 1943; the response thereto by Public Service Electric and Gas Company filed on February 26, 1944; and other related information on file with this Commission;

It appears to the Commission that:

(a) The above-mentioned studies and response by Public Service Electric and Gas Company do not set forth sufficient information which would justify or explain the Company's failure to adjust its books of account in accordance with the "Report on the Reclassification and Original Cost Studies of Electric Plant as at January 1, 1938" made by the staff of this Commission and properly dispose of the amounts therein classified in Accounts 100.5, Electric Plant Acquisition Adjustments; 107, Electric Plant Adjustments; 108.15, Common Utility Plant Acquisition Adjustments; and 108.17, Common Utility Plant Adjustments;

(b) It is advisable, necessary and proper in the public interest that a public hearing be held for the purpose of requiring Public Service Electric and Gas Company to show cause why this Commission should not order the adjustment of the Company's accounts to conform with the above-mentioned "Report on the Reclassification and Original Cost Studies of Electric Plant, as at January 1, 1938" and dispose of the amounts therein classified in the adjustment accounts;

The Commission, therefore, orders that:

(A) A public hearing be held on September 18, 1944, at 10:00 a. m. (e. w. t.) in the hearing room of the Board of Public Utility Commissioners of New Jersey, 1060 Broad Street, Newark, New Jersey, and at the hearing Public Service Electric and Gas Company show cause why the Federal Power Commission should not find and determine by order that adjusting entries be made to bring its books of account in conformity with the "Report on the Reclassification and Original Cost Studies of Electric Plant as at January 1, 1938" and dispose of the amounts therein classified in Accounts 100.5, Electric Plant Acquisition Adjustments; 107, Electric Plant Adjustments; 108.15, Common Utility Plant Acquisition Adjustments; and 108.17, Common Utility Plant Adjustments;

(B) The Board of Public Utility Commissioners of New Jersey may participate in the hearing as provided in Part 39, § 39.4 of this Commission's rules of practice and Regulations prescribed pursuant to the provisions of the Federal Power Act.

[RO 17, Administrative Exception Order 24]

WEIGERT-DAGEN, WOHL SHOE CO. AND L. GOLDMAN SHOE CO.

ORDER GRANTING ADJUSTMENT

The above petitioners, Weigert-Dagen, Wohl Shoe Company and L. Goldman Shoe Company, are duly registered distributing establishments under Ration Order 17. Weigert-Dagen and Wohl Shoe Company are both located in St. Louis, Missouri. L. Goldman Shoe Company is located in Denver, Colorado.

Under Ration Order 17 huaraches not released by the Collector of Customs be-

fore June 1, 1943, must be sold as rationed shoes. The petitioners imported approximately 15,000 pairs of huaraches into the United States from Mexico prior to June 1, 1943, but were unable to have them released by the Collector of Customs before that date and as a result these huaraches are rationed. Petitioners have tried to sell the huaraches for ration currency but are unable to do so as consumers are unwilling to surrender a war ration shoe stamp for this type of shoe. The petitioners, in order to avoid a severe financial loss, request permission to sell the huaraches ration-free.

The date of release by the Collector of Customs was selected because it is an objective cut-off date. Since the date the huaraches were imported into the United States will be just as effective in determining their ration status, the relief requested in this case may be granted in this and all similar cases without impairing the effectiveness or the policy of Ration Order 17.

It is hereby ordered, That the petitioners, Weigert-Dagen, Wohl Shoe Company and L. Goldman Shoe Company, be permitted to transfer ration-free the Mexican huaraches that were imported into the United States prior to June 1, 1943. Before transferring any of the above described huaraches ration-free, the petitioners must apply to the District Office serving the locality in which they are located for a supply of nonrationed stickers (Form R–1711). At the time application is made to the District Office, the applicant must also furnish proof, such as reference to customs entries or other evidence, which will satisfy the District Office that the huaraches to be transferred ration-free were imported into the United States prior to June 1, 1943. If the District Office approves the application, it shall issue to the applicant non-rationed stickers in an amount equal to the number of pairs of huaraches to be transferred ration-free. The applicant shall attach one non-rationed sticker to each pair of huaraches to be transferred ration-free. The huaraches may then be transferred ration-free. If such huaraches are offered for sale in any notice or advertisment, they shall be referred to as "Huaraches imported before June 1, 1943." Any unused stickers shall be returned to the District Office within 30 days after receipt of them by the applicant.

It is hereby further ordered, That any other persons similarly situated may be given the same relief on similar conditions upon application to and written authorization from the Director of the Miscellaneous Products Rationing Division, Office of Price Administration, Washington, D. C.

Issued and effective this 14th day of July 1944.

CHARLES F. PHILLIPS,
Deputy Administrator.

(b) *Maximum price.* On and after the effective date of this order, regardless of any contract, agreement or other obligation, no handler shall sell or deliver, or agree to sell or deliver, fluid milk in bulk (other than in glass or paper containers) bought from producers, associations of producers, or other handlers, to any person other than stores, hotels, restaurants, and institutions, and no such person shall in the course of trade or business, buy or agree to buy such fluid milk from any such handler at prices higher than the following:

(1) *Primary handlers.* Subject to the limitations set forth in subparagraph (4) hereof, the maximum price at which a primary handler may sell such fluid milk shall be determined as follows:

(ii) A handling charge not exceeding 20¢ per cwt. exclusive of standardization, pasteurization and transportation charges hereinafter set forth.

(3) The following butterfat differential shall be applicable only in the event the butterfat content of milk sold by a handler varies from the butterfat content of said milk at the time of the purchase:

Butterfat content	Delivered into containers of more than 10 gallon capacity, including tank trucks and tank cars	Delivered in containers of 10 gallon capacity or less
3.5%	$3.75	$3.80
Less than 3.5%	$3.75 less 5¢ for each 1/10 of 1% under 3.5% butterfat content.	$3.80 less 5¢ for each 1/10 of 1% under 3.5% butterfat content.
More than 3.5%	$3.75 plus 5¢ for each 1/10 of 1% over 3.5% butterfat content.	$3.80 plus 5¢ for each 1/10 of 1% over 3.5% butterfat content.

(5) Where milk is purchased at different prices, and/or of different butterfat content, and is thereafter commingled, the weighted average, both as to purchase price and as to butterfat content, shall be used in calculating maximum resale prices under this paragraph (b).

In other words, not more than one standardization and one pasteurization charge shall be added to the maximum prices herein established.

(9) In the event that a handler delivers fluid milk to a place designated by the purchaser, transportation charges may be added to the maximum prices set forth above in addition to any other charges permitted hereby. Such transportation charges shall, in no event, exceed:

(i) When by common carrier, the lowest available common carrier rate.

(ii) When by contract carrier, the lowest available contract carrier rate.

(iii) When by the seller's own equipment, the highest lawful rate for such service under any applicable maximum price regulation or order.

Such charges for transportation shall be separately stated on the invoice.

(10) *Prohibition against payment of bonus.* The purchase price to which the handling, standardization, and pasteurization charges set forth above may be added, shall in no event include any bonus or additional payments, based upon quality, quantity, special equipment or any other special consideration.

(i) For each 1/10 of 1% by which the butterfat content is increased on resale, 5¢ may be added.

(ii) For each 1/10 of 1% by which the butterfat content is decreased on resale, 5¢ shall be deducted.

(4) *Provided, however,* That in no event shall the total of all handling charges, exclusive of standardization, pasteurization, and transportation charges hereinafter set forth, exceed 60¢ per cwt. for milk delivered into containers of a capacity greater than 10 gallons including tank trucks or tank cars, and 65¢ per cwt. for milk delivered into containers of 10 gallons capacity or less, nor shall the maximum price, exclusive of such charges, for any fluid milk sold by either a primary or secondary handler, exceed the following:

SECURITIES AND EXCHANGE COMMISSION.

[File Nos. 31-368 and 31-446]

DETROIT EDISON CO.

ORDER REOPENING RECORD AND RECONVENING HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 10th day of July, A. D. 1944.

The Commission having on August 5, 1940 entered an order under section 2 (a) (8) of the Public Utility Holding Company Act of 1935 denying an application by The Detroit Edison Company to be declared not to be a subsidiary of The North American Company, but granting the application of The Detroit Edison Company to be declared not to be a subsidiary of American Light & Traction Company and its parents, The United Light and Power Company and The United Light and Railways Company, all registered holding companies, on the basis of a satisfactory showing by the applicant that American Light & Traction Company, The United Light and Power Company and The United Light and Railways Company had failed to obtain representation on its board of directors and had not participated in its corporate or operating affairs, and that, in general, the applicant was not at the time controlled and its management and policies were not subject to a controlling influence, directly or indirectly, by American Light & Traction Company, The United Light and Power Company or The United Light and Railways Company; and

It appearing from the Commission's public official files that The North American Company has disposed of substantially all of its stock interest in The Detroit Edison Company, thereby reducing its ownership from 19.28% to approximately .1% of such company's voting securities, that American Light & Traction Company is the largest single stockholder of The Detroit Edison Company, owning beneficially 20.27% of its voting securities, and that on February 14, 1944, two nominees who are officers and directors of American Light & Traction Company, The United Light and Power Company and The United Light and Railways Company were designated for election to the board of directors of The Detroit Edison Company and were elected thereto at the request of American Light & Traction Company; and

It therefore appearing to the Commission that there has been a sufficient change of circumstances to make it necessary and appropriate that the record in this matter be reopened and that the hearing therein be reconvened for the purpose of adducing additional evidence so as to enable the Commission to determine whether The Detroit Edison Company is now controlled or its management and policies are now subject to a controlling influence, directly or indirectly, by American Light & Traction Company, The United Light and Power Company or The United Light and Railways Company (either alone or pursuant to an arrangement or understanding with one or more other persons) so as to make it necessary or appropriate in the public interest or for the protection of investors or consumers that The Detroit Edison Company be subject to the obligations, duties and liabilities imposed by the Act upon subsidiary companies of registered holding companies and whether the Commission's previous order granting the application of The Detroit Edison Company with respect to American Light & Traction Company, The United Light and Power Company and The United Light and Railways Company should be revoked;

It is ordered, That the record in this matter be reopened and that the hearing therein be reconvened on August 22, 1944 at 10:00 a. m., E. W. T., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, in such room as the hearing room clerk will at that time designate. At such hearing cause shall be shown why the order of the Commission dated August 5, 1940, granting the application by The Detroit Edison Company with respect to American Light & Traction Company, The United Light and Power Company, and The United Light and Railways Company should not be revoked;

It is further ordered, That Richard Townsend or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice;

It is further ordered, That notice of this hearing be given to The Detroit Edison Company, American Light & Traction Company, The United Light and Power Company, and The United Light and Railways Company by registered mail, and to all other persons by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935, and by publication in the FEDERAL REGISTER. All persons desiring to be heard or otherwise wishing to participate in the proceedings shall notify the Commission, in the manner prescribed by Rule XVII of its rules of practice, on or before August 18, 1944.

By the Commission.

Distribution of total payments among producers, including cooperative associations of producers, shipping milk to the handler shall be made equitably among all such producers, but such distribution may reflect not more than customary differentials between producers who are members of cooperative associations (including such associations themselves), and producers who are not members of such associations, and the total amount paid by the handler to all producers for all milk received from them shall be at least equal to the product of the quantity of all milk received from producers by such handler multiplied by the prices specified in this section.

6. This offer may be partially or wholly revoked or modified by publication of a notice thereof in the FEDERAL REGISTER by Commodity at any time but, notwithstanding any such revocation or modification, settlement shall be made as provided in section 2 hereof with respect to any milk disposed of pursuant to the terms and conditions hereof prior to such revocation or modification.

[1] "Shipping point" means the place in or near the producing area where the kind of vegetable being priced is prepared for shipment and first loaded on cars for rail shipment or on trucks for truck shipment. Prices established for shipping points are not grower ceiling prices unless the grower is the shipper.

The prices named include all costs of harvesting, hauling, packing and inspection, and no additional charge may be made for containers or for any other materials furnished or services rendered. For sales in bulk the prices will be 1 cent less per pound than the named prices.

No person who does not pack and ship the kind of vegetable being priced and who does not regularly operate a packing and shipping plant for that commodity, will be permitted to purchase acreage at a price which, after the cost of harvesting, hauling, packing and inspection, have been added, results in a price higher than the maximum price, f. o. b. shipping point.

The above prices will be incorporated in an amendment to Maximum Price Regulation No. 426 having substantially the same form as Amendment 18, except that for each major producing area of each commodity a maximum price for f. o. b. sales will be provided. These f. o. b. prices will reflect the freight advantage which the respective producing areas have over the basing points listed. In no case will the f. o. b. price be lower than the applicable basing point price. As in Amendment 18, maximum prices for sales delivered to wholesale receiving points will be the applicable basing point price plus freight from the basing point and protective services.

Where two basing points are listed for one period, the eastern basing point will be applicable for sales in the eastern part of the country and the western basing point will be applicable for sales in the western part. The line will be drawn North and South at Chicago or Denver or whatever point is indicated by the relative volume of eastern and western supplies and the normal distribution of the commodity.

Issued this 14th day of July 1944.

JAMES G. ROGERS, Jr.,
Acting Administrator.

For the reasons which will be set forth in the statement of considerations accompanying the amendment to Maximum Price Regulation 426 which will establish the prices specified in the foregoing notice, I hereby approve the proposed prices for lima beans, cauliflower, celery and tomatoes, and find that they are necessary to aid in the effective prosecution of the war.

FRED M. VINSON,
Economic Stabilization Director.

PART 1598—GENERAL REGULATIONS

LICENSED SHIP SUPPLIERS PERMITTED TO BUY SET-ASIDE AND RESTRICTED FOOD

War Food Order No. 74, as amended, 9 F.R. 4319, 4321 (formerly Food Distribution Regulation No. 3, as amended, 8 F.R. 13880, 8 F.R. 14017, 8 F.R. 15655), is hereby further amended to read as follows:

§ 1598.7 *Purchase and sale of set-aside and restricted food by licensed ship suppliers*—(a) *Definitions.* For the purposes of this order:

(1) "Ship operator" means any person conducting the business of vessels for the account of the United States under a general agency form of service agreement approved by the Administrator of the War Shipping Administration; or operating, as the owner or owner's agent, a vessel time chartered to the United States, represented by the Administrator of the War Shipping Administration; or operating a vessel, the services of which are employed by the United States, represented by the Administrator of the War Shipping Administration; or operating a vessel designated by the War Shipping Administration, which is owned, chartered, or operated by any allied or neutral country.

(2) "Set-aside food" means that portion of any of the foods listed in Schedule A hereof, as amended from time to time, held by any person pursuant to a food order.

(3) "Restricted food" means that portion of any of the foods listed in Schedule B hereof, as amended from time to time, which a person restricted by a food order has sold or may sell without such sales being charged against his quota under the food order.

(4) "Designated food" means that portion of any of the foods listed in Schedule C hereof, as amended from time to time, held by any person pursuant to a food order.

(5) "Person" means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether incorporated or not, and includes the States and their political subdivisions and agencies. Separate branches or outlets of any firm shall be considered separate persons.

(6) "Director" means the Director of Distribution, War Food Administration.

(7) "Ship supplier" means any person who during the last six months of 1942 was regularly engaged in operating a bona fide business of supplying foodstuffs directly to ship operators for ship stores.

(8) "Ship stores inventory" means that quantity of set-aside, restricted, and designated food which the ship supplier has obtained for sale as ship stores by use of certificates under this order, under War Food Order No. 73, as amended, 9 F.R. 4321, 4319 (formerly Food Distribution Regulation No. 2, as amended, 8 F.R. 7523, 8 F.R. 15655), or by special authorization from the Director, and which is (i) owned by him and in his possession, (ii) in transit to him, (iii) on consignment to him and in his possession, or (iv) in storage subject to his disposition. It also includes all food purchased or ordered by a ship supplier through the use of certificates under this order which has not been delivered, and includes foods bought through a ship supplier but to be delivered directly to the ship operator by the person from whom it was ordered by the ship supplier.

(9) "Ship stores quota" means a quantity of any set-aside, restricted, or designated food equal to the total quantity of such food sold directly to ship operators by a ship supplier (each outlet considered separately), during any two calendar months during the period July 1, 1942 to June 30, 1943.

(b) *License required of ship suppliers.* A ship supplier in order to obtain any set-aside, restricted, or designated foods for delivery to ship operators must hold a valid and effective license under the provisions of this order. Separate licenses are required for each outlet selling food for ship stores regardless of common ownership of two or more of such outlets.

(c) *Issuance of licenses.* All applications for licenses under this order shall be submitted on such forms and contain such information as the Director may require. Application forms may be obtained from regional offices of the Office of Distribution, War Food Administration, or regional offices of War Shipping Administration. Applications shall be submitted to the War Shipping Administration for approval. Upon the receipt of an application properly executed, and approved by the War Shipping Administration, the Director shall issue the license unless he has reason to believe that the applicant did not, cannot, or will not comply with the provisions of this order. Licenses issued hereunder may not be transferred in any manner. At any time the War Shipping Administration may withdraw its approval given hereunder, and thereupon shall advise the Director promptly.

(d) *Sales of food acquired under this order by ship suppliers.* A licensed ship supplier may sell or deliver food contained in his ship stores inventory only to a ship operator for immediate delivery on board a vessel, or to another licensed ship supplier who furnishes the certificate provided for in this order. Licensed ship suppliers shall not sell or deliver any such food to any other person or to any ship operator for purposes other than immediate delivery on board a vessel.

(e) *Acquisition of set-aside and restricted food by ship suppliers.* The ship stores inventory of any set-aside, restricted, or designated food of any licensed ship supplier may not exceed his ship stores quota. Within this limitation, and not otherwise, licensed ship suppliers may purchase set-aside and restricted food pursuant to this order. A ship supplier may not acquire any item of food under this order unless he has a ship stores quota for that item of food. If, on the effective date of a license issued under this order, a licensed ship supplier has a total ship stores inventory greater than his ship stores quota, he shall not purchase any of the kinds of set-aside, restricted, or designated food which he holds in excess of his ship stores quota until he has reduced his holdings below his ship stores quota.

(f) *Certifications.* Licensed ship suppliers shall attach to each of their purchase orders for set-aside and restricted food under this order a certificate in substantially the following form:

I hereby certify and represent to the War Food Administrator and to the seller that the quantities of the commodities listed herein and included in the attached purchase order are and may be ordered pursuant to the provisions of WFO 74, with the terms of which I am familiar.

Date _____ Name of firm _____

Address _____

License number _____ Authorized representative _____

This certificate shall not be used for purchases of other than set-aside, restricted, or designated food for sale as ship stores. This certificate must also be attached to all requests for transfers of food between divisions, branches, or outlets of one firm or company.

(g) *Sales of set-aside, restricted, and designated food to ship suppliers.* Notwithstanding the provisions of any food order now or hereafter issued, unless specifically prohibited therein, any licensed ship supplier may purchase set-aside, restricted, or designated food for sale as ship stores from any person and any person may sell or deliver set-aside, restricted, or designated food for sale as ship stores to licensed ship suppliers: *Provided,* That all such purchases are certified as provided in paragraphs (f) and (h). All such sales or deliveries may be reported and considered by the sellers in the same manner as sales to the War Shipping Administration. Purchases of set-aside, restricted, and designated food by licensed ship suppliers for purposes other than sale to ship operators are unaffected by this order.

(h) *Acquisition of designated food by ship suppliers.* Designated food may be purchased by licensed ship suppliers only by complying with provisions of paragraphs (e), (f), and (g) hereof and, in addition thereto, by securing special authorization therefor from the Director. Applications for such authorization shall be sent to the Director and shall specify the items desired and the quantity, quality, and container size desired. The name of the person from whom it is proposed to buy these foods shall also be stated. Applications may be made by mail or by telegraph. The certificate used for the purchase of designated food shall contain the following statement in addition to the statement prescribed by paragraph (f) hereof:

The purchase of all designated food listed hereon has been authorized by the Director of Distribution, War Food Administration.

(i) *Purchases from intermediate distributors.* A ship supplier may purchase set-aside and restricted food for ship stores directly from the person who is required to set aside food or who is restricted by any food order, or may purchase such food indirectly from jobbers, wholesalers, or other intermediate distributors. Where such purchases are made indirectly, the intermediate distributor shall make copies of the certificates provided in paragraph (f) hereof, certified by him to be correct, or may make lists of all or part of the food items on such certificates, certified by him to be correct. Any person may sell to any intermediate distributor the quantities of set-aside food or restricted food covered by such certified copy or certified list furnished to him and may treat such sales in the same manner as sales of ship stores made directly to licensed ship suppliers.

(j) *Change in ship stores quotas.* (1) When recommended by the War Shipping Administration, the Director may authorize an emergency increase in the ship stores quota of any licensed ship supplier. The Director may limit the duration of such increase.

(2) The Director may increase or reduce the ship stores quota of any licensed ship supplier, and may establish a ship stores quota for any licensed ship supplier.

(k) *Stockpiles established at the request of the War Shipping Administration.* None of the provisions of this regulation shall apply to any acquisition or disposition by licensed ship suppliers of food acquired by them for stockpiling purposes pursuant to written instruc-

tions concerning these stockpiling operations, issued by the War Shipping Administration, and subject to the direction and control of the War Shipping Administration.

(l) *Records and reports.* (1) Every licensed ship supplier must submit a report on form FDR 3–2 to Administrator, WFO 74, War Food Administration, Washington 25, D. C., not later than the 10th day of each calendar month, which report shall give data relative to food handled under the order during the preceding calendar month.

(2) The Director shall be entitled to obtain such other information from and require such other reports and the keeping of such records by any person as may be necessary or appropriate in his discretion to the enforcement of the provisions of this order.

(3) Every person subject to this order shall, for at least two years (or for such other period of time as the Director may designate), maintain an accurate record of his transactions in set-aside, restricted, and designated food, and a record of his ship stores inventory at the end of each calendar month. Every person receiving certificates or lists as provided in paragraphs (d), (g), and (i) hereof, shall preserve them for at least two years.

(m) *Audits and inspections.* The Director shall be entitled to make such audit or inspection of the books, records and other writings, premises and inventories of any person affected by this order and to make such investigations as may be necessary or appropriate, in his discretion, to the enforcement or administration of the provisions of this order.

(n) *Petition for relief from hardship.* Any person affected by this order who considers that compliance herewith would work an exceptional and unreasonable hardship on him may apply, in writing, for relief to the Director, setting forth in such petition all pertinent facts and the nature of the relief sought. The Director may thereupon take such action as he deems appropriate and such action shall be final.

(o) *Revocation of license.* At any time, the Director may suspend or revoke the license granted under this order to any licensed ship supplier. Upon being notified by the War Shipping Administration that it has withdrawn its approval under the provisions of paragraph (c) of this order with respect to any licensee hereunder, the Director shall revoke the license of that licensee. A ship supplier whose license is suspended or revoked by the Director shall dispose of his ship stores inventory according to instructions issued by the Director.

(p) *Violations.* The Director may prohibit any person who violates any provision of this order from receiving, making any deliveries of, or using any materials listed in Schedule A, Schedule B, or Schedule C hereof, or as such schedules may hereafter be amended. In addition, any person who wilfully violates any provision of this order is guilty of a crime and may be prosecuted under any or all applicable laws. Civil action may also be instituted to enforce any liability or duty created by, or to enjoin any violation of, any provision of this order.

(q) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: Administrator, WFO 74, War Food Administration, Washington 25, D. C.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Regs., Serial No. 514]

PART 292—EXEMPTIONS AND CLASSIFICATIONS

ALASKAN AIR CARRIERS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of July 1944.

The Civil Aeronautics Board, acting pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 1001, and Title IV thereof, and deeming its action necessary to carry out the provisions of said act and to exercise its powers and perform its duties thereunder, hereby makes and promulgates the following regulation:

1. *Addition of new paragraphs.* Section 292.2 (7 F.R. 11108, 8 F.R. 15731) of the Economic Regulations is hereby amended by adding thereto the following additional paragraphs:

§ 292.2 *Classification and exemption of Alaskan air carriers.* * * *

(e) *Place of filing.* Notwithstanding the requirements of any other regulation, order, or rule of the Board, all documents authorized or required by the Civil Aeronautics Act, or any regulation, order, or rule of the Board issued thereunder, to be filed with the Board by any Alaskan air carrier or in connection with air transportation performed or sought to be performed by such carrier shall be filed with the Alaska Office of the Board. The date of filing with the Alaska Office shall constitute the date of filing with the Board.

(f) *Duplicate originals required.* In addition to the number of copies of each document required to be filed by the regulation, order, or rule under which it is filed, one additional signed copy shall be filed, and if the regulation, order, or rule under which it is filed requires verification of documents filed thereunder, said additional signed copy shall also be verified. Two signed copies will constitute duplicate originals; one duplicate original will be transmitted to the offices of the Board in Washington, D. C., by the Alaska Office, and the other will be retained in the files of the Alaska Office.

(g) *Conformity to rules.* All such documents shall in all other respects conform to the requirements of the regulation, order, or rule of the Board under which they are filed. Upon written application, stating good and sufficient reason therefor, the Director of the Alaska Office may issue a written waiver of any such requirement if he finds that such waiver will not interfere with the work of the Board and will relieve the applicant from any unnecessary burden. He may at any time require any person filing such documents to file additional copies thereof, and to make service upon persons other than those specified in the pertinent regulation, order, or rule of the Board, if he finds such requirement is necessary in the public interest or in the interest of efficiency and expedition in the work of the Board. And if he is of the opinion that a formal or informal application, complaint or petition does not sufficiently set forth the material required to be set forth by any applicable regulation, order or rule of the Board, or is otherwise insufficient, he may advise the party filing the same of the deficiency and require that any additional information be supplied by amendment. And in case he deems an answer to formal complaints and petitions desirable, he may so notify the parties.

(h) *Posting and publicity of documents.* The Alaska Office copy of all documents subject to this regulation which are required by the Act, or by the regulations, orders, or rules of the Board thereunder, to be posted in the Office of the Secretary of the Board shall be posted in the Office of the Director of the Alaska Office; and the Alaska Office copy of documents which are required by section 1103 of the act to be preserved as public records in the custody of the Secretary of the Board, shall be preserved as public records in the custody of the Director of the Alaska Office under such reasonable arrangements as he may make for public inspection thereof. Such posting and preservation as public records shall be in addition to that required of the Secretary of the Board.

(i) *Docket of Alaska Office.* A complete docket of all formal proceedings by or against persons seeking authority to engage in air transportation solely within the Territory of Alaska, shall be maintained in the offices of the Board at Washington, D. C., and in the Board's Alaska Office. Hearings and conferences in such proceedings shall be assigned, and procedural notices (other than notice of oral argument before the Board) and examiners' reports will be served, by the Alaska Office. Subject to the provisions of paragraphs (e), (f) and (g) of this section, all hearings and conferences in such proceedings shall be held in accordance with the Board's rules of practice (Part 285 of the Economic Regulations). Exceptions to the examiner's report in any such proceeding and briefs in support of such exceptions, may be filed with the Board at its offices in Washington, D. C., in which event one copy of such exceptions and briefs shall be sent by air mail to the Director of the Alaska Office by the party so filing; or may be filed with the Board at its Alaska Office, in which event they will be transmitted by that office to the Board's office at Washington, D. C. If any of the parties to any such proceedings so desire, the Director of the Alaska Office may on behalf of the Board hear oral argument upon exceptions to the examiner's report and shall transmit a transcript of such oral argument to the Board. Such oral argument before the Director of the Alaska Office shall be in lieu of oral argument before the Board.

(j) *Recommendations by Alaskan Office concerning regulations.* Unless otherwise specifically directed by the Board, the Director of the Alaska Office may submit drafts of proposed regulations, or of amendments or modifications of regulations, to the Alaskan air carriers for comment. Upon receipt of such comment, he shall transmit them, together with his recommendations, to the Board for consideration. The Board may revise any such proposed regulation, amendment or modification, and, in respect of any substantial revision, may direct the Director of the Alaska Office to submit such revision to the Alaskan air carriers for further comment.

2. *Effective date.* This amendment of § 292.2 of the Economic Regulations shall take effect on August 15, 1944: *Provided, however,* That in the event the Director of the Alaska Office certifies to the Board at any time prior to August 15, 1944, that the Board's office in Alaska is not open for business, this amendment shall not take effect unless and until the Board shall so provide by further regulation. Copy of such certification shall be served by the Director of the Alaska Office upon

each Alaskan air carrier by registered mail and upon such other persons as the Board may direct.

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue

Subchapter A—Income and Excess-Profits Taxes

[T. D. 5392]

PART 29—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941

DISCRETIONERY TRUSTS FOR SUPPORT AND MAINTENANCE OF DEPENDENT BENEFICIARIES OF GRANTOR

Regulations 111 amended to conform to section 134 of the Revenue Act of 1943, relating to discretionary trusts for support and maintenance of dependent beneficiaries of the grantor.

In order to conform Regulations 111 (26 CFR, Cum. Supp., Part 29) to section 134 of the Revenue Act of 1943 (Public Law 235, 78th Congress, 2nd Session), enacted February 25, 1944, such regulations are amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 29.167–1 of Regulations 111 the following:

SEC. 134. TRUSTS FOR MAINTENANCE OR SUPPORT OF CERTAIN BENEFICIARIES. (Revenue Act of 1943.)

(a) *Income for benefit of grantor.* Section 167 (relating to income for benefit of grantor) is amended by adding at the end thereof the following subsection:

(c) Income of a trust shall not be considered taxable to the grantor under subsection (a) or any other provision of this chapter merely because such income, in the discretion of another person, the trustee, or the grantor acting as trustee or cotrustee, may be applied or distributed for the support or maintenance of a beneficiary whom the grantor is legally obligated to support or maintain, except to the extent that such income is so applied or distributed. In cases where the amounts so applied or distributed are paid out of corpus or out of other than income for the taxable year, such amounts shall be considered paid out of income to the extent of the income of the trust for such taxable year which is not paid, credited, or to be distributed under section 162 and which is not otherwise taxable to the grantor.

(b) *Taxable years to which applicable—*(1) *General rule.* Except as provided in paragraph (2), the amendments made by subsection (a) shall be applicable with respect to taxable years beginning after December 31, 1942, unless a taxable year of the trust beginning in 1942 ends within a taxable year of the grantor beginning in 1943, in which case, except as provided in paragraph (2), such amendments shall not be applicable to such taxable year of the grantor.

(2) *Retroactive effect.* The amendments made by subsection (a) shall also be applicable with respect to all taxable years to which such amendments are not made applicable under paragraph (1), in the same manner as if such amendments had been a part of the revenue laws applicable to such taxable years, but only if there are filed with the Commissioner (in accordance with regulations prescribed by him with the approval of the Secretary) at such time and by such persons as may be prescribed under such regulations, signed consents that there shall be paid, at such time as the Commissioner may prescribe, all of the taxes under Chapter I of the Internal Revenue Code or under the corresponding provisions of prior revenue laws which would have been paid for the taxable years concerned if such amendments had been a part of the revenue laws applicable to such taxable years.

(3) *Deficiencies and overpayments.* The period of limitations provided in sections 275 and 276 of the Internal Revenue Code or corresponding provisions of a prior revenue law on making of assessments and the beginning of distraint or a proceeding in court for collection shall with respect to any deficiency resulting from any such consents include one year immediately after the date such consents were filed, and such assessment and collection may be made notwithstanding any provision of the internal revenue laws or any rule of law which would otherwise prevent such assessment and collection. The period within which claim for credit or refund may be filed, or credit or refund allowed or made if no claim is filed, with respect to any overpayment by the grantor resulting from the consents shall include one year immediately after the date of the filing of the consents, and credit or refund may be allowed or made notwithstanding any provision or rule of law (other than this subsection, section 3760 of the Internal Revenue Code or a corresponding provision of prior law, relating to closing agreements, and section 3761 of the Internal Revenue Code or a corresponding provision of prior law, relating to compromises) which

would otherwise prevent such credit or refund. No interest shall be allowed or paid on any overpayment, or assessed on any deficiency, resulting from the application of paragraph (2) of this subsection.

PAR. 2. Section 29.167–1 is amended as follows:

(A) By striking out the parenthetical clause in the third paragraph of paragraph (b) and inserting in lieu thereof the following: "(except as provided in section 22 (k), 167 (c), or 171)".

(B) By striking out the last sentence of the fourth paragraph of paragraph (b).

PAR. 3. There is added immediately following the last paragraph of § 29.167–1 the following new sections:

§ 29.167–2 *Discretionary trusts for maintenance or support of certain beneficiaries.* Section 167 (c) provides that income shall not be taxable to the grantor under section 167 (a) or any other provision of chapter 1 of the Internal Revenue Code merely because such income, in the discretion of another person, the trustee, or the grantor acting as trustee or cotrustee, may be applied or distributed for the support or maintenance of a beneficiary, such as the wife or child of the grantor, whom he is legally obligated to support, except to the extent that such income is actually so applied or distributed. Where income has actually been so applied, such income is taxable to the grantor, whether or not the trust income may also be applied or distributed for purposes other than the maintenance or support of a beneficiary whom the grantor is legally obligated to support.

The grantor of a trust continues to be taxable under section 167 with respect to such income as may, in the discretion of persons lacking a substantial adverse interest, be applied in discharge of his obligations other than his obligation of support or maintenance falling within section 167 (c). Thus, if the grantor creates a trust, the income of which may, in the discretion of a person lacking a substantial adverse interest, be applied in the payment of the grantor's debts, including the payment of his rent or other household expenses, such income is taxable to the grantor regardless of whether it is actually so applied.

Section 167 (c) is not applicable if discretion to apply or distribute the trust income rests solely in the grantor or in the grantor in conjunction with other persons unless the grantor has such discretion as trustee.

Section 167 (c) does not affect the present scope of sections 22 (k) and 171 (relating to alimony and separate maintenance payments taxable to a wife or former wife). Nor does section 167 (c) alter the provisions governing the taxability of trust income to the grantor under some other provision of law, as for example, section 22 (a).

Section 167 (c) has no application where, under the terms of the trust, income is required to be applied to the support or maintenance of a beneficiary whom the grantor is legally obligated to support.

Section 167 (c) provides that in those cases where amounts applied or distributed for support or maintenance of beneficiaries whom the grantor is legally obligated to support are paid out of corpus or out of other than income for the taxable year such amounts are to be considered paid out of income to the extent of the income of the trust for such taxable year which is not paid, credited, or to be distributed under section 162 and which is not otherwise taxable to the grantor. For example, a trust indenture provides for the annual payment of income, not exceeding $7,000, to the grantor's adult son whom he is not legally obligated to support; for the payment of premiums on policies of insurance on the life of the grantor in an amount not to exceed $3,000 per annum; and for the application, in the trustee's discretion, of any part of the remaining income or of corpus for the support of the grantor's minor daughter. The entire income for the taxable year is $12,000, the trustee pays $7,000 of such income to the son and $3,000 thereof for insurance premiums, and $6,000 is applied for the support of the minor daughter. The grantor is taxable under section 167 (c) with respect to $2,000 of the sum applied to the support of the daughter, whether paid out of income or out of principal ($12,000 less $7,000 paid, credited or distributed under section 162, and less $3,000 taxable to the grantor under section 167 (a) (3)).

Section 167 (c) is applicable with respect to taxable years beginning after December 31, 1942, unless a taxable year of the trust beginning in 1942 ends within a taxable year of the grantor beginning in 1943, in which case the section shall not be applicable to such taxable year of the grantor except as provided in § 29.167–3. Thus, if the returns of the trust are made on the basis of a fiscal year ending June 30, and the grantor's returns are made on the calendar year basis, section 167 (c) will be effective with respect to the trust commencing with its fiscal year beginning July 1, 1943. Since the grantor's return for the calendar year 1943 includes the income of the trust's fiscal year beginning on July 1, 1942, and ending on June 30, 1943, the amendments will first be applicable with respect to the grantor to his calendar year 1944.

If section 167 (c) is not invoked retroactively by the filing of consents, as provided in § 29.167–3, the grantor must include in his tax returns for taxable years beginning prior to January 1, 1943, and for a taxable year beginning in 1943 in a case described in the next preceding paragraph all the income of the trust which, in the discretion of persons lacking a substantial adverse interest, could be applied for the support or maintenance of beneficiaries whom the grantor was legally obligated to support, regardless of whether the income was so applied. The grantor, however, is not taxable on such unapplied income of the trust for those taxable years covered by any agreement entered into with the Commissioner pursuant to the provisions of I. T. 3609, Internal Revenue Bulletin 1943–10, p. 40.

§ 29.167–3 *Retroactive application of section 167 (c).* Except for taxable years of the grantor for which allowance of credit or refund for any overpayment of tax by the grantor is barred by section 3760 of the Internal Revenue Code or a corresponding provision of prior law, relating to closing agreements, or section 3761 of the Internal Revenue Code or a corresponding provision of prior law, relating to compromises, the grantor may elect to have section 167 (c) applied retroactively upon the proper filing of consents for any taxable period of the grantor notwithstanding any other provision of the revenue laws or any rule of law, such as a prior judicial determination of the tax for the taxable period of the grantor. The election to have the section so applied is made by filing in duplicate with the Commissioner of Internal Revenue at Washington, D. C., written consents to the payment of all taxes under chapter 1 of the Internal Revenue Code or under the corresponding provisions of prior revenue laws which would have been paid for the taxable years covered by the consents if section 167 (c) had been a part of the revenue laws applicable to such taxable years.

Such consents must be filed on or before whichever of the following dates is the later: (1) January 1, 1945, or (2) six months after the due date of the return of the grantor for his last taxable year to which section 167 (c) is not applicable unless the required consents are filed. Such consents must be executed by the fiduciary of the trust and all beneficiaries who would have been taxable on any income of the trust if the provisions of section 167 (c) had been a part of the revenue laws applicable to the years for which the consents are filed. If any person required to sign a consent is not in existence or is under legal disability, the consent must be signed by his legal representative. Amended returns shall accompany the consents when filed and the payment of any tax shown by such returns to be due shall be made at that time. There shall also be filed with the consents (1) a statement by the fiduciary and each beneficiary, to the extent such parties may be entitled to refund or credit by reason of the taxability of the trust income to the grantor under the rule of Helvering v. R. Douglas Stuart (317 U. S. 154), whereby they agree not to file or prosecute any claim for refund or credit based upon such ground and (2) a statement by the grantor agreeing to indemnify the Commissioner with respect to any such refund or credit. The Commissioner may grant a reasonable extension of time for the making of the election, if request for such extension is filed with the Commissioner prior to the date heretofore fixed for the filing of the consent or within a reasonable time thereafter, and a showing is made to his satisfaction (1) that unusual circumstances exist, such as a case involving taxation of the grantor under the rule of Helvering v. Clifford, 309 U. S. 331, and (2) that the granting of the extension will not jeopardize the interests of the Government.

Consents filed must be applicable to all taxable years of the trust or beneficiaries corresponding to those taxable years of the grantor for which the grantor requests retroactive application of section 167 (c). Such consents must also be applicable to all other taxable years of the trust or beneficiaries for which the filing of a claim for credit or refund by the trust or beneficiaries is not barred by any provision or rule of law or with respect to which the allowance of a credit or refund to the trust or beneficiaries without the filing of a claim is not so barred.

The period of limitations on making of assessments and the beginning of distraint or a proceeding in court for collection shall with respect to any deficiency resulting from the filing of consents include one year immediately after the filing of the consents and such assessment and collection may be made notwithstanding any provision of the internal revenue laws or any rule of law (such as a prior judicial determination of the tax for the taxable period of the person signing the consent) which would otherwise prevent such assessment and collection.

The period within which claim for credit or refund may be filed, or credit or refund allowed or made if no claim is filed, with respect to any overpayment by the grantor resulting from the consents, shall include one year immediately after the date of the filing of the consents, and credit or refund may be allowed or made notwithstanding any provision or rule of law (other than section 134 (b) of the Revenue Act of 1943, sections 3760 and 3761 of the Internal Revenue Code or corresponding provisions of prior laws) which would otherwise prevent such credit or refund.

No interest shall be allowed or paid on any overpayment or assessed on any deficiency resulting from the filing of the consents.

The acceptance by the Commissioner of the filing of consents, and of any payment of tax accompanying the consents, shall not preclude the Commissioner from asserting that the grantor is taxable on income of the trust for the taxable years involved under some provision of law other than section 167 (c).

Regulations 103 and prior income tax regulations are amended by incorporating therein the provisions of §§ 29.167–2 and 29.167–3 of Regulations 111 to the extent necessary to accord with section 134 of the Revenue Act of 1943 as applicable to years beginning prior to January 1, 1942.

(Sec. 134, Rev. Act of 1943 (Pub. Law 235, 78th Cong.), enacted Feb. 25, 1944, and secs. 62 and 167, I.R.C. (53 Stat. 32, 68, 26 U.S.C., 1940 ed., 62, 167))

PART 3026—PETROLEUM PRODUCTS

[Preference Rating Exclusion Order M-201 as Amended July 15, 1944]

The fulfillment of the requirements for the defense of the United States has created a shortage in certain petroleum products which will result, in certain areas, in a shortage in the supply of such petroleum products for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3026.1 *Preference Rating Exclusion Order M-201*—(a) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to the applicable provisions of any priorities regulation issued by the War Production Board, as amended from time to time.

No person shall require the application of a preference rating assigned by any regulation, order, direction or certificate to the purchase, sale or delivery of restricted products and, except as provided in paragraph (c) (2) hereof, no such purchase, sale or delivery of restricted products shall be deemed to bear any preference rating whatsoever.

(2) No preference rating shall be assigned to any purchase, sale or delivery of restricted products (other than to a purchase, sale or delivery of fuel oil for use in ocean-going vessels) by any regulation, order, direction or certificate hereafter issued by or under the authority of the War Production Board, except by or pursuant to a regulation or order hereafter issued by the War Production Board specifically assigning the rating and excepting the transaction from the provisions of this order.

§ 3287.26 *Preference Rating Order P-141*—(a) *Definitions.* For the purpose of this order:

(1) "Operator" means any individual, partnership, association, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not, located in the United States, its territories, or possessions, engaged in or constructing facilities for the purpose of engaging in, the operation of a public sanitary sewerage system or a public sanitary sewerage system combined with a storm sewerage system, whether or not such operator has applied the preference ratings herein assigned.

(2) "Controlled material" means steel—both carbon (including wrought iron) and alloy—copper (including copper base alloys) and aluminum, in each case only in the forms and shapes indicated in Schedule I of CMP Regulation No. 1.

(3) "Material" means any commodity, equipment, accessory, part, assembly or product of any kind.

(4) "Maintenance" means the minimum upkeep necessary to continue an operator's property and equipment in sound working condition.

(5) "Repair" means the restoration of an operator's property and equipment to sound working condition after wear and tear, damage, destruction of parts or the like, have made such property or equipment unfit or unsafe for service.

(6) "Operating supplies" means:

(i) Material which is essential to the operation of the system specified in paragraph (a) (1) and which is generally charged to operating expense account.

(ii) Material for an addition to or an expansion of sewerage system or works, other than buildings, provided that such an addition or expansion shall not include any work order, job, or project, in which the cost of material shall exceed $1,500 and provided that no single construction project shall be subdivided into parts in order to come below these limits.

(7) Material for "maintenance", "repair" and "operating supplies" includes any material which is essential to minimum service standards, and does not include material for the improvement of an operator's property or equipment through the replacement of material which is still usable.

(8) "Supplier" means any person with whom a purchase order or contract has been placed for delivery of material to an operator, or to another supplier.

(9) "Calendar quarterly period" means the several three months of the year commencing January 1, April 1, July 1, and October 1, or the operator's customary accounting period closest to such period.

(10) "Inventory" means all new or salvaged material in the operator's possession, unless physically incorporated in plant, without regard to its accounting classification, excluding, however, material which is segregated for use in additions and expansions specifically authorized under paragraph (g) (2) of this order or by an operative preference rating order or certificate issued by the War Production Board.

(b) *Preference ratings.* A preference rating of AA-1 is hereby assigned to orders to be placed by an operator for material to be used for maintenance or repair, and for operating supplies.

(c) *Controlled materials; steel, copper and aluminum.* Subject to the quantity restrictions contained in paragraph (f) of this order, any operator requiring delivery of any controlled material for maintenance, repair or operating supplies may obtain the same by placing on his delivery order the certification required in paragraph (e) (1) hereof. An order bearing such certification shall constitute an authorized controlled material order.

(d) *Restrictions on use of symbol and ratings.* (1) The allotment symbol and preference ratings hereby assigned shall not be used by an operator or supplier to obtain deliveries of scarce material, the use of which could be eliminated without serious loss of efficiency by substitution of less scarce material or by change of design.

(2) The preference ratings assigned by paragraph (b) shall not be used to obtain any item included in Lists A or B of Priorities Regulation No. 3.

(e) *Application and extension of ratings; application of CMP allotment symbol.*—(1) *Certification.* The AA-1 rating assigned by paragraph (b) of this order and the CMP allotment symbol MRO-P-141 may be applied by an operator to deliveries of material for use in maintenance, or repair, or as operating supplies only by use of a certification in substantially the following form:

Preference Rating AA-1, CMP Allotment Symbol MRO-P-141. The undersigned purchaser certifies, subject to the penalties of Section 35 (A) of the United States Criminal Code, to the seller and to the War Production Board, that to the best of his knowledge and belief the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, to receive the item(s) ordered for the purpose for which ordered, and to use any preference rating or allotment number or symbol which the undersigned has placed on this order.

Name of operator

Signature of designated official

Such certification shall be signed manually or as provided in Priorities Regulation No. 7.

(2) The ratings assigned by this order may be extended by a supplier in the manner provided in Priorities Regulation No. 3, and CMP Regulation No. 3.

(f) *Restrictions on deliveries, inventory and withdrawals.*—(1) *Deliveries and withdrawals.* No operator shall, during any calendar quarterly period, accept delivery of any material or withdraw from inventory any material, to be used for maintenance or repair or as operating supplies or for any other purpose (except material to be segregated for use in extensions specifically authorized under paragraph (g) (2) of this order or by an operative preference rating order or certificate issued by the War Production Board), the aggregate dollar value of which shall exceed the aggregate dollar value of materials used for maintenance or repair or as operating supplies, during the corresponding calendar quarterly period of the year 1942, or at the operator's option, twenty-five per cent of the aggregate dollar value of materials used for said purpose during the operator's fiscal year ending closest to December 31, 1942.

(2) *Inventory.* No operator shall at any time, accept delivery of any material if the operator's inventory will, by virtue of such acceptance, be in excess of a practical working minimum.

(3) *Exceptions.* The provisions of paragraph (f) (1) of this order are subject to the following exceptions:

(i) An operator who, during the calendar year 1942 (or fiscal year ending closest to December 31, 1942), used for maintenance, repair, and as operating supplies, materials of the aggregate value of not exceeding $5,000, and whose estimated requirements for materials to be used for maintenance, repair and as operating supplies during any calendar year (or corresponding fiscal year) do not exceed $5,000 may, during such year, exceed the quantity restrictions prescribed by paragraph (f) (1) of this order. If the actual requirements of material for maintenance, repair and operating supplies for such year should prove to be in excess of $5,000, such operator shall not accept any deliveries of material or withdraw from inventory any material to be used for maintenance, repair or as operating supplies if such deliveries or withdrawals, when taken together with other deliveries or withdrawals within such year, would, in the aggregate, exceed $5,000. In such case the operator may apply for specific authorization to exceed such quantity restrictions pursuant to the provisions of paragraph (f) (4) hereof.

(ii) An operator may, in any calendar quarterly period, increase scheduled deliveries, and withdrawals of material required for maintenance or repair or as operating supplies over the limits prescribed in paragraph (f) (1) of this order, in proportion to the increase in the load on the system during the preceding calendar quarterly period of the year 1942 corresponding to the calendar quarterly period in question, determined by a measurement of the average daily flow for the two comparative periods: *Provided*, That in determining the average daily flow of sewage, any flow of surface storm water which enters the system shall not be taken into account.

(iii) An operator may, in any calendar quarterly period, accept deliveries of material or make withdrawals from inventory of material, necessary for the maintenance or repair of the operator's property or equipment which is damaged by acts of the public enemy, sabotage, explosion, or fire or by flood, storm or other similar climatic conditions: *Provided*, That if the restrictions of paragraph (f) (1) are exceeded because of such deliveries or use, a full report thereof shall be made within thirty days after such delivery or withdrawal, to the War Production Board.

(iv) An operator may, in any calendar quarterly period, accept delivery of material, having in the aggregate, a dollar value of not more than the dollar value of material of the same class taken from the operator's inventory for delivery to other persons authorized to accept delivery under applicable regulations of the War Production Board but only if, and to the extent that such taking has reduced the operator's inventory of material below a practical working minimum.

(v) An operator may, during any calendar year (or his fiscal year), withdraw from inventory, material, having in the aggregate, a dollar value of not more than the dollar value of usable material of the same class salvaged from plant during such year.

(vi) The provisions of paragraph (f) (1) and (f) (2) shall not apply to fuel or to chemicals for sewage treatment.

(4) The War Production Board, on its own initiative, or on application of any operator by letter, in triplicate, addressed to the Government Division, War Production Board, Washington 25, D. C., Ref: P-141, may modify the limitations on practical working minimum inventory, and on scheduling or accepting deliveries, or on use or withdrawals, set forth in this paragraph (f).

(g) *Restrictions on construction of sewerage facilities.* No operator shall construct any sewerage facilities, including but not limited to sewer pipelines, manhole structures, pumping stations, sewage disposal or treatment plants and connections, and no operator shall, in case of contract construction, accept deliveries of material for such purposes except as follows:

(1) An operator may construct an addition to or an expansion of, sewerage system or works, other than buildings: *Provided*, That such addition or expansion shall not include any work order, job or project in which the cost of material shall exceed $1,500: *And provided*, That no single construction project shall be subdivided into parts in order to come below these limits: *And further provided*, That in making house connections or extension of line to serve premises, no iron or steel pipe shall be used except the minimum quantities required in making necessary connections.

(2) An operator may construct an extension of sewerage facilities, other than buildings, to serve premises which are being built or remodeled under authority of any Preference Rating order of the P-55 series, a specific authorization issued pursuant to Conservation Order L-41 or pursuant to any Petroleum Administrative Order issued by the Petroleum Administrator for War if all of the following conditions are satisfied:

(i) The cost of material for such extension does not exceed $5,000 but exceeds $1,500.

(ii) The extension does not duplicate an adequate service already installed.

(iii) No other operator can render the same service with lesser amounts of critical material.

(iv) The extension will not cause an overload on system including sewage disposal plants.

(v) The operator has completed Form WPB-3445 and delivered it to the builder of the premises to be served for attachment to the builder's application for L-41 approval. Preference ratings and allotment number to acquire material required for such extensions are assigned by paragraph (h) of this order.

(3) In addition to the authorization contained in paragraphs (g) (1) and (g) (2) an operator may construct sewage facilities of any kind if such construction is specifically authorized by the War Production Board. Application should be made on Form WPB-617 (formerly PD-200) or on such other form as may be prescribed. The following preference rating orders or certificates include permission for construction under this order although they do not say so: P-19-h, CMPL-127, CMPL-224. In all other cases a preference rating is not enough unless the instrument which assigns the rating also states that construction is permitted. However, any operator who prior to January 15, 1944, has been specifically authorized in writing by the War Production Board to use the lowest rating assigned to a rated project to obtain material to construct sewerage facilities to serve such project may use such rating to obtain material required for that purpose within the limits of said authorization.

(h) *Assignment of preference rating and CMP allotment symbol for extensions authorized under paragraph (g) (2).* (1) The preference rating AA-3 is hereby assigned to orders for material other than controlled material, and the abbreviated allotment number S2 is hereby assigned to orders for controlled material to be placed by an operator for use in the construction of extensions of facilities authorized by paragraph (g) (2) of this order or to replace in inventory material so used.

(2) The preference ratings and allotment number assigned by paragraph (h) (1) may be applied by an operator by using the certification provided in CMP Regulation No. 7. An order for controlled material bearing such certification and allotment number shall constitute a controlled material order.

(i) *Sales of material from inventory.* Any operator may sell to another operator, material from seller's inventory in excess of a practical minimum working inventory: *Provided*, That (1) a preference rating of AA-5 or higher assigned by this order or by any preference rating certificate, or (2) a specific direction issued by the War Production Board, is applied or extended to the operator selling such material.

(j) *Audits and reports.* (1) Each operator and each supplier who applies the preference ratings or allotment symbol hereby assigned, and each person who accepts a purchase order or contract for material to which a preference rating or symbol is applied, shall submit from time to time to an audit and inspection by duly authorized representatives of the War Production Board.

(2) Each operator and each such supplier shall execute and file with the War Production Board, such reports and questionnaires as said Board shall from time to time request, subject to approval by the Bureau of the Budget as required under the Federal Reports Act.

(3) Each operator shall maintain a continuing record of inventory and of segregated material in his possession and all material used by him for maintenance, repair or as operating supplies.

(k) *Communications to the War Production Board.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed by the War Production Board be addressed to the War Production Board, Government Division, Washington 25, D. C., Ref: P-141.

(l) *Violations.* Any person who wilfully violates any provisions of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and, upon conviction, may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

(m) *Revocation or amendment.* This order may be revoked or amended at any time as to any operator or any supplier. In the event or revocation, deliveries already rated pursuant to this order shall be completed in accordance with said rating, unless the rating has been specifically revoked with respect thereto. No additional applications of the ratings to any other deliveries shall thereafter be made by the operator or supplier affected by such revocation.

(n) *Applicability of regulations.* (1) Preference Rating Order P-141 is issued in lieu of Preference Rating Order P-46 in so far as it affects public sanitary sewerage systems as defined in paragraph (a) (1) hereof and any reference in any order or regulation of the War Production Board to said Preference Rating Order P-46 shall constitute a reference to orders in the P-141 series.

(2) This order and all transactions affected hereby, except as herein otherwise provided, are subject to all applicable regulations of the War Production Board as amended from time to time, *Provided*, That none of the provisions of CMP Regulations No. 5 or No. 5A shall apply to operators as defined in paragraph (a) (1) hereof, and no such operator shall obtain any material under the provisions of either of said regulations.

Issued this 15th day of July 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-586]

GOLDEN PEACOCK CO., INC.

Golden Peacock Company, Incorporated, is engaged in the packing and distribution of cosmetics for an affiliated corporation. Its home office and plant are located in Paris, Tennessee. For the period from July 1 through December 31, 1943, the company accepted delivery of, or had set aside, 111,029 dozen new glass containers of less than two-gallon capacity, in excess of the quota permitted for that period by Supplementary Order L-103-b, and during the same period accumulated approximately a nine-month inventory of the containers, in violation of Priorities Regulation No. 1. During the period from October 1 through December 31, 1943, the company used new fibre shipping containers in excess of the quota permitted for that period by Limitation Order L-317, the excess being 12,426 pounds or 134,422 square feet. The company, through its officers, was familiar with Order L-103-b, Priorities Regulation No. 1 and Order L-317 and the company was sufficiently negligent so that its violations must be deemed wilful.

As a result of these violations, scarce materials have been diverted from the war effort to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.586 *Suspension Order No. S–586.* (a) Golden Peacock Company, Incorporated, its successors and assigns, shall limit its total use of new glass containers for the period from July 1 through December 31, 1944, to 50% of the usage permitted for that period by Order L–103–b, unless otherwise authorized in writing by the War Production Board.

(b) Golden Peacock Company, Incorporated, its successors and assigns, shall reduce its total use of new fibre shipping containers, for the period from July 1 through December 31, 1944, by 12,426 pounds or 134,422 square feet under the usage permitted for that period by Order L–317, unless otherwise authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve Golden Peacock Company, Incorporated, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on the date of issuance, and shall expire on December 31, 1944.

Issued this 15th day of July 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–588]

JOSEPH VITTORIO

Joseph Vittorio of 10 Swiss Street, Providence, Rhode Island, began construction of a single-family dwelling on Lots 34 and 35, Plat Card No. 51, on the southeasterly side of Hope Street in North Providence, Rhode Island, without authorization from the War Production Board. The cost of this construction was $3500., which amount exceeded the limit of $200. permitted by Conservation Order L–41 and was in violation of that order. Joseph Vittorio was aware of War Production Board restrictions on construction, and doing this construction without authorization constituted a wilful violation of Conservation Order L–41. This violation of Conservation Order L–41 has diverted critical materials to uses not authorized by the War Production Board and has hampered and impeded the war effort of the United States of America. In view of the foregoing, it is hereby ordered, that:

§ 1010.588 *Suspension Order No. S–588.* (a) Neither Joseph Vittorio, his successors or assigns, nor any other person, shall do any construction on the premises known as Lots 34 and 35, Plat Card No. 51, on the southeasterly side of Hope Street, North Providence, Rhode Island, including putting up or altering the structure, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Joseph Vittorio, his successors or assigns, from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on July 15, 1944.

Issued this 15th day of July 1944.

PART 921—ALUMINUM AND MAGNESIUM DIVISION

[Supplementary Order M–1–l, as Amended July 15, 1944]

ALUMINUM

Section 921.11 (*Supplementary Order M–1–l*) is hereby amended to read as follows:

§ 921.11 *Supplementary Order M–1–l—*(a) *Use of aluminum allowed for certain specific purposes.* Any person may use aluminum for any purpose mentioned in List A at the end of this order.

(b) *Use of aluminum in repairs.* Aluminum may be used in making specific repairs for a used article, or in making repair parts for a specific used article in need of repair.

(c) *Use of aluminum as substitute for other metal.* (1) In addition to the uses mentioned in List A, any person may use aluminum as a substitute for any other metal in the manufacture of any article (including parts, components and subassemblies) if he does not make more units for civilian purchase orders in any quarter than the number of units of the same size he lawfully made out of other metal for civilian purchase orders in the second quarter of 1944. Also, without regard to second quarter production, aluminum may be used as a substitute for any other metal allowed by WPB orders in the following cases:

(2) A person whose output of an article is expressly limited to a specific number of units per quarter or a specified dollar amount (either under a WPB order or by an authorized production schedule under the Controlled Materials Plan or Priorities Regulation 11B) may use aluminum in place of other permitted metal as long as he does not exceed these limits.

(3) A person whose output is not restricted by a specific unit or dollar limit but is covered by a WPB order restricting his use of other metal during a given period to a specified percentage of his previous use, may use aluminum as a substitute for other metal as long as the total number of units of the article which he makes during the period, and the size of the units, is not greater when he uses aluminum for all or part of his production than it could be under the WPB order if he used other metal exclusively. (For example, under Order L–73 no one may use in the manufacture of certain types of office supplies more iron and steel in any quarter than 12½% of the total weight of all metals used by him during 1940. As applied to a particular manufacturer of steel calendar stands, this has the effect of restricting his production to 200,000 per quarter. If he wants to make some or all of his calendar stands out of aluminum, he still may not make a total of more than 200,000 per quarter, including those made of aluminum, and he may not make them any bigger than they would be if he made them of steel.)

(4) A person whose output is not restricted in any of the ways mentioned in (2) or (3) above, and who has been specifically allotted steel or copper for the third quarter of 1944 to make an article under CMP, may use aluminum to take the place of the allotted steel or copper as long as he does not increase his total production in the quarter (including aluminum, copper and steel) over the number of units of the same size he could have made with the allotted steel or copper only. In the fourth quarter of 1944 and subsequent quarters, his production will be controlled by the size of his allotments of controlled materials (including aluminum), determined in accordance with regular WPB procedures.

(d) *Restrictions in other orders on use of aluminum superseded, but scrap, pigment and composition not affected.* All restrictions in other orders of the WPB as to the use of aluminum (whether referred to by name or as a metal) no longer apply. However, restrictions as to the quantity of an article which may be made remain applicable even if it is made of aluminum as permitted by this order. Also, this order does not affect aluminum scrap, which is defined in and controlled by Order M–1–d, or aluminum pigment and composition, which are defined in and controlled by Order M–1–g.

(e) *Other uses of aluminum.* No one may use aluminum for a purpose not allowed by paragraphs (a), (b) and (c) above without the specific authorization in writing of the WPB. If a person wants such authorization, and does not need an exemption from any order of the WPB (or an authorized production schedule) governing the manufacture of the article he wishes to make, he may apply by letter to the Aluminum and Magnesium Division, War Production Board, Washington 25, D. C., Reference M–1–l. The letter should be filed in duplicate and should contain substantially the information, numbered as shown below:

(1) Weight, form and alloy of aluminum, for which authorization to use is requested.

(2) The number of months the quantity of aluminum requested will cover estimated requirements.

(3) The part to be fabricated, or other use to be made of the aluminum requested.

(4) The product into which such part will be incorporated, and end-use of the product.

(5) If previous requests for this use have been authorized or denied, give reference number of most recent authorization or denial.

(6) Manpower information on form WPB–3820, or, if granting the authorization will not involve any increase in number of production employees in applicant's plant, a statement to that effect.

(f) *Appeals for relief from quantity restrictions.* If a person wants to use aluminum as a substitute for other metal to make an article in greater quantity than is allowed by paragraph (c) of this order, and believes that his case involves exceptional conditions warranting relief, he may appeal to the WPB as explained in Priorities Regulation 16. The appeal should be filed with the Aluminum and Magnesium Division as an appeal from this order except that if he also wants relief from quantity restrictions imposed by another order of the WPB governing the article he is making, he should appeal from the other order.

(g) *How to get aluminum.* Aluminum may be obtained as explained in CMP Regulations. Allotments may be of the deferred kind described in Direction 5A to CMP Regulation 1 in cases where aluminum is to be used for purposes not previously permitted and in other cases where the WPB considers deferred allotments desirable to prevent possible interference with war requirements.

(h) *Reports.* All persons shall file such inventory and other reports as may be prescribed from time to time by the War Production Board.

(i) *Delivery for unlawful uses forbidden.* No person shall deliver any aluminum if he knows or has reason to believe that it is to be used in violation of the terms of this order.

(j) *Definitions.* For the purpose of this order:

(1) "Aluminum" means any material the principal ingredient of which by either weight or volume is metallic aluminum, which material is in ingot or similar raw form or in the form of finished or semi-finished parts, assemblies or products of any kind, but not including any material in the form of aluminum scrap (which is defined in and controlled by Order M–1–d), or aluminum pigment or aluminum composition (which are defined in and controlled by Order M–1–g).

(2) "Use aluminum in manufacture" means to melt, roll, forge, cast, extrude, draw, turn, spin, fabricate or process in any other way, or assemble or incorporate in assemblies, or to consume or otherwise use in the course of manufacture, any aluminum; but does not include the installation of a finished product or repair part for the ultimate consumer.

(3) "Civilian purchase order" means any purchase order for an article which is not to be delivered directly or indirectly to the United States Army or Navy, the Maritime Commission, the War Shipping Administration, or any foreign country under the Lend-Lease Act.

(k) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priorities control and may be deprived of priorities assistance.

(l) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board as amended from time to time.

NOTE: The reporting provisions of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 15th day of July 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 921—ALUMINUM AND MAGNESIUM

[General Preference Order M–2–b as Amended July 15, 1944]

MAGNESIUM

Section 921.16 *General Preference Order M–2–b* is amended to read as follows:

§ 921.16 *General Preference Order M–2–b*—(a) *Definitions.* For the purposes of this order:

(1) "Unfabricated magnesium" means any metal in ingot or other raw form, including sticks, the principal ingredient of which by weight is the element magnesium.

(2) "Magnesium products" means any basic forms (such as, but not limited to, castings, extrusions (other than sticks), sheet, strip, plate, forgings, and powder), the principal ingredient of which by weight is magnesium.

(3) "Magnesium scrap" means any scrap material (except sawings, grindings, sweepings, and similar fines), the principal ingredient of which by weight is magnesium, generated in the course of any industrial process, or any discarded magnesium products, which must be remelted to be of value for further use. The term "magnesium scrap" also includes any dross or sludge resulting from melting magnesium or magnesium scrap, when the dross or sludge contains at least 20 percent of magnesium by weight.

(4) "Producer" means any person who makes unfabricated magnesium, in whole or in part, from a non-metallic raw material.

(5) "Approved smelter" means one of the smelting plants listed on Exhibit A.

[1] Aluminum in controlled material forms may be ordered for research, developmental and experimental activities by placing an order bearing the controlled material symbol V–9 and the standard CMP certification, all as provided in Order P–43.

(6) "Fabricator" means any person, including pattern shops, foundries, and powder grinders, who makes magnesium products.

(7) "Civilian purchase order" means any purchase order for an article which is not to be delivered directly or indirectly to the United States Army or Navy, the Maritime Commission, the War Shipping Administration, or any foreign country under the Lend-Lease Act.

(b) *Delivery and use of unfabricated magnesium.* (1) Except as provided in paragraph (m) with respect to dead stock, no person shall deliver, accept delivery of or use unfabricated magnesium without the written specific authorization of the War Production Board.

(2) A person who seeks the specific authorization of the War Production Board to accept unfabricated magnesium and to use it, and who seeks specific authorization for his supplier to deliver unfabricated magnesium, should apply monthly by letter in duplicate stating the form, alloy and other specifications of the unfabricated magnesium required, the amount in pounds of each type of unfabricated magnesium, the magnesium product to be made from each type of unfabricated magnesium or other use to which it is to be put, and the month in which, and the address to which the unfabricated magnesium is to be shipped. Such application should be made by the 10th of the month preceding the month of requested delivery.

(c) *Use of magnesium products permitted on military and aircraft orders.* Magnesium products may be used in making any items prescribed for use by and produced for the United States Army or Navy, Maritime Commission, the War Shipping Administration, or the Army or Navy of any foreign country, and in making any aircraft or aircraft components or airborne equipment.

(d) *Use of magnesium products for experimental purposes.* Magnesium products may be used for research, developmental, or experimental purposes, including the making of experimental models, to the extent permitted by applicable WPB orders and regulations.

(e) *Use of magnesium products as substitute for other metal.* (1) In addition to the uses mentioned above, any person may use magnesium products as a substitute for any other metal in the manufacture of any article (including parts, components and sub-assemblies) if he does not make more units for civilian purchase orders in any quarter than the number of units of the same size he lawfully made out of other metal for civilian purchase orders in the second quarter of 1944. Also, without regard to second quarter production, magnesium products may be used as a substitute for any other metal allowed by WPB orders in the following cases:

(2) A person whose output of an article is expressly limited to a specific number of units per quarter or a specified dollar amount (either under a WPB order or by an authorized production schedule under the Controlled Materials Plan or Priorities Regulation 11–B) may use magnesium products in place of other permitted metal as long as he does not exceed these limits.

(3) A person whose output is not restricted by a specific unit or dollar limit but is covered by a WPB order restricting his use of other metal during a given period to a specified percentage of his previous use, may use magnesium products as a substitute for other metal as long as the total number of units of the article which he makes during the period, and the size of the units, is not greater when he uses magnesium products for all or part of his production than it could be under the WPB order if he used other metal exclusively.

(4) A person whose output is not restricted in any of the ways mentioned in (2) or (3) above, and who has been specifically allotted steel, copper or aluminum for the third quarter of 1944 to make an article under CMP, may use magnesium products to take the place of the allotted steel, copper or aluminum as long as he does not increase his total production in the quarter (including production from magnesium as well as from steel, copper and aluminum) over the number of units of the same size he could have made with the allotted steel, copper and aluminum only. In the fourth quarter of 1944 and subsequent quarters, his production will not be restricted except as may be otherwise provided.

(f) *Restrictions in other orders on use of magnesium products superseded.* All restrictions in other WPB orders as to the use of magnesium products (whether referred to by name or as a metal) no longer apply. However, magnesium products obtained with priorities assistance for a particular purpose may not be used for other purposes except as permitted in applicable Priorities Regulations.

(g) *Other uses of magnesium products.* Except as stated above, no person may use magnesium products without the specific authorization in writing of the WPB. Authorization to accept a delivery of magnesium products for a particular purpose is equivalent to authorization to use it for that purpose. Anyone who wants specific authorization of the WPB to use magnesium products for a purpose not permitted above, and does not need an exemption from any order of the WPB (or an authorized production schedule), may apply by letter to the Aluminum and Magnesium Division, War Production Board, Washington 25, D. C., Reference M–2–b. The letter should be filed in duplicate and should contain substantially the information numbered as shown below:

(1) Weight, form and alloy of magnesium products for which authorization to use is requested.

(2) The number of months the quantity of magnesium products requested will cover estimated requirements.

(3) The part to be fabricated or other use to be made of the magnesium product requested.

(4) The article into which such part will be incorporated and end use of the article.

(5) Manpower information on form WPB–3820, or, if granting the authorization will not involve any increase in number of production employees in applicant's plant, a statement to that effect.

(h) *Appeals for relief from quantity restrictions.* If a person wants to use magnesium products as a substitute for other metal to make an article in greater quantity than is allowed by paragraph (e) of this order, and believes that his case involves exceptional conditions warranting relief, he may appeal to the WPB as explained in Priorities Regulation 16. The appeal should be filed with the Aluminum and Magnesium Division as an appeal from this order except that if he also wants relief from quantity restrictions imposed by another order of the WPB governing the article he is making, he should appeal from the other order.

(i) *How fabricators fill orders for magnesium products.* Every fabricator shall fill, in preference to all other orders, those orders for magnesium products which he is specifically authorized in writing by the WPB (or, in the case of certain deliveries for aircraft products, by the Aircraft Scheduling Unit of the Aircraft Resources Control Office) to deliver before October 1, 1944. All orders for magnesium products which are not so authorized shall be filled according to preference ratings as provided in Priorities Regulation 1.

(j) *Prohibition against alloying, contamination, and debasement.* No person shall alloy, contaminate or debase unfabricated magnesium except as the War Production Board may specifically authorize in writing.

(k) *Collection, segregation, and use of scrap.* (1) Each person owning or generating magnesium scrap shall collect it, place it in containers, label the containers so as to identify the scrap, and otherwise prepare all such scrap for reprocessing. All magnesium scrap shall be kept free of contamination by other metals and materials, and otherwise handled in such manner so that it will be of acceptable quality for reprocessing.

(2) In addition, each person generating more than 1,500 pounds of magnesium scrap in any month beginning with December, 1943, shall thereafter segregate all magnesium scrap unless specifically authorized in writing by the War Production Board to do otherwise. Such scrap shall be segregated by alloys in accordance with the alloy designation of the American Society for Testing Materials. Commercially pure magnesium, and magnesium scrap of each alloy not described by such designations, shall be kept segregated.

(3) Each person receiving segregated magnesium scrap must keep such scrap segregated prior to its use to the same extent as when received by him, and if he redelivers such scrap, he shall do so segregated to the same extent as when it was received by him.

(4) Any fabricator may use any magnesium scrap generated in his plant (or any casting of his own manufacture rejected or spoiled by another person) but only (i) if the scrap is remelted and refabricated in such plant into products for the production of which the fabricator is currently obtaining deliveries of unfabricated magnesium in conformity with this order and (ii) if, in estimating, applying for, and ordering such magnesium, the fabricator reduces his requirements by an amount which represents a reasonable anticipation of the amount of magnesium scrap which will be recoverable for re-use under this paragraph.

(l) *Disposition of all scrap.* (1) Except as the War Production Board may specifically authorize in writing, any person, other than a producer or approved smelter, owning any magnesium scrap, shall sell or deliver for processing on toll all such scrap at reasonable intervals to a producer or approved smelter and shall not use or dispose of it in any other way. However, a person who has found a new magnesium casting to be defective or has spoiled it, may deliver the casting back to the foundry which produced it.

(2) Except as specifically authorized in writing by the War Production Board no producer or approved smelter shall mix two or more alloys during the remelting of scrap.

(3) Unless specifically authorized by the War Production Board in writing, no person other than a producer or approved smelter shall accept delivery of any magnesium scrap except that a foundry may accept delivery of a casting of its own manufacture which has been rejected or spoiled in machining.

(m) *Dead stock.* All unfabricated magnesium and magnesium products which are not being used in, or which are in excess of reasonable needs for, the manufacture of items approved by written specific authorization, may be sold subject to the restrictions of Priorities Regulation No. 13.

(n) *Requests for authorizations and other communications.* All requests for authorizations under this order shall be filed in duplicate and shall give the relevant facts, including any information specifically called for above. All such requests and other communications regarding this order should be addressed to the War Production Board, Aluminum and Magnesium Division, Washington 25, D. C., Reference M–2–b.

(o) *Special directions.* The War Production Board may issue special directions with respect to the ordering, production, delivery, and receipt and use of magnesium and magnesium products.

(p) *Report of operations.* Any person who in any calendar month has had in inventory any unfabricated magnesium, magnesium products, or magnesium scrap, shall file such reports as may be required from time to time by the War Production Board.

(q) *Intra-company deliveries.* The provisions of this order with respect to deliveries prohibit or restrict deliveries not only to other persons, including affiliates and subsidiaries, but also deliveries from one branch, division, or section of a single enterprise to another branch, division, or section of the same or any other enterprise under common ownership or control.

(r) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(s) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

NOTE: The reporting provisions of this order have been approved by the Bureau of the Budget under the Federal Reports Act of 1942.

Issued this 15th day of July 1944

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 1, Direction 54]

DEFERRED ALLOTMENTS FOR ALUMINUM

The following direction is issued pursuant to CMP Regulation 1:

(a) *General.* This direction describes the operation of deferred allotments for aluminum. These allotments and authorized controlled material orders based on them are identified with the letter "Z" either as the sole allotment symbol or as a prefix to the regular allotment symbol. Deferred allotments and authorized controlled material orders based on them are exactly the same as regular allotments and authorized controlled material orders, except as provided in this direction or as may be provided under other regulations.

(b) *Identification of deferred allotments.* Any consumer receiving an allotment identified with the symbol "Z", either as the sole allotment symbol or as a prefix to the regular allotment symbol, must place the same identification on every allotment which he passes on under the allotment received by him, as well as on every authorized controlled material order placed by him based on that allotment.

(c) *Treatment by an aluminum producer of authorized controlled material orders based on deferred allotments.* (1) An aluminum producer must accept or reject an authorized controlled material order identified by the symbol "Z" in the same way that he must accept any other authorized controlled material order under Direction 23 to CMP Regulation No. 1. However, if after accepting orders identified by a "Z" symbol, he receives authorized controlled material orders (other than "Z" orders) or "AM" orders which he would be unable to accept because of the provisions of Direction 23, he must remove his most recently accepted "Z" orders from his schedule to the extent necessary and accept the other authorized controlled material order.

(2) An aluminum producer must defer production of his most recently accepted "Z" orders to the extent necessary to make deliveries on time on other authorized controlled material orders and "AM" orders.

(3) Whenever an aluminum producer finds that he will be unable to fill a "Z" order within the month promised, he must promptly notify the customer stating approximately when he expects to make delivery.

(d) *Reports to WPB.* Producers shall treat "Z" orders separately on all reports filed with the Aluminum and Magnesium Division of WPB.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L–335, Direction 13]

DISTRIBUTORS RECEIPTS OF RED CROSS LUMBER

The following direction is issued pursuant to Order L–335:

Any lumber distributor who receives ratings from the American Red Cross on a preference rating certificate for use in obtaining lumber required for emergency relief in disaster strickened areas may extend those ratings to get the amount of lumber for which the preference rating certificate was issued. In placing the order with his lumber supplier the distributor is authorized and required to use the certification prescribed by paragraph (q) (3) of Order L–335. A lumber distributor who has placed an order with his supplier to get lumber for a purpose for which he has received a preference rating from the American Red Cross may accept delivery of that lumber after July 31, 1944 provided he validates the order prior to July 20, 1944. Orders should be validated in accordance with the provisions of paragraph (y) (1) of Order L–335. Lumber that a distributor receives from his supplier under this direction may be delivered on uncertified and unrated orders of victims of disaster strickened areas in accordance with the program of the American Red Cross. If the distributor delivers lumber to such victims out of inventory the lumber obtained from the supplier may be used to replace that lumber in inventory. Any lumber that a distributor receives by the use of such a preference rating which is over and above the amount required by such victims may only be sold on certified and rated orders.

(e) Limitation on drop and block wire.
(f) Limitation on replacements.
(g) Limitation on additions.
(h) Non-applicability to certain replacements and additions.
(i) Producers of substantial quantities of food.

Schedule A.
Schedule B.
Schedule C.

§ 4501.1 *Utilities Order U–2*—(a) *Definitions.* (1) "Operator" means any individual, partnership, association, business trust, corporation, receiver, or any form of enterprise whatsoever, whether incorporated or not, the United States, the District of Columbia, any state or territory of the United States, any political, corporate, administrative or other division or agency thereof, to the extent engaged in rendering telephone communication service within, to, or from the United States, its territories or possessions.

(2) [Revoked July 17, 1944.]

(3) Without regard to accounting practices:

(i) "Maintenance" means the minimum upkeep necessary to continue a facility in sound working condition.

(ii) "Repair" means the restoration of a facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like.

(iii) Neither maintenance nor repair shall include the improvement of any plant, facility or equipment, by replacing material which is still usable with material of a better kind, quality, or design.

(4) [Revoked July 17, 1944.]

(5) [Revoked July 17, 1944.]

(6) "Schedule A service" means service to the extent required for the proper discharge of duties in the direct defense, public health, welfare and security categories listed on Schedule A attached.

(7) "Interim service" includes all service installed or reconnected on and after April 15, 1943 which requires an allocation or assignment of exchange central office station terminal equipment or exchange line plant. It also includes any service installed prior to that date according to a contract specifying that the service was on an interim basis.

(b) *Conservation.* (1) Operators shall conserve scarce and critical materials by the employment of all practical methods.

(2) [Revoked Jan. 20, 1944]

(3) Operators shall discontinue the further installation of dial P. B. X. systems and dial private intercommunicating systems. This provision does not prevent the installation of systems of less than 100 lines where the equipment is already in the stock of the operator or can be obtained from the stock of another operator. Nor does it bar additions to dial systems. Nor does it bar moves for the same business service within the same exchange area, or to a contiguous exchange area of the same operator, so long as no addition to exchange central office equipment is made except for Schedule A business service.

(c) *Availability of facilities for essential uses.* (1) Operators shall disconnect service when they learn that the present real user of service is not a user contemplated in the service agreement. Any such disconnections shall be considered "normal disconnections" within the meaning of paragraph (c) (2) below.

(2) Exchange line plant, exchange central office equipment, or telephone sets made available through normal disconnection or by new acquisition shall be used to take care of applications for service in the following order: *Provided however,* That paragraphs (c) (2) (ii) through (c) (2) (vii) shall not take effect until July 24, 1944:

(i) Schedule A service, public pay station service and service specifically authorized by the War Production Board because of essentiality or unreasonable hardship.

(ii) Changes of address of business service within the same exchange or to another exchange of the same operator within the same metropolitan area or within such other area as is defined by the operator's established practices; and, within the same area, restoration of business "interim service" disconnected to make facilities available for Schedule A service.

(iii) Changes of address of residence service within the same exchange or to another exchange of the same operator within the same metropolitan area or within such other area as is defined by the operator's established practices; and, within the same area, restoration of residence "interim service" disconnected to make facilities available for Schedule A service.

(iv) New business service and additions to existing business service.

(v) New residence service set forth in Schedule B.

(vi) New residence service set forth in Schedule C.

(vii) New residence service other than that included in categories (i), (v) and (vi.)

(viii) Where the operator finds that immediate installation of service is essential to the protection of life, such installation may be made as an exception to the order provided in the above categories. Such service shall, however, be disconnected promptly at the termination of the emergency and the facilities used to take care of applications as otherwise specified above.

(3) Idle facilities may be reserved to the extent operators find necessary to meet promptly the known or fairly anticipated requirements for Schedule A service and to provide for essential public pay station service.

(4) To the extent necessary to meet minimum needs for Schedule A service and for essential public pay station service, operators shall make available additional exchange central office equipment or exchange line plant by regrading any service or disconnecting "interim service" under the following provisions:

(i) "Interim service" shall not be subject to disconnection so long as it continues to meet the requirements of Schedule A service or essential public pay station service.

(ii) Regrading is to be done only when current installations of central office equipment permit. Regrading of Schedule A service and of business service is to be done only if regraded service meets minimum service needs.

(iii) In so far as practical these steps shall be taken in the following order. Regrading shall precede disconnection. Residence service shall be regraded or disconnected before business service. Any regrading or disconnection shall be in the reverse order of the dates of connection at the existing locations, that is, the most recent shall be regraded or disconnected first.

(5) Subject to the provisions of (c) (4) (ii) and (c) (4) (iii) above, operators shall regrade existing service to the extent necessary to provide service authorized by the War Production Board because of unreasonable hardship.

(d) *Limitations on additional telephones.* (1) Main stations. Operators shall limit the number of main telephone stations, including P. B. X. trunks, connected to any central office to 105% of the number the central office was designed to serve under pre-war engineering and operating practices. This provision has the following exclusions and exceptions:

(i) Main stations do not include extensions or P. B. X. stations.

(ii) If the number of main stations connected to a central office on March 25, 1943 exceeded the 105% limit, the number need not be reduced so long as service is satisfactory.

(iii) The 105% limitation need not be applied to a single-office exchange which is designed to serve less than 1,000 main stations.

(iv) The War Production Board may approve a percentage other than 105% for any central office.

(2) Residence extension service. Operators shall not install or reconnect residence extension telephones, residence extension bells or residence P. B. X. telephones, nor as a substitute provide additional main lines or stations on party lines, nor install jacks and plugs for residence service. This provision has the following exclusions and exceptions.

(i) Jacks already in place may be reconnected provided that no more than one telephone and one bell shall be furnished with the telephone line with which the jacks are associated.

(ii) Temporary installations of one residence extension may be made when the operator finds it essential in cases of serious illness.

(iii) For practicing physicians and surgeons, the following services may be provided, but the operator shall supply the minimum which will meet professional requirements. The operator may install two jacks and make the main station telephone a portable telephone, or, as an alternative, install one extension telephone or, as an alternative, install two jacks for use with a single portable extension telephone. The operator may also provide a connection with an answering bureau.

(iv) The installation and reconnection in residence quarters of telephones connected to private branch exchanges serving hotels, apartment houses, etc., may be made to the extent that no more than one such telephone may be provided in any residence quarters.

(e) [Revoked July 17, 1944.]

(f) *Limitation on replacements.* Operators shall not make replacements of central office and P. B. X. equipment and station apparatus (other than inside wiring and cabling) except:

(1) To maintain or protect existing service.

(2) In making an addition, to the extent that the cost of material replaced or of the replacing material does not exceed

25 percent of the cost of the total material added.

(3) To provide a permanent installation in lieu of one temporarily made to meet an exigency.

(4) To provide for decreased service demands or for the regrading provided for in paragraph (c).

(5) To make necessary replacements for supplying the residence extension service which is permitted for practicing physicians and surgeons in paragraph (d) (2) (iii) and for reconnecting jacks in paragraph (d) (2) (i).

(6) To effect a change in the "class" or "grade" of service, provided the change is not otherwise prohibited by this order. The "classes" of service involved are business, residence, semi-public, residence coin; the "grades" of service involved are individual, two-party, four-party, multi-party.

(7) To provide station wiring plans or key arrangements which conserve one or more telephones.

(8) To replace "left-in" telephone sets and station cords so that a subscriber may retain the same type telephone sets and cords after a change of address within the area indicated in paragraph (c) (2) (iii).

(9) To install amplifying equipment for the hard-of-hearing.

(10) [Revoked July 17, 1944.]

(g) *Limitation on additions.* Operators shall not add exchange central office equipment except:

(1) To maintain or protect existing service.

(2) To meet the known or fairly anticipated needs of Schedule A service or to provide essential public pay station service where facilities cannot be made available through regrading or disconnection as provided in paragraph (c) above.

(3) [Revoked July 17, 1944.]

(4) Where 75 percent or more in cost of material required for the addition is recovered from the operator's plant or is obtained from any operator's stocks. The material taken from stocks or plant pursuant to this subparagraph shall not be replaced.

(5) [Revoked July 17, 1944.]

(h) *Non-applicability to certain replacements and additions.* (1) The terms of this order shall not prohibit wire communications projects approved by the War Production Board on form WPB-2774 or other appropriate form.

(2) Nor do they prohibit the completion of a project the physical installation of which was started at a time when the project was permitted by Order L-50 or an earlier issue of Order U-2.

(i) [Revoked July 17, 1944.]

(j) *Exemption of armed forces.* The restrictions of paragraphs (b) (3) and (f) shall not apply to facilities for the official use of the armed forces.

(k) *Engineering and planning.* All operators shall engineer all replacements or additions to central office equipment so as to limit the margin for expected growth of requirements to a period not in excess of one and one-half years.

(l) *Reports.* All operators affected by this order shall execute and file with the Office of War Utilities such reports as the Director, Office of War Utilities, shall from time to time require; subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(m) [Revoked Jan. 20, 1944]

(n) *Appeals.* Any appeal from the provisions of this order shall be made by filing Form WPB-2117 (PD-761), giving all information required by said form.

(o) *Violations.* Any person who wilfully violates any provision of the order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priorities assistance.

(p) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: Communications Division, Office of War Utilities, War Production Board, Washington 25, D. C., Ref.: U-2.

Issued this 17th day of July 1944.

Chapter XI—Office of Price Administration

PART 1346—BUILDING MATERIALS

[MPR 546]

USED AND RECONDITIONED PLUMBING AND HEATING EQUIPMENT

In the judgment of the Price Administrator, it is necessary and proper in order to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, to replace the General Maximum Price Regulation [1] and Maximum Price Regulation No. 188 [2] with a separate regulation establishing maximum prices for used and reconditioned plumbing and heating equipment.

Insofar as this regulation uses specifications and standards which were not, prior to such use, in general use in the trade or industry affected, the Administrator has determined, with respect to such standardization, that no practicable alternative exists for securing effective price control with respect to the commodities subject to this regulation.

So far as practicable, the Price Administrator has consulted with representatives of the trade and industry which will be affected by the regulation. In the judgment of the Price Administrator, the maximum prices established by this regulation are generally fair and equitable and will effectuate the purpose of said act. A statement of the considerations involved in the issuance of this Maximum Price Regulation No. 546 has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

§ 1346.705 *Maximum prices for used and reconditioned plumbing and heating equipment.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and pursuant to Executive Orders Nos. 9250 and 9328, Maximum Price Regulation No. 546 (Used and Reconditioned Plumbing and Heating Equipment), which is annexed hereto and made a part hereof, is hereby issued.

AUTHORITY: § 1346.705 issued under 56 Stat. 23, 765; Pub. Law 151, 78th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681.

ARTICLE I—PERSONS AND TRANSACTIONS SUBJECT TO THIS REGULATION AND ITS RELATIONSHIP TO OTHER REGULATIONS

SECTION 1. *The matters to which each article in this regulation relates.* This regulation is divided into five articles: Article I explains the coverage of the regulation; Article II establishes ceiling prices for sales of used plumbing and heating equipment; Article III establishes ceiling prices for sales of reconditioned boilers and boiler repair parts, and reconditioned automatic domestic hot water heaters; Article IV establishes ceiling prices for sales of seconds or culls; and Article V contains general provisions applicable to all of the regulation.

SEC. 2. *Prohibition against sales at prices above ceiling prices.* (a) On and after the 9th day of August 1944, the effective date of this regulation, no person shall sell or deliver, and no person in the course of trade or business shall buy or receive any commodity subject to this regulation at prices higher than the ceiling prices fixed by this regulation, and no person shall agree, offer, solicit, or attempt to do any of these things. The provisions of this section shall not be applicable to sales or deliveries of any commodity covered by this regulation if prior to August 9, 1944, any such commodity had been received by a carrier, other than a carrier owned or controlled by the seller, for shipment to the purchaser.

(b) Lower prices than the ceiling prices fixed by this regulation may be offered, charged, and paid.

SEC. 3. *Coverage of this regulation.* This regulation establishes the highest price at which used and reconditioned plumbing and heating equipment and seconds or culls may be sold and bought at any point within the 48 states of the United States and the District of Columbia. All sales of these items, including sales at wholesale and retail, except as noted below, are covered.

"Sale at wholesale" means a transaction in which the item is sold to a retailer or any other person who purchases for resale rather than for use.

"Sale at retail" means a transaction in which the item is sold to an ultimate purchaser, and includes sales to and by plumbing and building contractors. Installation charges only to the extent permitted by any applicable maximum price regulation may be added for installation actually performed.

The following sales are not covered, except as noted:

(a) Sales by any person to "peddlers" and "wreckers" and sales by "peddlers" and "wreckers" to a wholesaler are exempt from price control. However, sales by peddlers and wreckers to any person other than a wholesaler are subject to this regulation. This means that sales by peddlers and wreckers to retailers and to consumers are covered by this regulation.

A "peddler," for the purpose of this regulation, is a person who has no fixed yard or other place of business at which day to day sales of used and reconditioned plumbing and heating equipment or seconds or culls are made.

A "wrecker," for the purpose of this regulation, is a person who tears down old buildings and disposes, in the course of business, of materials salvaged from such operation.

*Copies may be obtained from the Office of Price Administration.

(b) Sales by a householder of articles originally purchased for his own use are exempt from price control pursuant to section 3.2 (c) of Revised Supplementary Regulation No. 1 [1] to the General Maximum Price Regulation. However, sales made out of a residence as a regular business enterprise are covered by this accompanying regulation.

(c) Sales at good faith auctions of items sold for the account of a householder are not subject to price control, except that auction sales conducted by a wholesaler or retailer regularly engaged in the business of selling items covered by this regulation other than by auction are subject to this regulation if made for the wholesaler's or retailer's own account.

(d) Sales by the War Department, the Navy Department, or the Procurement Division of the Treasury Department are not subject to this regulation but remain subject to the maximum price regulation governing such sales.

(d) *Exports.* Maximum prices for export sales of items covered by this regulation shall be determined in accordance with the provisions of the Second Revised Export Price Regulation [7] issued by the Office of Price Administration.

ARTICLE II—USED PLUMBING AND HEATING EQUIPMENT

SEC. 7. *Ceiling prices for used plumbing and heating equipment for sales at wholesale.*—(a) *Listed items.* On and after the 9th day of August 1944, the ceiling price for a sale at wholesale of any item listed in the Schedule set forth in section 24 is the price established in Column II of the Schedule for the State or area in which the seller's place of business is located.

(b) *Unlisted items.* The ceiling price for a sale at wholesale of any item of used plumbing and heating equipment covered by this regulation but not listed in the schedule, *regardless of the place of sale,* shall be determined by deducting 66⅔ percent from any manufacturer's list price in effect at the time of the sale for a new item of the same kind, shape, and style.

(c) *What the ceiling price for a sale at wholesale includes.* (1) The ceiling price for a sale at wholesale is a price f. o. b. the seller's store or yard. If the sale is made on a delivered basis, the charge for delivery must not exceed common truck carrier rates for the most similar type of haul and such charges must be stated separately on the invoice.

The ceiling price applies to all used plumbing and heating equipment, in usable condition, and includes the repair, refinishing, or addition of parts to the article. However, in the case of reconditioned boilers and boiler repair parts and reconditioned automatic domestic hot-water heaters, the maximum prices set forth in sections 10 (a), 10 (b), or 10 (c) may be charged.

(2) Whenever the description of an item listed in the schedule set forth in section 24 of this regulation or the manufacturer's list price includes certain parts, trimmings, appliances, or appurtenances which the seller is unable to furnish or supply, the invoice must show the ceiling price permitted by this regulation and also the amount allowed for such missing part, trimming, appliance, or appurtenance. The amount of this allowance shall not be less than one-tenth (10 percent) of the manufacturer's list price in effect at the time of the sale for a new part, trimming, appliance, or appurtenance of the same or similar kind, shape, or style. No allowance, however, need be made for the absence of firing tools in connection with the sale of a boiler.

(3) Any Federal, State, city or county sales tax, including the cost of seals if required by city ordinances, may be added to the ceiling price, if permitted by this regulation, but this sales tax must be stated separately on the invoice; otherwise, the seller is not permitted to

SEC. 8. *Ceiling prices for used plumbing and heating equipment for sales at retail*—(a) *Listed items.* On and after the 9th day of August 1944, the ceiling price for sale at retail of any item listed in the schedule set forth in section 24 is the price established in Column III of the schedule for the State or area in which the seller's place of business is located.

(b) *Unlisted items.* The ceiling price for a sale at retail of any item of used plumbing and heating equipment covered by this regulation but not listed in the schedule, *regardless of the place of sale,* shall be determined by deducting 45 percent from any manufacturer's list price in effect at the time of the sale for a new item of the same kind, shape, and style.

(c) *What the ceiling price for a sale at retail includes.* (1) The ceiling price for a sale at retail for used plumbing and heating equipment, in the case of persons selling such equipment during March 1942, includes free delivery within the area recognized by the seller as a free delivery area during March 1942. If the seller delivers outside his recognized free delivery area, or if the seller did not render free delivery services during March 1942, the charge for delivery from the seller's store or yard must not exceed common carrier truck rates for the most similar type of haul and such charges must be stated separately on the invoice.

If the seller did not sell used plumbing and heating equipment during March 1942, he shall be governed by the delivery practices of his closest competitor located within the seller's trading area.

Section 21 sets forth the conditions under which the requirement for free delivery may be suspended.

The ceiling price applies to all used plumbing and heating equipment in usable condition, and includes the repair, refinishing, or addition of parts to the article. However, in the case of reconditioned boilers and boiler repair parts and reconditioned automatic domestic hot-water heaters, the maximum prices set forth in sections 10 (a), 10 (b), or 10 (c) may be charged.

(2) Whenever the description of an item listed in the schedule set forth in section 24 of this regulation or the manufacturer's list price includes certain parts, trimmings, appliances, or appurtanances which the seller is unable to furnish or supply, the invoice must show the ceiling price permitted by this regulation and also the amount allowed for such missing part, trimming, appurtenance, or appliance. The amount of this allowance shall be not less than one-fifth (20 percent) of the manufacturer's list price in effect at the time of the sale for a new part, trimming, appliance, or appurtenance of the same or similar kind, shape, or style. No allowance, however, need be made for the absence of firing tools in connection with the sale of a boiler.

(3) Any Federal, state, city or county sales tax, including the cost of seals if required by city ordinances, may be added to the ceiling price, if permitted by this regulation, but this sales tax must be stated separately on the invoice; otherwise, the seller is not permitted to charge for it. (See section 17 for full particulars.)

SEC. 9. *Posting provisions.* A copy of the schedule applicable for the State or area in which the seller's place of business is located must be posted in a conspicuous place in the store or place of business to which it is applicable and it must be clearly visible to all purchasers.

No part of the price schedule applicable to the seller's location which must be posted, as described above, may be blocked out, covered up, or otherwise obscured.

ARTICLE III—RECONDITIONED BOILERS AND BOILER REPAIR PARTS AND RECONDITIONED AUTOMATIC DOMESTIC HOT WATER HEATERS

SEC. 10. *Ceiling prices for reconditioned boilers and boiler repair parts, and reconditioned automatic domestic hot water heaters*—(a) (1) *How to determine the ceiling price for Type A reconditioned and guaranteed boilers and boiler repair parts, and reconditioned automatic domestic hot water heaters, when sold at retail.* The ceiling price for a sale at retail for a Type A Reconditioned and Guaranteed Boiler or Boiler Repair Part (see section 4 (c) (2) for reconditioning steps and guarantee), or a reconditioned automatic domestic hot water heater (see section 4 (d) for reconditioning steps and guarantee), *regardless of the place of sale,* is to be determined by deducting 15 percent from any manufacturer's maximum list price in effect at the time of sale for a new boiler or boiler repair part, or a new automatic domestic hot water heater of the same kind, shape, and style.

When checking a manufacture's maximum list price, be sure the maximum list price being used conforms with Maximum Price Regulation No. 272 (Cast-Iron Boilers and Cast-Iron Radiation) [8] or any other maximum price regulation that may be issued hereafter by the Office of Price Administration which establishes maximum prices for new boilers, new boiler repair parts, or new automatic domestic hot water heaters.

(2) *How to determine the ceiling price for Type B reconditioned and guaranteed boilers and boiler repair parts.* The ceiling price for a sale at retail for a Type B reconditioned and guaranteed boiler or boiler repair part (see section 4 (c) (3) for reconditioning steps and guarantee), *regardless of the place of sale,* is to be determined by deducting 35 percent from any manufacturer's maximum list price in effect at the time of sale for a new boiler or boiler repair part, or a new automatic domestic hot water heater of the same kind, shape, and style.

When checking a manufacturer's maximum list price, be sure the maximum list price being used conforms with Maximum Price Regulation No. 272 (Cast-Iron Boilers and Cast-Iron Radiation) or any other maximum price regulation that may be issued hereafter by the Office of Price Administration which establishes maximum prices for new boilers, new boiler repair parts, or new automatic domestic hot water heaters.

(b) *What the ceiling price for a reconditioned boiler, boiler repair part, or an automatic domestic hot water heater includes when sold at retail.* (1) The ceiling price for a sale at retail for a reconditioned boiler, boiler repair part, or an automatic domestic hot water heater, in the case of persons selling such articles during March 1942, includes free delivery within the area recognized by the seller as a free delivery area during March 1942. If the seller delivers outside his recognized free delivery area, or if the seller did not render free delivery services during March 1942, the charge for delivery from the seller's store or yard must not exceed common carrier truck rates for the most similar type of haul and such charges must be stated separately on the invoice.

If the seller did not sell reconditioned boilers, boiler repair parts, or automatic domestic hot water heaters during March 1942, he shall be governed by the delivery practices of his closest competitor located within the seller's trading area.

(2) Whenever the manufacturer's maximum list price for a new boiler or a new boiler repair part or a new automatic domestic hot water heater includes certain parts, trimmings, appliances, or appurtenances, including firing tools, which the seller is unable to furnish or supply, the invoice must show the ceiling price permitted by this regulation and also the amount allowed for such missing part, trimming, appliance, appurtenance, or firing tool. The amount of this allowance shall be not less than one-half (50 percent) of the manufacturer's maximum list price for a new part, trimming, appliance, appurtenance, or firing tool of the same or similar kind, shape, or style.

(3) Any Federal, state, city or county sales tax, including the cost of seals if required by city ordinances, may be added to the ceiling price, if permitted by this regulation, but this sales tax must be stated separately on the invoice; otherwise, the seller is not permitted to charge for it. (See section 17 for full particulars.)

(c) *How to determine ceiling prices for reconditioned boilers and boiler repair parts, and reconditioned automatic domestic hot water heaters when sold at wholesale.* The ceiling prices established in paragraphs (a) (1) and (a) (2) of this section for sales at retail are the ceiling prices for sales at wholesale for reconditioned boilers and boiler repair parts; and reconditioned automatic domestic hot water heaters, *except* that the seller *must deduct* from the retail ceiling prices the net dollar differential, or discount differential, or cash differential, or other allowances which he had in effect during the month of March 1942 for all sales at wholesale.

ARTICLE IV—SECONDS OR CULLS

SEC. 11. *Ceiling prices for seconds or culls.* The ceiling price for seconds or culls, *regardless of the place of sale* and whether the seller is a manufacturer, wholesaler, or retailer, must be determined by deducting 15 percent from the ceiling price established by applicable maximum price regulation for new first grade plumbing fixtures of the same kind, shape, and style, to a purchaser of the same class.

The term "applicable regulation" in this instance refers to the General Maximum Price Regulation, Maximum Price Regulation No. 188, or any other applicable price regulation that has been or hereafter may be issued by the Office of Price Administration establishing ceiling prices for new first grade plumbing fixtures.

(a) *What the ceiling price for seconds or culls includes.* The ceiling price for seconds or culls includes at least the same rendition of services, at least the same extension of cash discounts, and at least the same absorption of freight charges as were or would have been rendered or extended on comparable sales of new first grade plumbing fixtures during the month of March 1942, or as are established by the applicable regulation for any new first grade plumbing fixtures.

ARTICLE V—MISCELLANEOUS PROVISIONS

SEC. 12. *Prohibited practices*—(a) *General.* Any practice which is a device to secure the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright overceiling price. This applies, but is not confined to, devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying agreements, trade understandings, invoicing, auction sales, and the like.

(b) *Special prohibited practices.* The following are among the specific practices prohibited by this regulation, but without limiting the general applicability of paragraph (a) above:

(1) Requiring a purchaser to buy a combination of used equipment, seconds or culls, or parts in excess of those parts which he wants as a condition of receiving used equipment, seconds or culls, or parts which he does want.

(2) Making terms or conditions of sales more onerous to the purchaser than those in effect or available to the purchaser during March 1942.

(3) Securing the effect of higher prices by changing credit practices or cash discounts from what they were during March 1942. This includes, but is not limited to, reducing the cash discount period, or decreasing the credit period.

SEC. 13. *Penalties.* (a) Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided by the Emergency Price Control Act of 1942, as amended.

(b) No War Procurement Agency, or any contracting or paying finance officer thereof, shall be subject to any liability, civil or criminal, imposed by this regulation or by the Emergency Price Control Act of 1942, as amended. "War Procurement Agency" as used in this paragraph includes the War Department, the Navy Department, United States Maritime Commission, and the Lend-Lease Section of the Procurement Division of the Treasury Department, or any agency of the foregoing.

SEC. 14. *Application for adjustment*—(a) *Government contracts.* Any person who has made or intends to make a government contract, or subcontract thereunder, who believes that a maximum price under this regulation impedes or threatens to impede the production, manufacture, or distribution of a commodity or the supply of a service which is essential to the war program and which is or will be the subject of the contract or subcontract may file an application for adjustment of that maximum price in accordance with Procedural Regulation No. 6,[9] issued by the Office of Price Administration.

(b) *Local shortage.* The Office of Price Administration, or any duly authorized representative thereof, may by order adjust any maximum price established under this regulation for any seller when it appears:

(1) That there exists or threatens to exist in a particular locality a shortage in the supply of any item of used plumbing and heating equipment, seconds or culls subject to this regulation, which aids directly in the war program or is essential to a standard of living consistent with the prosecution of the war; and

(2) That such local shortage will be substantially reduced or eliminated by adjusting the maximum prices of such seller and of like sellers for such commodity or service; and

(3) That such adjustment will not create or tend to create a shortage, or a need for increases in prices, in another locality, and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended.

Each regional administrator is authorized to make adjustments or act upon applications for adjustment under this paragraph (b).

Applications for adjustment shall be filed in accordance with Revised Procedural Regulation No. 1.[10]

SEC. 15. *Petitions for amendment.* Any person seeking a modification of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1. A petition for amendment must propose a change of general applicability in the regulation for the industry as a whole or a substantial portion thereof, or a change affecting all sellers in a given area, as distinguished from an application which seeks an individual price adjustment.

SEC. 16. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery, but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum prices is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purpose of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 17. *Federal and state taxes.* (a) There may be added to the maximum prices established by this regulation the amount of tax levied by any Federal excise tax statute or any state or municipal sales, gross receipts, gross proceeds, or compensating use tax statute or ordinance under which the tax is measured by gross proceeds or units of sales if, but only if:

(1) Such statute or ordinance requires the vendor to state the tax separately from the purchase price paid by the purchaser, consumer, or user, on the bill, sales check, or evidence of sale at the time of the transaction; or

(2) Such statute or ordinance requires such tax to be separately paid by the purchaser, consumer, or user with tokens or other media of state or municipal tax payments; or

(3) Such statute or ordinance permits the vendor to state such tax separately, and such tax is in fact stated separately by the vendor.

The amount of tax permitted to be added by this paragraph (a) shall in no event exceed the amount required to be paid by the purchaser, consumer, or user under the applicable statute or ordinance.

(b) There may be added to the maximum prices established by this regulation the cost of seals to be affixed under any city ordinance which requires the vendor to affix such a seal prior to the sale of the article.

The amount permitted to be added by this paragraph (b) shall in no event exceed the amount required to be paid by the vendor under the applicable statute or ordinance, and such amount must be stated separately on the invoice.

(c) Sales and deliveries of used and reconditioned plumbing and heating equipment, seconds or culls, the maximum prices for which are established by this regulation, are subject to Supplementary Order No. 31,[11] issued by the Office of Price Administration. For the purpose of determining the applicable maximum price of any used and reconditioned plumbing and heating equipment, the tax on the transportation of property imposed by the Revenue Act of 1942 shall be treated as though it were an increase in the amount charged by every person engaged in the business of transporting property for hire. To the extent that a seller must bear transportation charges, he shall also bear the tax thereon. To the extent that a buyer must bear transportation charges, he shall also bear the tax thereon. In no event shall the tax upon transportation of property, imposed by the Revenue

Act of 1942, be considered as a tax within the meaning of the preceding paragraph (a) of this section.

SEC. 18. *Records.* Every person making sales or deliveries subject to this regulation must keep records containing a description of each sale and delivery, including the date of the sale, the name and address of the purchaser, the price charged, the quantity sold, and the type and classification of the product sold. Records of a kind the seller has customarily kept also must be retained. Purchasers, other than ultimate users, must keep similar records. All such records must be available for inspection by representatives of the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

Copies of sales slips or invoices may be used for the purpose of this paragraph if such sales slips or invoices contain the information required therein.

SEC. 19. *Reports.* Persons subject to this regulation shall submit such reports as the Office of Price Administration may from time to time require, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

SEC. 20. *Notification of purchaser of existence of regulation.* Every person selling used and reconditioned plumbing and heating equipment, seconds or culls, subject to this regulation, shall before making the first sale of used and reconditioned plumbing and heating equipment, seconds or culls, to any purchaser, notify the purchaser of the existence of this regulation and, upon request of the purchaser, make available a copy of this regulation at the seller's principal place of business and at every branch office for examination by the purchaser, together with a list of his approved maximum prices for the items appearing on the schedule (section 24) of this regulation.

SEC. 21. *Suspension of free delivery requirement.* Each Regional Administrator may, by order, grant a seller or group of sellers authority to suspend free service or the requirement for absorption of delivery charges for sales at retail of used plumbing and heating equipment in any case in which:

(a) The seller at retail certifies that he is located in a labor area classified by the War Manpower Commission as a No. 1 or No. 2 critical labor area; and

(b) The Regional Administrator finds that the granting of such authorization will not be inconsistent with the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328.

Each District Director of the Office of Price Administration to whom the Regional Administrator has delegated authority may issue orders under this section 21.

SEC. 22. *Licensing.* The provisions of Licensing Order No. 1 [12] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or of one or more maximum price regulations. A person whose license is suspended may not, during the period of suspension, make any sales for which his license has been suspended.

SEC. 23. *Other definitions.* Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, shall apply to any other terms not specifically defined herein.

SEC. 24. *Schedules of ceiling prices for certain items of used plumbing and heating equipment.* 25 schedules of ceiling prices for 65 items of used plumbing and heating equipment are part of this regulation. Each schedule sets forth the ceiling price for each item when sold at wholesale as well as at retail. Each schedule is applicable to the State or area shown at the head of the schedule. In those instances where a city, town, or community is located in two states, the lower of the two sets of ceiling prices must be used. For example, the ceiling prices for Bristol, Virginia-Tennessee are those set forth in the appropriate schedule for Virginia.

PART 1365—HOUSEHOLD FURNITURE

[MPR 548]

METAL UPHOLSTERY SPRINGS, CONSTRUCTIONS AND ACCESSORIES

In the judgment of the Price Administrator, the maximum prices established by this regulation, are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order Nos. 9250 and 9328. Insofar as this regulation uses specifications and standards which were not, prior to such use, in general use in the trade or industry affected, or insofar as their use was not lawfully required by another Government agency, the Administrator, has determined with respect to such standardization that no practicable alternative exists for securing effective price control with respect to the commodities subject to this regulation. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

§ 1365.102 *Maximum prices for sales of metal upholstery springs, constructions and accessories.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order Nos. 9250 and 9328, Maximum Price Regulation No. 548 (Metal Upholstery Springs, Constructions and Accessories) which is annexed hereto and made a part hereof, is hereby issued.

*Copies may be obtained from the Office of Price Administration.

SECTION 1. *Scope of this regulation.* This regulation fixes ceiling prices for all sales and deliveries of the upholstery coils, innerspring units and constructions listed in paragraph (a) below by any person in the course of trade or business (except steel manufacturers who make and draw their own wire). It covers all the listed articles whether they are made wholly or in part of any new, reconditioned or used materials. It covers only those articles which are of the type used to form the resilient and shape-maintaining metal framework of all kinds of upholstered furniture, bedding articles and upholstered seat and back cushions which are used for any purpose. It also covers the specific accessory upholstery products listed below. It does not cover those articles listed in paragraph (b) below.

(a) *Articles covered by this regulation.* This regulation establishes ceiling prices for the following articles:

(1) Upholstery spiral coils of all kinds including, but not limited to, true upholstery springs, pillow springs, single cone springs, double cone springs, top extension springs, Marshall type springs, and all other springs of similar construction.

(2) Upholstery bar units wherein two or more upholstery spiral coils are attached to a rigid or flexible steel strip.

(3) Spring constructions made up of assembled or tied open or pocketed upholstery spiral coils or bar units (with or without padding or fabric or sisal covering) of the following types: davenport, chair, sofa, or seat constructions; cushion or back units.

(4) Shurstay bands. When used in this regulation shurstay bands means any flat steel strip varying in length between 16" and 30" and varying in gauge between 14" and 20", which is perforated at regular intervals in order to receive a spiral coil, for ultimate use in upholstered articles.

(5) Upholstery clips. When used in this regulation upholstery clips means any stamped or shaped metal piece of the type designed to hold or attach two or more adjoining wires for ultimate use in upholstered articles.

(6) Extension spring helicals. When used in this regulation an extension spring helical means any helical of 16 gauge or lighter varying in length between 2½" to 5" and of the type used to connect the top turns of adjoining spiral coils in upholstered articles.

(7) Edge wire. When used in this regulation, edge wire means high or low carbon wire of the type used to form a wire border for an assembled innerspring unit or construction for upholstered articles.

(b) *Articles not covered by this regulation.* The following articles are not covered by this regulation:

(3) "No sag" or "zigger" type wire, together with attachments and accessories which are made exclusively for use with them.

(4) Helicals other than the extension spring helicals.

(5) Wood parts, fabrics and padding unless they are an integral part of the inner construction.

SEC. 2. *Prohibitions.* (a) On and after the effective date of this regulation and regardless of any contract or other obligation, no person is permitted to sell, offer to sell, deliver, or buy or receive any article covered by this regulation in the course of trade or business, at prices higher than the ceiling prices fixed

by this regulation, and no person shall offer, solicit, attempt or agree to do any of the foregoing.

(b) Prices lower than the ceiling prices fixed by this Regulation may be charged, demanded, paid or offered.

SEC. 3. *General specifications of those articles for which ceiling prices are established by sections 4, 5 or 6.* Articles priced under sections 4, 5 or 6 must conform to the following specifications:

(a) All materials must be new. Ceiling prices for articles made wholly or in part from used materials cannot be established pursuant to sections 4, 5 or 6 of this regulation, but must be established pursuant to the applicable section covering articles containing used materials. When used in this regulation used material means any material which has been subjected to any use in an upholstered product.

(b) All coils and helicals shall be high carbon spring wire and must be tempered by proper heat treatment.

(c) All wire connections must be properly secured and reinforced where necessary.

(d) The pig tail helicals which are used in helical-tied constructions and innerspring units shall be attached to vertical springs in such a manner as to prevent shifting under service while maintaining a definite hinge joint.

(e) Cut ends of wire on all constructions and innerspring units shall be turned into such a position as not to interfere with the action of the springs or damage the covering.

SEC. 4. *Dollars and cents ceiling prices for sales by manufacturers of specified items of metal upholstery springs, constructions and accessories.* This section establishes ceiling prices for the specific items of metal upholstery springs, constructions and accessories set forth below. (2) Sold, offered for sale or delivered during March 1942 to the furniture trade an article of the same general type which is specifically priced under section 4.

(b) You determine your ceiling price under this section as follows:

(1) Select from the articles listed in section 4 of this regulation an article of the same general type which you sold, offered for sale or delivered to the furniture trade during March 1942 and which is nearest in size and construction to the article being priced.

(2) Ascertain for that article both (i) the maximum price fixed in section 4 for sales in the base model quantities, and (ii) your "highest price" during March 1942 to the furniture trade for sales in the same quantities. The term "highest price" when used in this regulation, means the highest net f. o. b. factory price after application of all discounts and rebates, except discounts for cash payment.

(3) Divide the price ascertained under (2) (i) above by the March 1942 price ascertained in (2) (ii) above. The resulting figure is the percentage factor.

(4) Ascertain your highest March 1942 price of the article being priced for sales to the furniture trade in the quantities specified in (b) (2) above.

(5) Multiply the price in (b) (4) above by the percentage factor in (b) (3) above. The resulting figure is your base ceiling price for the article being priced for sales to the furniture trade in the quantities specified in (b) (2) above. That price is subject to all applicable extras and allowances set forth in section 4 for that type of article.

(c) *Reports to be filed.* You may not sell, offer to sell, or deliver any article for which a ceiling price is fixed by this section until you have complied with the reporting and waiting provision required below. You must file with the Consumer Durable Goods Price Branch of the Office of Price Administration, Washington, D. C., a report setting forth the following information:

(1) The principal specifications of the article selected under (b) (1) above.

(2) Your highest March 1942 price for sales of that article as ascertained in (b) (2) (ii) above.

(3) The ceiling price listed under section 4 for the article selected in (b) (1) above.

(4) The principal specifications of the article to be priced and your highest March 1942 price of that article in the base quantities.

(5) Your ceiling price for the article to be priced as determining by this section.

Fifteen days after mailing of the report, in the absence of a contrary direction from the Office of Price Administration, the manufacturer may offer for sale the article at the price reported. If the report, as filed, is correct, the price shall be subject to adjustment (not to apply retroactively) at any time by order of the Office of Price Administration, where it appears that the price so established is out of line with the general level of prices established by this regulation. If the report as filed, is incorrect, the ceiling price for a sale, offer to sell or delivery of an article made pursuant to the incorrect report shall be the ceiling price which is properly computed under the formula contained in this section.

SEC. 6. *Maximum prices for sales by manufacturers of articles which cannot be priced pursuant to sections 4 and 5 but which are of the same type as an article currently manufactured for which a ceiling price is established by section 4.* The ceiling price for sales by a manufacturer to the furniture trade of any article which cannot be priced pursuant to sections 4 and 5 and which is of the same general type as an article currently manufactured and for which a ceiling price is established by section 4 shall be determined by the pricing formula set forth in this section.

NOTE: The meaning of certain terms used in this section is further explained in subsequent provisions of this section. The terms so explained are in quotation marks the first time they appear in the text.

(a) *Pricing formula.* To establish a ceiling price under this section, the manufacturer shall:

(1) Determine the "unit direct cost" for the article being priced.

(2) Select an article of the same general type currently manufactured by him for which a ceiling price is established under section 4 of this regulation and which has a unit direct cost closest to the unit direct cost of the article being priced.

(3) For the article selected in (2) above, determine (i) the unit direct cost and (ii) ascertain the base ceiling price established by section 4.

(4) Divide the base ceiling price in (3) (ii) above by the unit direct cost in (3) (i) above. The resulting figure is the percentage factor.

(5) Multiply the unit direct cost of the article being priced by the percentage factor ascertained in (4) above. The resulting figure is your base ceiling price for sales of the article being priced to the furniture trade. That price is subject to all applicable extras and allowances set forth in section 4 for sales of the comparable article.

(b) *Computation of unit direct cost.* For the purpose of this regulation, unit direct cost includes direct labor and direct material costs, but does not include factory burden (sometimes called factory overhead, or indirect factory expense), packaging and crating costs, royalties and patterns, tool and die, and items of administrative, selling and general expenses. Manufacturers shall compute the cost per unit of direct labor and material for both the comparable article and the article to be priced on the basis of the following: "wage rates", "material prices", and "operating conditions".

(1) *Wage rates.* The wage rates applicable to any article shall be the highest wage rates in effect in the manufacturer's plant at the time he manufactures the article for each class of labor involved in the production of the article. However, wage rates may not be higher than those in effect in the manufacturer's plant on October 3, 1942, unless approved by the War Labor Board. If an officer or owner performs any direct labor in the manufacture of the article, the wage rate applicable for his services may not exceed the wage rate paid to an employee performing the same type of labor.

(2) *Material prices.* Material prices for both the article being priced and the comparable article shall be the manufacturer's "customary supplier's" ceiling price to his class of purchaser or the actual cost of such material, whichever is lower.

(3) *Customary supplier.* The term customary supplier means the person from whom the manufacturer purchased the majority of his materials during March 1942 or lacking a March 1942 supplier of the material, his most recent supplier of the material.

(4) *Operating conditions.* Using the wage rates and material prices determined under (b) (1) and (b) (2) above, the manufacturer shall compute his cost per unit of direct labor and material by the accounting methods customarily employed by him in computing his costs. He shall compute the cost on the basis of production techniques employed in his plant and his actual volume of production, or the volume of production he reasonably expects for the article for which a ceiling price must be established by this section. Such expenses as breaking in, training, starting, set up charges and other non-recurring expenses may not be included in determining unit direct costs.

(c) *Reports to be filed.* You may not sell, offer for sale or deliver any article for which a ceiling price is fixed by this section until you have complied with the reporting and waiting provisions required below. You must file with the Consumer Durable Goods Price Branch of the Office of Price Administration, Washington, D. C., a report setting forth the following information prior to first offering the articles for sale.

(1) Principal specifications of the article being priced.

(2) Principal specifications of the comparable article listed in section 4.

(3) An itemized breakdown of the manufacturer's unit direct cost of the article to be priced, showing separately according to his own system of accounts or regularly prepared operating statements all major component unit direct cost factors. Also, the number of units of production upon which the unit direct costs were based.

(4) An itemized breakdown of the manufacturer's unit direct cost of the comparable article listed in section 4, showing separately according to his own system of accounts or regularly prepared operating statements all major component unit direct cost factors. Also, the number of units of production upon which the unit direct costs were based.

(5) The ceiling price for the article being priced as determined by the application of the pricing formula.

(6) Specify as to each item of material and labor reported in (3) and (4) whether costs are computed from available written records or from estimates.

Fifteen days after mailing of the report, in the absence of a contrary direction from the Office of Price Administration, the manufacturer may offer for sale the article at the price reported. If the report, as filed, is correct, the price shall be subject to adjustment (not to apply retroactively) at any time by order of the Office of Price Administration, where it appears that the price so established is out of line with the general level of prices established by this regulation. If the report as filed, is incorrect, the ceiling price for a sale, offer to sell or delivery of an article made pursuant to the incorrect report shall be the ceiling price which is properly computed under the formula contained in this section.

SEC. 7. *Maximum prices for sales of upholstery springs, constructions and accessories manufactured from used materials.* If you manufacture and sell any article listed in section 4 of this regulation, which contains used materials, your ceiling price for that article to the furniture trade shall be 75% of the ceiling price for that article listed in section 4. If the article containing used materials is not the same as an article for which a ceiling price is established by section 4, the manufacturer must make an application pursuant to section 11 for specific approval of a maximum price.

SEC. 8. *Maximum prices for sales by manufacturers to automotive and aviation manufacturers of articles made from new or used materials.* If you are a manufacturer of the articles covered by this regulation you establish your ceiling prices for sales to automotive or aviation manufacturers as follows:

(a) *Manufacturers who sold both bedding or furniture manufacturers and automotive and aviation manufacturers during the period October 1, 1941 to March 31, 1942.* If you regularly sold articles covered by this regulation to both the furniture trade and automotive or aviation manufacurers during the period October 1, 1941 to March 31, 1942, you establish your ceiling prices to automotive and aviation manufacturers by the formula set forth below:

(1) Select from the articles listed in section 4 of this regulation an article of the same general type which you sold, offered for sale, or delivered to the furniture trade during March 1942.

(2) Ascertain for that article both (i) the maximum price fixed in section 4 for sales in the base model quantities and (ii) your highest March 1942 price to the furniture trade for sales in the same quantities.

(3) Divide the price ascertained in (2) (i) above by the March 1942 price ascertained in (2) (ii) above. The resulting figure is the percentage factor.

(4) Ascertain the highest price charged by you to automotive or aviation manufacturers during the period October 1, 1941 to March 31, 1942 for the article being priced.

(5) Multiply the price in (4) above by the percentage factor in (3) above. The resulting figure is your f. o. b. factory ceiling price under this regulation for sales of the article to automotive and aviation manufacturers. This price is subject to all quantity discounts and dollar differentials customarily allowed to these classes of purchasers.

(b) *Reports to be filed.* You may not sell, offer to sell, or deliver any articles for which a ceiling price is fixed by this section until you have complied with the reporting provisions below. You must file with the Consumer Durable Goods Price Branch of the Office of Price Administration, Washington, D. C., a report setting forth the following information prior to first offering the article for sale:

(1) The principal specifications of the article selected under (a) (1) above.

(5) Your ceiling price for the article to be priced as determined by this section.

(c) *Manufacturers who did not regularly sell the articles covered by this regulation to both automotive and aviation manufacturers and the furniture trade during the period October 1, 1941 to March 31, 1942.* If you are a manufacturer and did not sell the articles covered by this regulation to both the automotive and aviation manufacturers and the furniture trade during the period October 1, 1941 to March 31, 1942, you must make an application for specific approval of ceiling prices for sales to automotive and aviation manufacturers pursuant to section 11 of this regulation.

SEC. 9. *Maximum prices for sales by manufacturers to jobbers.* When used in this regulation the term jobber means any person who purchases any article covered by this regulation and resells that article without substantially changing its form.

(a) On sales to jobbers of the articles covered by this regulation, each manufacturer shall allow a discount of not less than 3% off the ceiling prices established by sections 4, 5, 6, 7 and 8 of this regulation. You are required to notify each jobber of your base ceiling price for sales to the furniture trade as required by paragraph (b) below.

(b) *Notification.* On and after the effective date of this regulation, at the time the manufacturer sends his first invoice to each jobber, he must notify the jobber of the base ceiling price for sales to the furniture trade of each article covered by this regulation which is listed on the invoice. For the purpose of this regulation, the "base ceiling price" is the price determined under sections 4, 5, 6, 7 or 11 for the quantities applicable to the base model specified in section 4.

SEC. 10. *Maximum prices for sales to the United States Government.* On sales to the United States Government or any agency thereof, or any contractor therewith for use in fulfillment of the contract, of an article for which a ceiling price is established by this regulation, the ceiling price shall be the lowest price established by this regulation for sales of the article to any class of purchaser in the largest quantities.

SEC. 11. *Maximum prices for sales by manufacturers of metal upholstery springs, constructions and accessories which cannot be priced under any other section of this regulation.* The maximum price for sales by manufacturers of any article which cannot be priced under any other section of this regulation, shall be a price set by order of the Price Administrator in line with the level of maximum prices established by this regulation. No person may sell, offer to sell or deliver an article for which a ceiling price must be established under this section until the price has been specifically authorized by order of the Office of Price Administration. If in violation of this provision, a sale, offer to sell or delivery of an article is made before the issuance of an order by the Price Administrator specifically authorizing a ceiling price for the article, the ceiling price applicable to the sale, offer to sell or delivery shall be such a ceiling price as the Price Administrator may establish for the article by subsequent order. Applications for a ceiling price under this section shall be made to the Office of Price Administration, Washington, D. C., and shall contain the following information:
